<b>IV. THE CURRENT ROLE OF THE EUROPEAN UNION .....</b>	<b>166</b>
<b>1. The current role of the European Union .....</b>	<b>167</b>
1.1. The European Union's priorities .....	167
1.2. Joint or national decision-making? .....	171
1.3. The role of the European Union vis-à-vis that of the United States .....	173
<b>2. Support for current policy issues .....</b>	<b>176</b>
2.1. The common security and defence policy .....	176
2.1.1. Support for the ESDP .....	176
2.1.2. Who should take decisions about European defence? .....	179
2.2. Common foreign policy .....	183
2.3. Support for the single currency .....	186
<b>V. THE FUTURE ROLE OF THE EUROPEAN UNION .....</b>	<b>189</b>
<b>1. Europe in the future .....</b>	<b>190</b>
1.1. Best ways to ensure the future of Europe .....	190
1.2. The evolution towards a European political union .....	195
1.3. The perceived and desired speed of building Europe .....	198
1.4. Towards a "two-speed" Europe? .....	200
<b>2. European Constitution .....</b>	<b>202</b>
2.1. Support for a Constitution .....	202
2.1.1. Support for a European Constitution .....	202
2.1.2. Need for a European Constitution .....	207
2.2. Support in the countries where the European Constitution has not (yet) been ratified .....	210
2.3. The effects of the European Constitution .....	213
2.4. The future of the European Constitution .....	215
<b>3. Further enlargement .....</b>	<b>218</b>
3.1. Support for further enlargement .....	218
3.2. The choice of future Member States .....	222
3.3. The question of Turkey .....	224
<b>CONCLUSION .....</b>	<b>227</b>

## INTRODUCTION

The current Standard Eurobarometer was carried out between 6 September and 10 October 2006. This wave, Eurobarometer 66, reflects the public opinion of Europeans prior to the accession of Bulgaria and Romania in January 2007.

This Standard Eurobarometer covers thus 30 countries or territories: the 25 Member States, Bulgaria and Romania, the two candidate countries (Croatia and Turkey) and the Turkish Cypriot Community. It was commissioned by the Directorate-General Communication of the European Commission and was carried out by TNS Opinion & Social. The methodology used is that of the Standard Eurobarometer surveys of the Directorate-General Communication ("Public Opinion and Media Monitoring" Unit). A technical note concerning the interviews, carried out by the institutes of the TNS Opinion & Social network, is annexed to this report. This note specifies the interview method used, as well as the confidence intervals<sup>1</sup>.

As this study has been conducted before the accession of Romania and Bulgaria to the EU, the overall and socio-demographic analysis is based on the EU25 results.

This report studies the major themes related to the European Union and its development.

- ◆ In the first two parts, the report focuses on current and future life in the European Union as perceived by European Union citizens, looking at personal, economic, social and political issues. It then looks in depth at citizens' views on the European economy and its development in a global context.
- ◆ In the third part of this report, the relationship between the European Union and its citizens is examined. The first issue looks at European democracy, citizenship and values. Then, an analysis of what citizens think about the European institutions is made. This part also reports on the level of knowledge and information held by citizens on European institutions.
- ◆ The fourth part of this report focuses on the role currently played by the European Union in various areas and analyses which of these areas are seen as priorities by citizens. A chapter then deals more specifically with public opinion regarding a number of policy areas, namely common foreign and security policy, common foreign policy and the single currency.
- ◆ Lastly, the report looks at the future of the European Union: what is most helpful for the future of Europe and at what speed Europe should evolve. It also examines more specifically the opinions of European citizens concerning the future of the Constitution and further enlargement.

---

<sup>1</sup> The results tables are included in the annex. The totals indicated may show a one-point difference with the sum of the individual units. It should also be noted that the total of the percentages in the tables of this report may exceed 100% when the respondent has the possibility to give several answers to the same question.

This report analyses the results and changes at three levels: firstly, the average of the 25 European Union Member States (EU25); secondly, the average of the former EU15 Member States (EU15) and the ten Member States that joined the European Union on 1 May 2004 (NMS10); and, thirdly, averages at national level. The averages for previous years represent the results obtained for all Member States of the European Union as it was composed at the time those surveys were conducted.

A brief comment is also made on the way the replies vary according to the socio-demographic characteristics of the respondents (gender, age, etc.), as well as certain other indicators, such as their attitude to the European Union, whether they see themselves as opinion leaders<sup>2</sup> and their political leanings<sup>3</sup>.

The reader should appreciate that there are three kinds of reports within the Eurobarometer. The first results focus on trend indicators and a selection of new topics aiming at giving a quick and operational overview of European public opinion on major issues. The full report analyses in depth all the questions asked in a Standard Eurobarometer wave. National reports are published by the national representations of the European Commission and written in the national language(s). They focus more on comparisons between national results and the EU average. Executive summaries of these national reports also exist and are published in English on the europa website.

*The Eurobarometer web site can be consulted at the following address:*

[http://ec.europa.eu/public\\_opinion/index\\_en.htm](http://ec.europa.eu/public_opinion/index_en.htm)

#### *The respondents*

*who spent time taking part in this survey are to be thanked – for, without their active participation, this study would not have been possible.*

---

<sup>2</sup> INDEX OPINION LEADERSHIP: 1. ++; 2. +; 3. -; 4. --

QA1. When you get together with friends, would you say you discuss political matters frequently, occasionally, or never?

QA2. When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? Does this happen...? Frequently – Occasionally - Never

Thus, if a person interviewed tries often or from time to time to convince his or her interlocutor or discusses politics on a regular basis, he or she will be considered as a leader of opinion falling in category 1 (++) . On the other hand, if a respondent rarely or never tries to convince his or her interlocutor and never discusses politics, then he or she will not be considered as being a leader of opinion falling in category 4 --.

<sup>3</sup> In political matters people talk of "the left" and "the right". How would you place your views on this scale? (1-4) Left; (5-6) Centre; (7-10) Right.

### Note

The Standard Eurobarometer carried out between 6 September and 10 October 2006 (No. 66) is part of Eurobarometer wave 66.1.

In this report, the countries are represented by their official abbreviations.

#### ABBREVIATIONS

EU25	European Union - 25 Member States
EU15	European Union - 15 Member States before the most recent enlargement (1 <sup>st</sup> May 2004)
NMS10	New Member States – 10 Member States that joined the EU during the enlargement in May 2004
DK/NA	Don't know / No answer
BE	Belgium
CZ	Czech Republic
DK	Denmark
<i>D-E</i>	<i>East Germany</i>
DE	Germany
<i>D-W</i>	<i>West Germany</i>
EE	Estonia
EL	Greece
ES	Spain
FR	France
IE	Ireland
IT	Italy
CY	Republic of Cyprus*
CY (tcc)	Area not controlled by the government of the Republic of Cyprus
LT	Lithuania
LV	Latvia
LU	Luxembourg
HU	Hungary
MT	Malta
NL	The Netherlands
AT	Austria
PL	Poland
PT	Portugal
SI	Slovenia
SK	Slovakia
FI	Finland
SE	Sweden
UK	The United Kingdom
BG	Bulgaria
RO	Romania
HR	Croatia
TR	Turkey

\* Cyprus as a whole is one of the 25 European Union Member States. However, the "acquis communautaire" is suspended in the part of the country that is not controlled by the government of the Republic of Cyprus. For practical reasons, only the interviews conducted in the part of the country controlled by the government of the Republic of Cyprus are recorded in the category "CY" and included in the EU25 average. The interviews conducted in the part of the country not controlled by the government of the Republic of Cyprus are recorded in the category "CY(tcc)" [tcc: *Turkish Cypriot Community*].

## I. THE CONTEXTUAL INDICATORS

In this introductory chapter the following issues are analysed:

1. **Climate of opinion**: life satisfaction, current state of play, future expectations, the direction in which things are going and people's main concerns;
2. **Social and political climate**: the personal values of Europeans, attitudes to societal, environmental and economic issues, domestic affairs and politics, trust in institution and national pride.

# 1. Climate of opinion

## 1.1. Life satisfaction

*- Europeans are satisfied with the life they lead -*

Overall, **people in the European Union claim to be satisfied with the life they lead (82%)<sup>4</sup>** and there has been little change in this view over the years.

However, levels of life satisfaction vary depending on people’s socio-demographic characteristics.

<sup>4</sup> QA3. On the whole, are you very satisfied, fairly satisfied, not very satisfied or not at all satisfied with the life you lead?

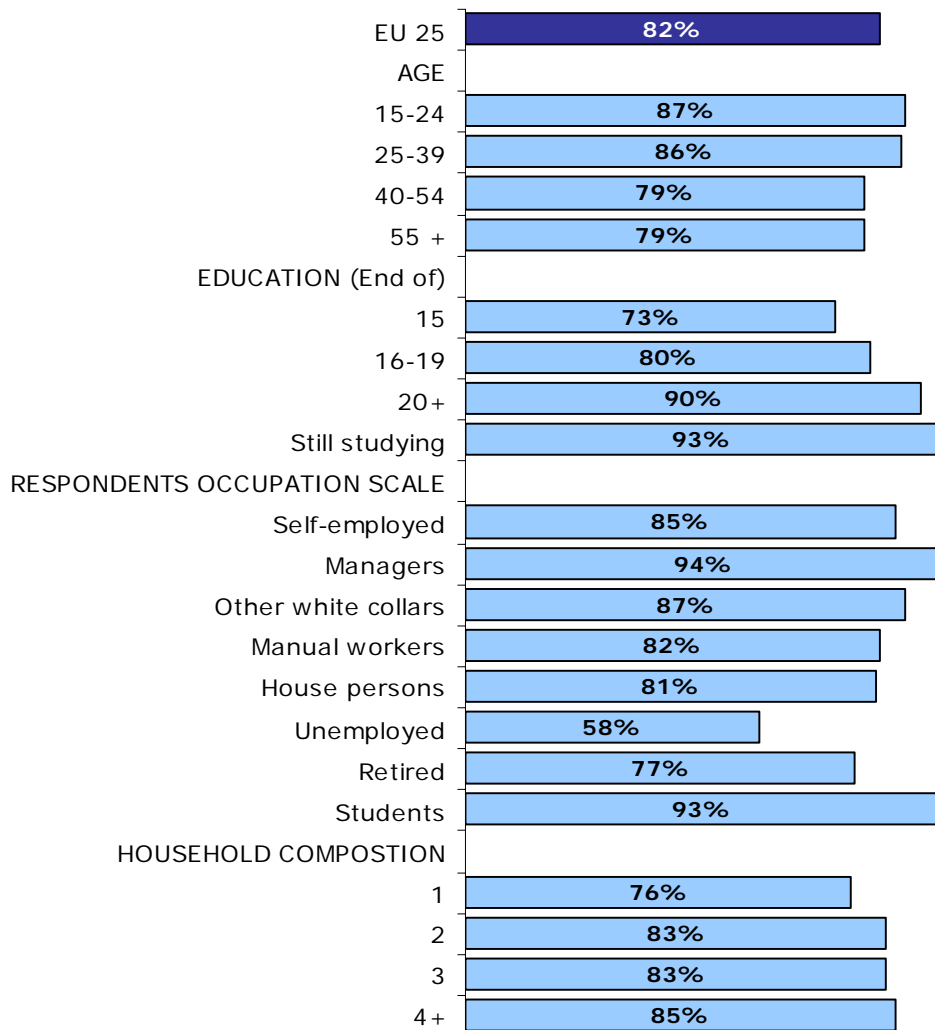

The likelihood of being satisfied with one's life increases with the level of education. Levels of satisfaction are particularly widespread among students (93%) whereas 'only' 73% of respondents having studied up to the age of 15 declare to be satisfied. Age is another factor. Unlike in the previous survey, we now find a slight gap in satisfaction levels between people aged 15 to 39 (around 86%) and those aged 40 and over (79%).

Unemployment appears to be the main factor that impacts a person's view on life: over four out of ten unemployed Europeans are not satisfied with the life they lead (42%). This shows the importance of being active for people's personal equilibrium.

Last but not least, persons who live alone also tend to be relatively less satisfied with their lives in general than those living in a household composed of several persons.

---

**% "Satisfied" with the life you lead - EU**

Satisfaction levels are not the same throughout the European Union and people in the former EU15 tend to be more satisfied with the life they lead (84%) than citizens of the NMS (72%).

More than 9 out of 10 people in Sweden, Denmark, the Netherlands, Finland and Luxembourg are satisfied with their life in general. In fact, in Denmark 64% of people are "very satisfied" with their life. In the other countries, this most positive sentiment is expressed by far fewer respondents.

On the other hand, 50% of citizens in Hungary are not satisfied with the life they lead. In Portugal (37%), Lithuania (36%) and Latvia (34%), this view is held by just over one-third of citizens.

In Bulgaria and Romania, the mood is also bleak with 62% of citizens in Bulgaria and 51% in Romania feeling not satisfied to a greater or lesser extent with the lives they lead. This stands out in sharp contrast with the mood in the two candidate countries where just 28% of Turks and 29% of Croatians feel this way.

## 1.2. State of play

### *- Widespread pessimism about the employment situation in the Member States but the mood is slightly less morose than in spring 2006 -*

The **employment situation at country level** is still the area where European Union citizens have the most negative attitude although over the past year public opinion has improved considerably<sup>5</sup> since Spring 2006. The latest survey shows that over a quarter of European Union citizens believe that the employment situation in their country is good while seven out of ten feel that it is bad.

% EU25	Spring 2006			Autumn 2006		
	Good	Bad	Diff.	Good	Bad	Diff.
The employment situation in (OUR COUNTRY)	24%	74%	-50	27%	70%	-43
The situation of the (NATIONALITY) economy	41%	56%	-15	46%	50%	-4
The social welfare situation in (OUR COUNTRY)	48%	48%	0	46%	49%	-3
The situation of the environment in (OUR COUNTRY)	52%	44%	+8	54%	41%	+13
The situation of the European economy	53%	32%	+21	58%	28%	+30

The **situation of the national economy** is the other area that is perceived negatively by the majority of respondents, even if the percentage of favourable replies has increased by 5 points since the previous survey and the percentage of negative replies has fallen by 6 points. 50% of respondents consider that the economic situation in their country is poor, while 46% take the opposite view.

Despite these improvements, people are still much less optimistic about their country's economic situation than they are about the situation of the European economic. Close to three out of five respondents consider that **the economic situation within the European Union** is good (58%) compared to over a quarter who have a negative view (28%).

In comparison to spring 2006, the assessment of the **social welfare situation** in the Member States is now slightly less positive. On average, 49% of respondents rate the social welfare situation in their country as being bad, compared to 46% who believe it is good. In spring 2006, equal proportions of the persons interviewed had a positive opinion and a negative opinion in this regard.

However, opinion on **the environment situation** has become somewhat more positive since spring 2006. On average, 54% of citizens consider that the environmental situation in their country is good (+2 points) while 41% take the opposite view (-3 points).

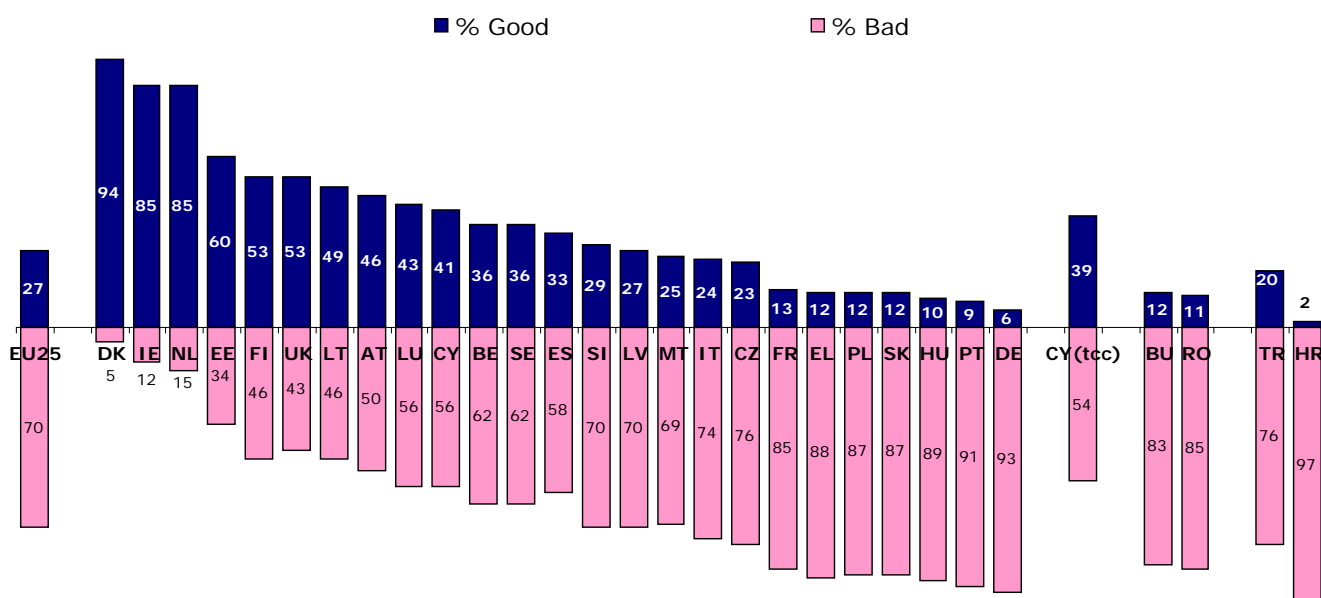

<sup>5</sup> QA51. How would you judge the current situation in each of the following ? Very good, rather good, rather bad or very bad.

**These average results conceal very large differences between the Member States.**

Focussing firstly on **the employment situation in the countries polled**, we find that the proportion of respondents who rate this positively ranges from 6% in Germany to 94% in Denmark.

In the two accession countries, the evaluation of the national employment situation is generally negative and in Croatia, 97% of the public regards the situation as bad.

**How would you judge the current situation in each of the following?**  
The employment situation in (OUR COUNTRY)

In 20 Member States, the mood is now more upbeat than it was in spring 2006, with significant increases noted in the percentage of "good" responses.

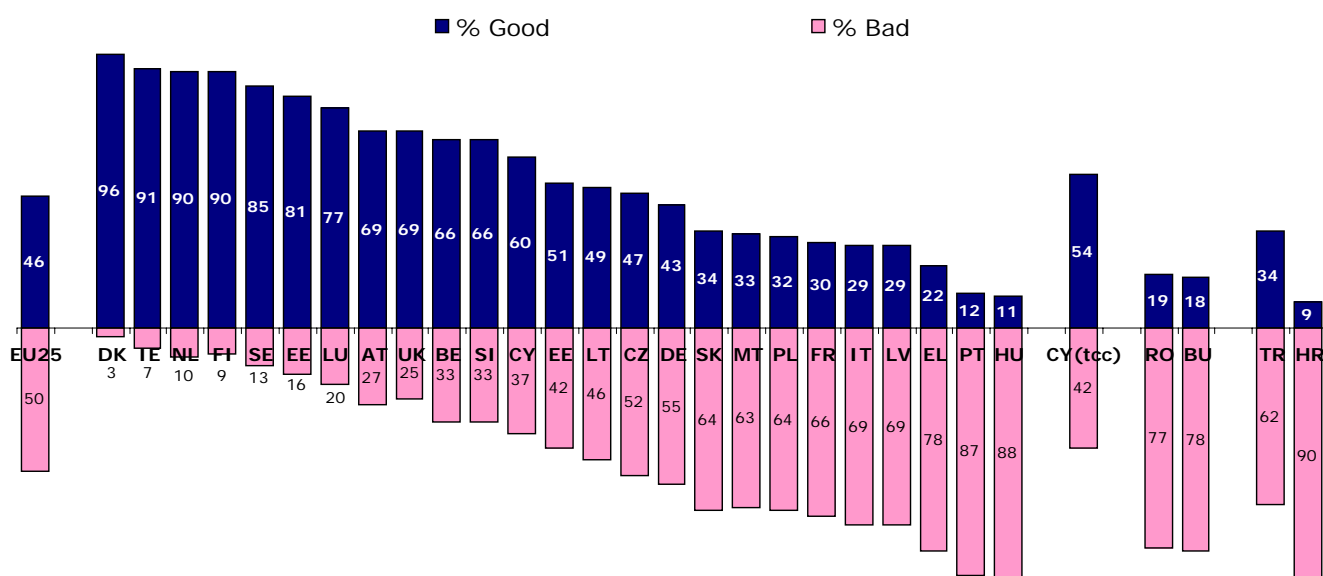

The largest increases are recorded in the Netherlands (+26 points) and Estonia (+17 points). The United Kingdom and Hungary are the only two Member States where public opinion about the national employment situation is now significantly less positive than it was in spring 2006 (-5 and -4 points, respectively). In Bulgaria and Romania, a slight improvement is noted, whereas, in Turkey, the proportion of respondents who rate the national employment situation as being bad increased from 70% to 76%.

Socio-demographically, several significant differences are noted. With regards to people's level of completed education, 34% of people who stayed in school full-time until age 20 or older feel that the employment situation in their country is good, while only 22% of people who left school aged 15 or younger share this feeling. In terms of people's occupational status, 38% of managers feel that the employment situation in their country is good. This contrasts sharply with the view of unemployed people who, as to be expected, are most inclined to perceive the national employment situation as bad (83%).

Focussing next on **the national economic situation**, the range of positive assessments within the Member States extends from one extreme of 11% in Hungary to 90% and over in the Netherlands Finland, Ireland and Denmark. In Bulgaria and Romania, less than one citizen in five rates the economic situation favourably. People in Croatia are, however, least optimistic: only 9% give a positive assessment.

Changes since the previous survey in the perceived national economic situation tend to be observed in the same countries where changes in the employment situation have been measured. The countries where the largest increases in the percentage of "good" responses have been recorded are the Netherlands (+19 points) and Slovenia (+17 points). In Hungary, conversely, the mood is now considerably less positive (-15 points).

**How would you judge the current situation in each of the following?**  
The situation of the (NATIONALITY) economy

In terms of socio-demographic characteristics, differences are noted primarily on the basis of education: the longer people stayed in full-time education, the more likely they are to positively assess the economic situation in their country. Furthermore, while managers give a positive assessment (6 out of 10 see the situation as good), the situation is the opposite for the unemployed (65% perceive the national economic situation as bad).

Moving on to the national picture with regards the assessment of the **environmental situation**, the percentage of "good" responses ranges from 26% in Hungary to 88% in Finland. In Romania and Bulgaria, public opinion is less positive with 21% and 22% of respondents respectively assessing the situation as "good".

With regard to the perceived current **social welfare situation** there is a clear divide in opinion between citizens in the former EU15 and citizens in the new Member States. In the latter positive assessments are given less frequently than in the former EU15 (23% vs. 54%). While citizens in Belgium (84%), Luxembourg and Finland (both 80%) are most positive about the social welfare situation in their country, the situation is assessed most critically in Latvia where more than eight out of ten citizens find it bad (83%). Citizens in Bulgaria and Romania are equally negative; only 9% of the poll in Bulgaria and 12% in Romania believe the social welfare situation is good.

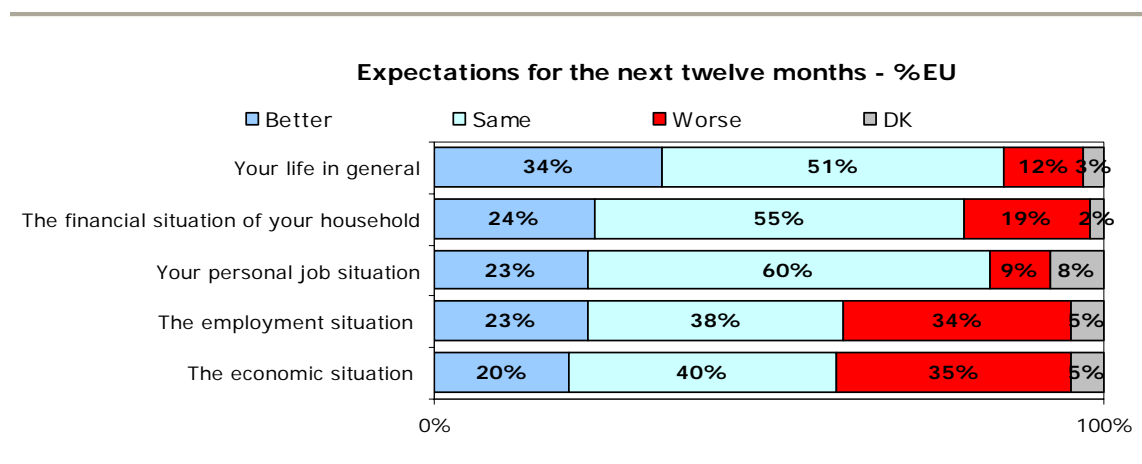

### 1.3. Future expectations

While people's expectations about their life in general and their personal situation are positive, optimism about the employment and economic situation in their country is less widespread. It should be noted that, once again, there are large variations between the Member States<sup>6</sup>.

***- Expectations about the next 12 months are generally optimistic but a third of Europeans still worry about the national employment and economic situation -***

Generally, European Union citizens express a great deal of optimism about the future. 34% of respondents believe that **life in general** will improve over the next twelve months, while 51% do not expect any changes and only 12% believe that it will be worse. These results are very similar to those obtained last spring.

Europeans are also relatively optimistic about **the financial situation of their household** and **their personal job situation**. Nonetheless, as in previous surveys, around one citizen in five (19%) believes that the financial situation of their household will worsen over the next twelve months.

Citizens are least optimistic about **the employment and economic situation in their country** with one in three feeling that the situation will deteriorate over the next twelve months (34% and 35%, respectively).

<sup>6</sup> QA4. What are your expectations for the next twelve months: will they be better, worse or the same, when it comes to...?

1° your life in general 2° the economic situation in (OUR COUNTRY) 3° the financial situation of your household 4° the employment situation in (OUR COUNTRY) 5° your personal job situation

In comparison with spring 2006, people's expectations have not changed substantially except when it comes to the national employment situation. The percentage of people who expect this to get worse has decreased from 38% to 34%.

	Your life in general		The financial situation of your household		Your personal job situation		The economic situation in (our country)		The employment situation in (our country)	
	EB65	EB66	EB65	EB66	EB65	EB66	EB65	EB66	EB65	EB66
	Spring 2006	Autumn 2006	Spring 2006	Autumn 2006	Spring 2006	Autumn 2006	Spring 2006	Autumn 2006	Spring 2006	Autumn 2006
Better	35%	34%	25%	24%	22%	23%	21%	20%	21%	23%
Worse	12%	12%	19%	19%	9%	9%	35%	35%	38%	34%
Same	51%	51%	54%	55%	61%	60%	38%	40%	36%	38%
DK	3%	3%	2%	2%	8%	8%	5%	5%	6%	5%

While, in most countries, the feeling that things will stay the same over the next year dominates, there are a few notable exceptions. A strong sense of optimism is present in Estonia where the majority view is that the economic situation, life in general and the employment situation will improve over the next twelve months. In the Netherlands, there is also widespread optimism about the employment situation with 68% of respondents saying it will become better. Furthermore, one Dutch interviewee out of two expects the economic situation to improve. There is also widespread optimism that the employment situation will improve in Lithuania (53%) and Sweden (46%).

Conversely, the mood is generally pessimistic in Hungary. While 67% of respondents expect the economic situation to get worse, 61% also feel this way about the employment situation, 57% fear that the financial situation of their household will get worse and 47% are pessimistic about their life in general.

In Cyprus, Greece, Portugal and Germany, expectations are generally pessimistic with regards to the economic and employment situation. Finally, in Luxembourg and the United Kingdom the majority view is that the employment situation will get worse. Nonetheless, respondents in the UK are among the most optimistic about their life in general, with 50% saying that it will get better.

**Expectations for the next twelve months (by country)**

	Your life in general			The financial situation of your household			Your personal job situation			The economic situation in (our country)			The employment situation in (our country)

#### 1.4. The direction in which things are going

##### - Fewer people now feel that things are going in the right direction -

Overall the number of people who feel that things are going in the right direction in the European Union is still higher than those who take this view about their own country (33% vs. 28%). However, **the mood is now less positive than it was at the beginning of 2006<sup>7</sup>**.

The proportion of citizens who feel that things are going in the right direction in the European Union has fallen by 6 points. An equal proportion of citizens now feel that things are going in the wrong direction in the European Union (33%; +6 points). However, the difference regarding the negative side of the answers between the national and the European situation remains important. In other words, the EU perspective produces less pessimism amongst EU citizens than the national one: almost one in two respondents believes that things are going in the wrong direction in their respective country, while one third of them share the same view when it comes to the EU level.

Question: QA5. At the present time, would you say that, in general, things are going in the right direction or in the wrong direction, in...?

Option: (OUR COUNTRY)

The European Union

<sup>7</sup> QA5 At the present time, would you say that, in general, things are going in the right direction or in the wrong direction, in...?

At country level, the most positive results regarding the national situation are found in Ireland (56%), Estonia (53%) and in the Scandinavian countries. Pessimism is strongest in France and Hungary (where 61% of the respondents consider that things are going in the wrong direction), Poland (60%), the UK (57%) and, although to a lesser extent, in Germany (50%).

Regarding the EU perspective, there is a difference of 23 points between the results obtained in the former EU15 countries (29%; -7 points) and the ten new Member States (52%; -1 point). The view that things are going in the right direction in the European Union is most widely supported in Lithuania (57%; -3 points), Slovenia (56%; no change) and Poland (55%; -3 points). Citizens in France (22%; -7 points), the United Kingdom (24%; -10 points), Germany (28%; -10 points) Luxembourg (29%; -8 points) and Italy (29%; -4 points) are the most pessimistic, even more so than at the beginning of 2006.

Age and education influence how people perceive the direction in which things are going both at the national level and in the European Union as a whole. However, the age groups and the educational groups are particularly divided in their views when it comes to the direction in which things are going in the European Union. 47% of respondents who are still studying believe that things are going in the right direction in the European Union compared with 25% of those who left school the earliest, while 43% of the youngest age category tend to be optimistic about the direction in which things are going in the EU compared with only 27% of those aged 55 and over.

	Things are going in the right direction...	In (COUNTRY)	In the EU
	<b>EU average</b>	28%	33%
	<b>Age</b>		
	15-24	32%	43%
	25-39	28%	35%
	40-54	27%	32%
	55 +	26%	27%
	<b>Education (End of)</b>		
	15-	23%	25%
	16-19	27%	32%
	20+	32%	38%
	Still Studying	34%	47%
	<b>EU knowledge</b>		
	1-3	23%	25%
	4-7	31%	38%
	8-10	35%	45%

**Subjective EU knowledge** is another important determinant: when looking at the results for “things are going in the right direction in the European Union”, there is a difference of 20 points between respondents who feel that they know a great deal about the European Union and those who feel that they know very little (45% versus 25%).

The most important determinants of whether the EU is perceived to be going in the right or the wrong direction are people's attitudes to the European Union in general. The more people have a positive image of the EU, the more they believe things are going in the right direction in the EU and vice-versa. However, as the table below indicates, views about the direction in which things are going at the national level are also, albeit less strongly, influenced by people's attitudes towards the European Union.

*Things are going in the right direction...*

	In (COUNTRY)	In the EU
<b>EU25</b>	<b>28%</b>	<b>33%</b>
<b>Image of the EU</b>

Not benefited	16%	15%
<b>Trust in the EU</b>		
Tends to trust	41%	56%
Tends not to trust	17%	16%
<b>EU membership</b>		
Good thing	39%	48%
Neither good nor bad	17%	19%
Bad thing	14%	11%

## 1.5. The main concerns of European citizens

**- Concerns about unemployment are now less widespread but worries about immigration increase -**

Overall the proportion of respondents viewing unemployment as one of the two most important issues facing their country<sup>8</sup> has gone down since Spring 2006 from 49% to 40%<sup>9</sup>. In most Member States concerns about unemployment are now less widespread than they were in Spring 2006, with the largest drops noted in France (-18 points), Slovakia (-17 points), Hungary (-15 points), Slovenia (-14 points) and Finland (-13 points) - see the graph in next page -. Yet, concerns about unemployment remain high in many countries, particularly so in Germany (70%), Poland (66%), Portugal (62%) and the two candidate countries (65% in Croatia and 64% in Turkey). People in Ireland least voice concern about this issue (5%), followed by people in the United Kingdom (11%), the Netherlands (12%) and Estonia (13%).

---

<sup>8</sup> QA23 What do you think are the two most important issues facing (OUR COUNTRY) at the moment?

<sup>9</sup> Concerning these results, two issues should be borne in mind.

Firstly, in Spring 2006, the list of items was not exactly the same: the item *Energy related issues* replaced the item *public transport*. Even though the result for these two items is marginal (3% for both), the interpretation of the evolutions at EU level and particularly at the level of individual countries, should be made with some caution, as this change could have impacted the results for all other items of this question. This is notably the case for the countries where public transport was an issue for a significant share of respondents: Luxembourg and Austria (both 10%). It is also the case for the countries where the new *Energy related issues* item has been selected by a large proportion of respondents, as in Finland (15%) or Malta (13%) .

Secondly, the question was asked in Spring 2006 to half of the total sample; the sample was split and the second half of the sample answered the question without having answer options read to them. In other words, the comparison with Spring 2006 results is made using different respondent bases. That said, it is worth commenting on the evolutions, albeit with the above caveats borne in mind.

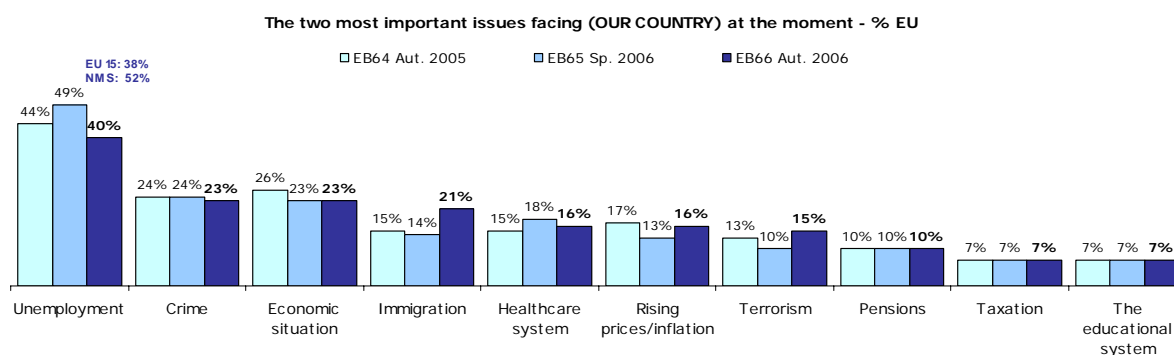

## The two most important issues facing (OUR COUNTRY) - Unemployment

As in Spring 2006, the economic situation and crime are mentioned by approximately one respondent in four (both 23%). Concern about the economic situation is most widespread in Hungary (47%), followed by Greece (41%) and Portugal (40%). Conversely, in Ireland and the United Kingdom, only one respondent in twenty voices concern about the national economic situation. In Ireland, there is widespread concern about crime (55%). Estonia (45%) and Cyprus (42%) are the only two other Member States where more than 4 out of 10 citizens express concern about crime. Looking at the Candidate Countries, crime also emerges as a major issue for citizens in Croatia. Crime is least widely seen as an issue of concern in Hungary and Luxembourg (both 10%).

The proportion of respondents viewing immigration as one of the two most important issues facing their country has increased significantly since spring 2006 from 14% to 21%. This evolution is to a degree influenced by public opinion in Spain, where 64% of respondents regard immigration as one of the two most important issues facing their country (+31 points compared to Spring 2006), and in Malta (45%, +25 points). Immigration is also a widespread concern in the United Kingdom (40%, +8 points).

The healthcare system, inflation, terrorism and pensions form a second group of concerns for EU citizens with scores ranging between 16% and 10%.

A comparison between the former EU15 countries and the NMS10 countries shows that views are clearly divided on some issues. In the former EU15 countries, immigration and terrorism are more often seen as a cause of concern than is the case in the ten Member States that joined the EU in 2004. Conversely, in the NMS10, unemployment and the healthcare system are more widely seen as issues of concern than is the case in the former EU15 countries.

Regarding the evolution since the previous wave, concerns about inflation are now somewhat higher in the new Member States where a significant increase has been noted since spring 2006 (+8 points). On the other hand, citizens in the EU15 are more concerned about terrorism than in spring 2006 (+6 points).

---

	EU15	NMS10	Difference
Immigration	24%	6%	+18
Terrorism	17%	4%	+13
The educational system	8%	4%	+4
Crime	24%	21%	+3
Protecting the environment	5%	2%	+3
Energy related issues	3%	3%	-

Healthcare system	14%	26%	-12
Unemployment	38%	52%	-14

---

## 2. Social and political climate

The second part of this first chapter presents a set of new indicators measuring the positioning of EU citizens on some key societal issues. These indicators were asked to understand the opinion of EU citizens on issues that are debated in certain Member States.

### 2.1. Personal and European values

*- Peace and human rights: two European values that citizens cherish above all -*

**Peace (52%), respect for human life (43%) and human rights (41%) are the most important personal values of Europeans<sup>10</sup>.** When asked about the values that best represent the European Union<sup>11</sup>, respondents position human rights (38%) and peace (36%) in the top three as well. The respect for human life appears to be less embodied by the EU while the importance of democracy and the rule of law seem more evident at the EU level than at a personal one.

<sup>10</sup> QA48a And in the following list, which are three most important values for you personally? (MAX. 3 ANSWERS)

<sup>11</sup> QA48b Which three of the following values, best represent the European Union? (MAX. 3 ANSWERS)

In twenty of the twenty-five current Member States, **peace is the number one personal value** and in the other five countries it comes in either second or third place. Respondents in Germany (65%), Slovakia (63%) and Sweden (61%) mentioned most frequently peace as one of their three most important personal values. The lowest percentages were recorded in Lithuania (38%), followed by the Netherlands and the United Kingdom (both 42%).

**Respect for human life was the most frequently mentioned personal value in Ireland (56%), the United Kingdom (50%) and the Netherlands (46%) and ranks as one of the top three values in nearly all other Member States.** The exceptions are Sweden and Denmark where democracy makes the top three, as well as Austria where individual freedom makes the top three. In these three countries, respect for human life was the fourth most frequently mentioned personal value.

In all Member States, **human rights is also one of the top three personal values**, coming in first place in Cyprus (53%) and Lithuania (50%); the lowest scores were recorded in the United Kingdom (32%) and Ireland (34%).

In Bulgaria and Romania, the three most important personal values are the same as in the European Union. It should be noted however that in Bulgaria, respect for human life was mentioned most frequently by respondents (50%), whereas in Romania, the issue of human rights tops the list (47%). Peace comes in second place in Romania (43%) and in third place in Bulgaria (46%).

**Personal values of Europeans (by country)**

	Peace	Respect for human life	Human rights	Democracy	Individual freedom	Tolerance	Equality	The Rule of Law	Solidarity, support for others	Self-fulfillment	Respect for other cultures	Religion

**Opinions concerning the values embodied by the European Union are relatively homogeneous throughout the Member States.** In all 25 countries, democracy is one of the three most frequently chosen values. The proportion of citizens regarding it as a European value ranges from 26% in the United Kingdom to 50% in Slovakia.

The proportion of respondents that find **human rights** a value that best represents the European Union ranges from 27% in Spain and Slovenia to 56% in Cyprus. It is one of the three most frequently chosen values in all Member States except Slovenia, where the rule of law (38%) ranks within the top three.

The extent to which respondents link peace as a value of the EU ranges from 19% in the United Kingdom to 51% in Sweden. It is one of the third most frequently mentioned values in 22 of the Member States. The exceptions are the United Kingdom, the Netherlands and Cyprus. The rule of law makes it to the top three in the United Kingdom (23%) and the Netherlands (42%), whereas respect for other cultures is the third most frequently chosen value in Cyprus (35%).

**The values that best represent the European Union (by country)**

- *Balanced views on the extent of values shared between Member States* -

The majority view among EU citizens is that, in terms of shared values, the European Union Member States are *very close* (4%) or *fairly close* (45%) to each other. In contrast, 33% feel that the Member States are *fairly distant* from each other in terms of shared values and 7% feel they are *very distant* from each other. Around one respondent in ten lacks an opinion (11%)<sup>12</sup>.

Question: QA49. In your opinion, in terms of shared values, are European Union Member States...?

**Views about how close the Member States are in terms of shared values differ significantly from country to country.** Slovakia has the highest proportion of citizens finding the Member States close to each other (71%), followed by the Czech Republic (68%). Conversely, in Latvia (66%) and France (60%) we find the highest percentage of respondents who feel that the Member States are distant from each other. The United Kingdom stands out - with one respondent in five finding that the Member States are *very distant* from each other and an equal proportion of respondents lacking an opinion.

In Bulgaria and Romania around 6 out of 10 respondents feel that the shared values of the Member States are close to each other. Similar figures are found in the two candidate countries, but Turkey stands out with 30% of respondents saying that the shared values of the Member States are *very close* to each other.

<sup>12</sup> QA49 In your opinion, in terms of shared values, are European Union Member States very close to each other, fairly close to each other, fairly distant from each other or very distant from each other?

Question: QA49. In your opinion, in terms of shared values, are European Union Member States...?

Answers: Close

Socio-demographically, significant differences are also noted in terms of education and age. The younger people are and the longer they have stayed in full-time education, the more inclined they are to feel that the Member States are close to each other. The feeling that the Member States have common values is most strongly voiced by students (58%).

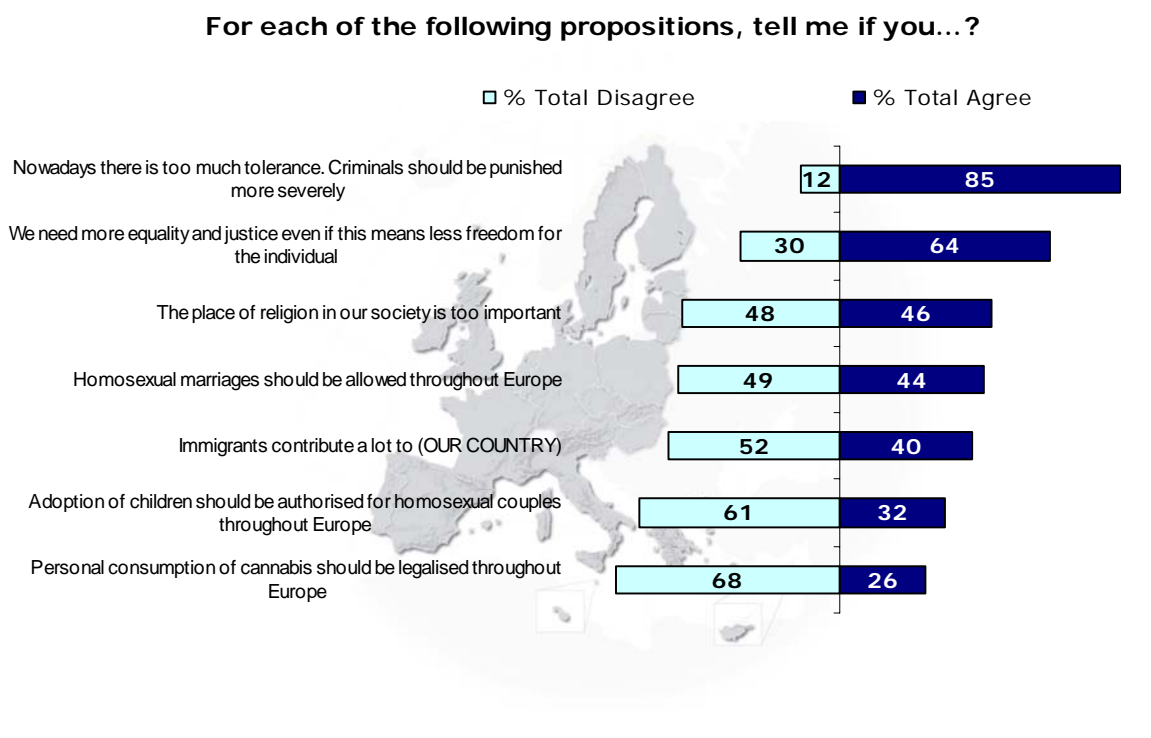

In terms of shared value, European Union Member States are...		Close	Distant
<b>EU average</b>		<b>48%</b>	<b>41%</b>
	<b>Age</b>		
	15-24	55%	34%
	25-39	51%	41%
	40-54	48%	44%
	55 +	43%	42%
	<b>Education (End of)</b>		
	15-	41%	41%
	16-19	47%	43%
	20+	53%	41%
	Still Studying	58%	32%

Furthermore, people's views about the extent to which the Member States have common values are strongly related to how they score on the main indicators of the Eurobarometer. The majority of people with a positive attitude towards the European Union find that the European Union Member States are close to each other in terms of shared values. On the other hand, the majority of people with negative attitudes find that the EU Member States are distant to each other in this regard.

## 2.2. Attitudes towards societal issues

Bearing in mind the values that Europeans cherish most, we now examine European public opinion on various societal issues such as justice, religion, homosexuality, immigration and drugs<sup>13</sup>.

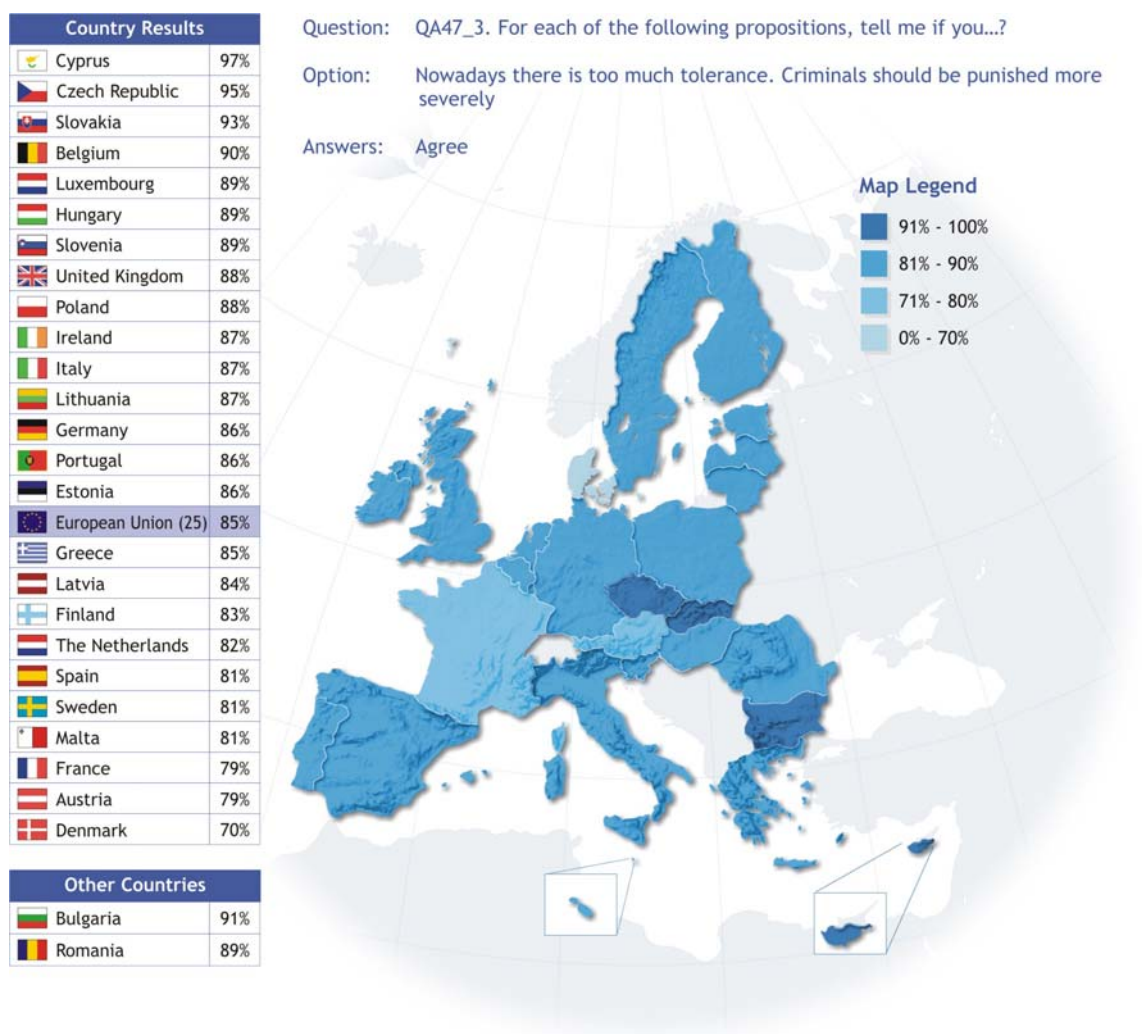

<sup>13</sup> QA47 For each of the following propositions, tell me if you totally agree, tend to agree, tend to disagree or totally disagree with it?

### 2.2.1. Severity of justice

#### - Justice is considered as too tolerant nowadays -

European Union citizens are unequivocally united in their view that criminals need to be punished more severely as there is too much tolerance nowadays (85%). We do not find any national discrepancy on this issue.

This view is not only held by the majority of people who place themselves on the right of the political spectrum (90%), but also by a significant proportion of those who place themselves on the left of this spectrum (78%)<sup>14</sup>. Nevertheless, those who place themselves on the left of the political spectrum are far more likely to disagree with this statement (20%). People who stayed in education until the age of 20 or older also have a higher tendency to disagree (22%) with the suggestion that criminals should be punished more severely.

<sup>14</sup> QD1: In political matters people talk of "the left" and "the right". How would you place your views on this scale? People placing themselves on points 1-3 are categorized as "left", points 4-7 as "centre" and points 8-10 as "right".

---

(7-10) Right	90%	8%	2%

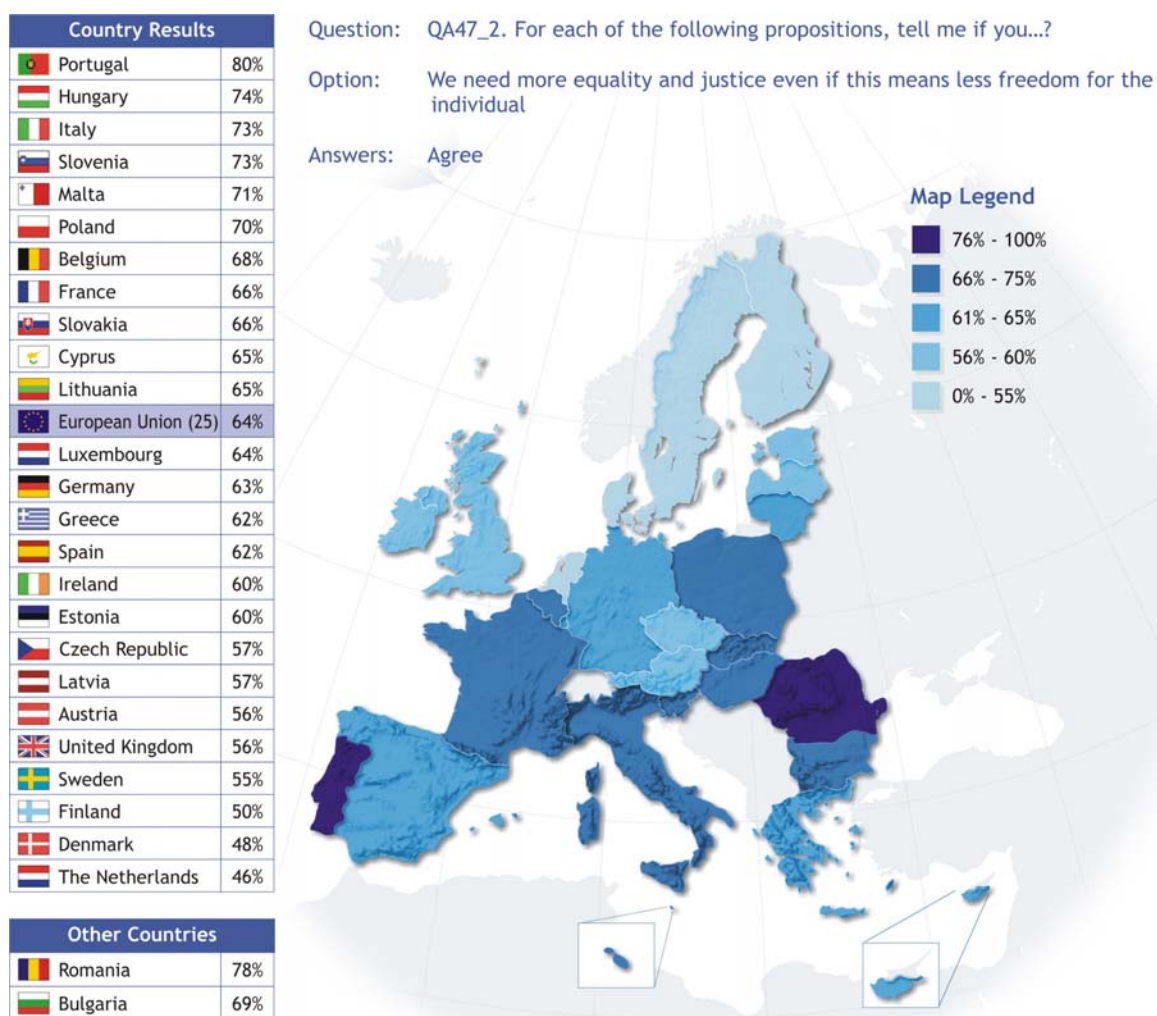

---

### 2.2.2. Equality vs. individual freedom

#### - A call for more equality and justice, even if this means less individual freedom -

Furthermore, citizens want **more equality and justice, even if this means less freedom for the individual**. Nearly two out of three EU citizens agree with this statement (64%). However, the survey reveals considerable differences between the Member States, with levels of agreement ranging from 46% in the Netherlands to 80% in Portugal.

Age and education also influence people's stance on this proposition. The younger people are and the longer they stayed in full-time education, the less inclined they are to agree. However, despite significant differences between the groups, for all groups there is a majority that believes that more equality and justice are needed, even if this means less freedom for the individual. The lowest agreement rate is 55% for students.

#### We need more equality and justice even if this means less freedom for the individual

	Agree	Disagree	DK
<b>EU25</b>	<b>64%</b>	<b>30%</b>	<b>6%</b>

16-19	67%	28%	5%
20+	58%	38%	4%
Still Studying	55%	37%	7%

### 2.2.3. The place of religion in society

#### - Public opinion is divided about the place of religion in society -

**Europeans are divided about the place of religion in society.** On average, 46% of respondents agree with the proposal that it is too important while 48% disagree. A socio-demographic analysis reveals slight differences on the basis of age, education and political views. The main cleavage is, however, at country level, as the survey highlights a **strong degree of heterogeneity among the Member States** in this regard. Support for the proposal that the place of religion in our society is too important ranges from 20% in Estonia to 81% in Cyprus.

Views about the place of religion in society do not differ very strongly depending on people's socio-demographic characteristics. Men are somewhat more likely than women are to agree with the statement that the place of religion in our society is too important. In terms of age, the oldest group is more inclined to disagree than to agree while in terms of education this applies to Europeans who stayed in school until age 20 or older.

<b>The place of religion in our society is too important</b>				
		<b>Agree</b>	<b>Disagree</b>	<b>DK</b>
<b>EU25</b>		<b>46%</b>	<b>48%</b>	<b>7%</b>
<b>Gender</b>				
	Male	49%	45%	6%
	Female	43%	51%	7%

	15-24	47%	44%	8%
	25-39	48%	47%	5%
	40-54	47%	47%	6%
	55 +	42%	51%	7%
<b>Education (End of)</b>				
	15-	46%	46%	8%
	16-19	48%	46%	6%
	20+	42%	54%	4%
	Still Studying	44%	48%	8%

### 2.2.4. Attitudes towards homosexuality

#### - A majority opposed to homosexual marriages and to child adoption by homosexual couples -

The survey also shows that **openness towards homosexuality tends to be quite limited**. On average, only 32% of Europeans feel that homosexual couples should be allowed to adopt children throughout Europe. In fact, in 14 of the 25 Member States less than a quarter of the public accepts adoption by homosexual couples. Public opinion tends to be somewhat more tolerant as regards homosexual marriages: 44% of EU citizens agree that such marriages should be allowed throughout Europe. **It should be noted that some Member States distinguish themselves from the average result by very high acceptance levels:** the Netherlands tops the list with 82% of respondents in favour of homosexual marriages and 69% supporting the idea of adoption by homosexual couples. Opposition is strongest in Greece, Latvia (both 84% and 89%, respectively) and Poland (76% and 89%).

One has to remember that homosexual marriages (or similar union between to persons of the same gender) are allowed in the Netherlands, Belgium, Spain, Sweden and in the UK.

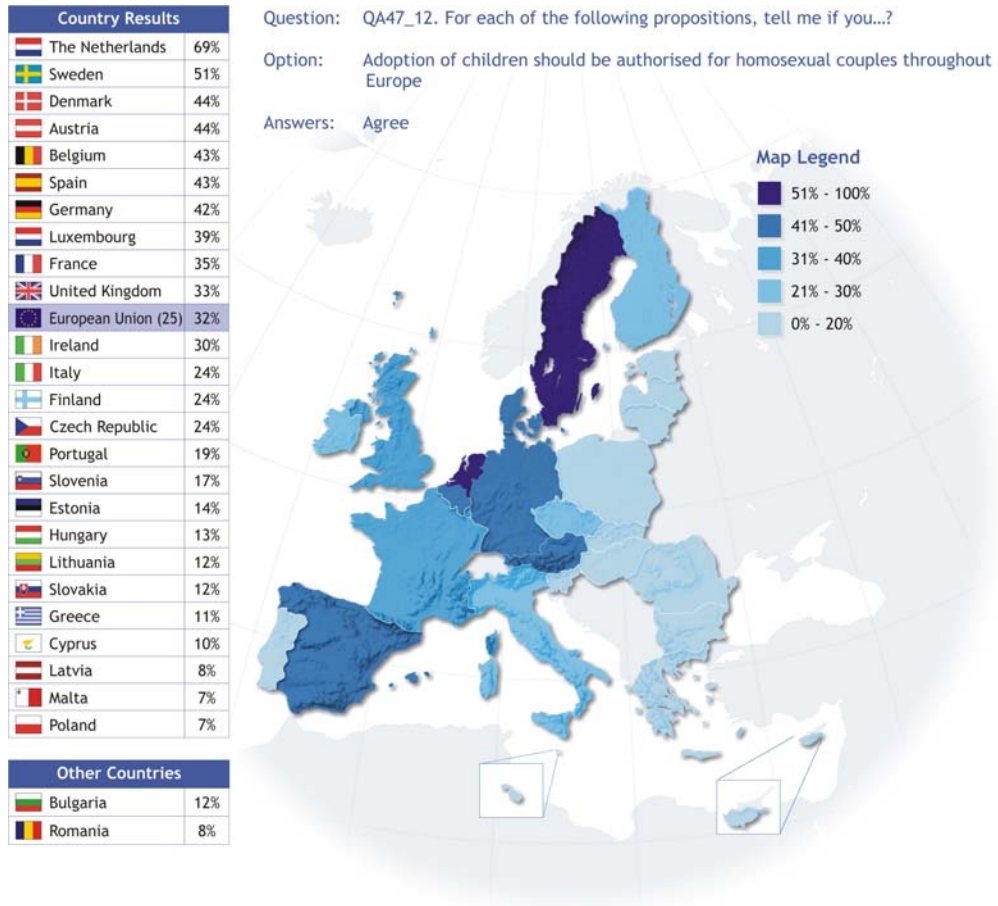

Age is an important factor when it comes to understanding attitudes towards homosexuality. 55% of young Europeans agree that homosexual marriages should be allowed throughout Europe, compared to just 28% of those aged 55 or more. There appears to be a switch of opinion at the age of 55: for all the other age groups, homosexual marriages are accepted by a relative majority of respondents. Apart from age, the two other important factors producing differences in opinion are education and people's political stance.

### Homosexual marriages should be allowed throughout Europe

	Agree	Disagree	DK
<b>EU25</b>	<b>44%</b>	<b>49%</b>	<b>7%</b>
<b>Age</b>			
 15-24	55%	38%	7%
25-39	54%	40%	6%
40-54	47%	46%	7%
55 +	28%	64%	8%
<b>Education (End of)</b>			
 15-	29%	62%	9%
16-19	44%	50%	6%
20+	54%	40%	6%
Still Studying	56%	37%	7%
<b>Left-Right scale</b>			
 (1-4) Left	58%	37%	5%
(5-6) Centre	45%	48%	7%
(7-10) Right	35%	60%	5%

The proposition that homosexual couples should be authorised to adopt children receives extremely different levels of agreement from one country to another: it ranges from 7% in Poland and Malta to 69% in the Netherlands. Sweden is the only other country where (just) more than half supports the view that the adoption of children should be authorised for homosexual couples throughout Europe.

Here as well, the effect of age in determining people's attitudes towards homosexuality is clearly evident: 44% of young Europeans agree compared with 20% of Europeans aged 55 and over. Support further increases in line with the number of years people follow full-time education. People on the left of the political spectrum are far more supportive than are people who place themselves on the right of the political spectrum.

It should be mentioned that if Europeans citizens are divided regarding the acceptance of homosexual marriage, their opinions are more homogenous regarding adoption of children by homosexual couples: when some categories of respondents are in favour of the first (young and well educated respondents, those to the left of the political spectrum), a majority of respondents in all these categories disagree with the adoption of children by homosexual couples.

### 2.2.5. The contribution of immigrants to society

#### - *Balanced views on the extent to which immigrants contribute to their country* -

On average, **4 out of 10 EU citizens feel that immigrants contribute a lot to their country**. However, the majority of citizens do not agree with this statement (52%). The degree to which people agree or disagree has to be balanced by the number of immigrants in each of the countries surveyed. Agreement levels are highest in Sweden (79%), followed by Portugal (66%). Conversely, in Slovakia only 12% agree and 84% disagree. In the Czech Republic (81%) and Latvia (76%), over three in four citizens also disagree that immigrants contribute a lot to their country. Bulgarian and Romanian citizens differ from each other in their views on this issue. In Bulgaria, disagreement is the majority sentiment (52%) while in Romania the majority agrees (43%). What both countries do have in common is a significant minority that lacks an opinion (26% and 30%, respectively).

Socio-demographically, there are significant differences in opinion between men and women, with men more likely to agree than women. Education is also an important factor: the longer people studied the more positive they tend to be on this question. In terms of occupation, there is a large gap between managers and people looking after the home. People who place themselves on the left of the political spectrum are more inclined to agree with the proposal than people who place themselves on the right. There are also differences based on age but these are smaller than for the other socio-demographic characteristics. There are also notable differences according to respondents' place of birth: those who are born outside the country where they were interviewed have more favourable opinions about immigrants' contribution to their countries.

### 2.2.6. Legalisation of cannabis

#### - Clear opposition to the legalisation of cannabis throughout Europe -

The high level of opposition to the idea that personal consumption of cannabis should be legalised throughout Europe provides further evidence that Europeans feel that there is too much tolerance nowadays. Only around a quarter of European Union citizens agree with this statement (26%), while two thirds disagree with it (68%). Moreover, even young Europeans tend to be opposed to the legalisation of cannabis (57% of respondents aged 15 to 24 disagreed with the statement). However, it must be noted that opinions vary from country to country. In Finland (8%) and Sweden (9%) the idea is rejected outright, whereas in the Netherlands, where the personal consumption of cannabis is legal, just under half of the respondents feel that cannabis should be legalised throughout Europe (49%).

Opposition to the legalisation of personal consumption of cannabis is shared by all age groups although it is less pronounced among young respondents.

**Personal consumption of cannabis should be legalised throughout Europe**

40-54	26%	69%	5%
55 +	15%	78%	8%

### 2.2.7. The importance of spare time

#### - Leisure time is also important! -

To finish this chapter on a slightly lighter note, the survey shows that 48% of EU citizens agree that more importance should be given to spare time than to work. Citizens opting for more spare time just narrowly outnumber those who disagree with this statement (45%).

Support for the view that more importance should be given to spare time than to work further varies strongly from one country to the next. Agreement levels in the Member States range from 27% in Germany to 69% in Cyprus. In the two accession countries, work is clearly considered more important than spare time: only 33% in Romania and 34% in Bulgaria agree with the proposition.

Young people are particularly keen on placing more importance on spare time: 59% agree with the proposition, compared with only 35% of people aged 55 and over. A comparison of the various occupational groups identified by the survey shows that students (60%), white-collar employees (59%) and manual workers (56%) are more in favour of more spare time than managers (49%) and self-employed people (48%). People's views also differ depending on the number of years they stayed in full-time education.

### More importance should be given to spare time than to work

### 2.3. Attitudes to the environment

*- Protecting the environment should be a priority -*

Concerns about environmental issues seem on the rise in the European Union<sup>15</sup>. On average, almost 3 out of 4 respondents believe that protecting the environment should be a priority for their country even if it affects economic growth (73%). Asked in another way, this result seems to be confirmed. Indeed, only 40% of EU citizens feel that economic growth should be a priority for their country even if it affects the environment. This remarkable but clear result was obtained via a randomly split ballot on the two opposing proposals<sup>16</sup>.

<sup>15</sup> QA47\_6 & 7 For each of the following propositions, tell me if you...?

<sup>16</sup> Half of the surveyed sample was asked the first dimension and half of it the other one.

In the former EU15 countries, the preference for protecting the environment at the expense of economic growth is more clear-cut than in the ten new Member States. Furthermore, compared to Autumn 2003, when the split ballot was fielded in the former EU15 countries the preference for protecting the environment at the expense of economic growth was slightly less pronounced (70% vs. 73%). In Denmark, this preference is most striking with a 65-percentage point difference in the percentages of respondents agreeing with the two opposing statements.

### 2.4. State interventionism and free competition

**- A majority of European citizens prefer a non-interventionist free-market approach -**

Over 6 out of 10 respondents agree that **free competition is the best guarantee of economic prosperity** (64%) and that **the state intervenes too much in their lives** (62%)<sup>17</sup>.

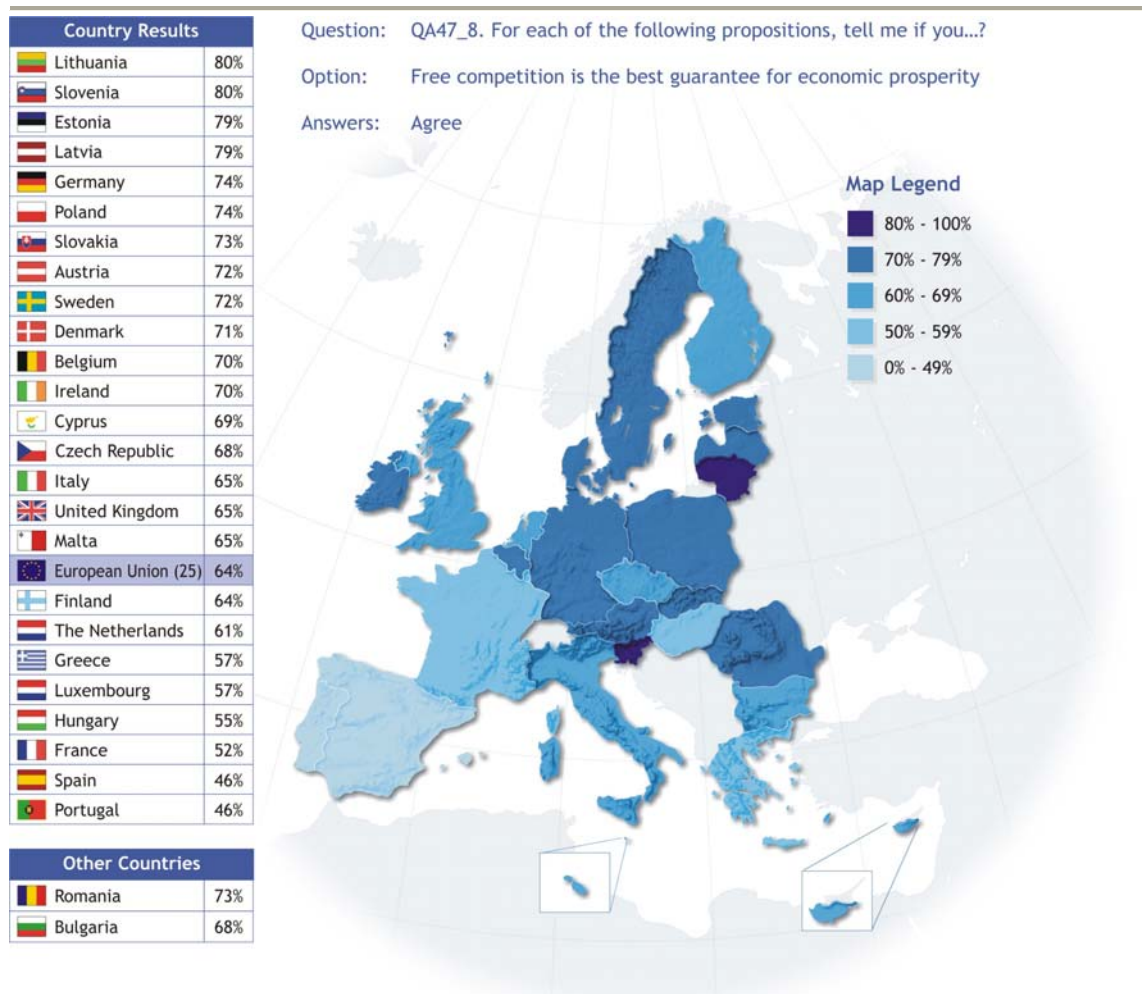

Although people to the right of the political spectrum are even more likely to agree, those to the left of the political spectrum also broadly support a non-interventionist, free-market approach. 73% and 67% respectively of people on the *right* of the political spectrum agree that free competition is the best guarantee of economic prosperity and that the state intervenes too much in their lives. For those on the *left* of the political spectrum the corresponding figures are 61% and 59%, respectively.

% TOTAL AGREEING WITH THE FOLLOWING PROPOSITIONS...	BY LEFT-RIGHT SCALE		
	Left (1-4)	Centre (5-6)	Right (7-10)
Free competition is the best guarantee for economic prosperity	61%	67%	73%
The state intervenes too much in our lives	59%	64%	67%

<sup>17</sup> QA47 For each of the following propositions, tell me if you totally agree, tend to agree, tend to disagree or totally disagree with it?

### 2.4.1. Free competition

Free competition is particularly popular in the new Member States. On average, 71% of respondents in the NMS10 countries support the view that free competition is the best guarantee for economic prosperity, compared to 62% in the former EU15 countries. At the country level, support ranges from 46% in Spain and Portugal to 80% in Lithuania and Slovenia. Spain stands out because of the high proportion of “don’t know” responses (32%).

Socio-demographically, differences between the various sub-groups are largely caused by variations in the percentage of “don’t know” responses. Nonetheless, significant differences are noted between the youngest and the oldest respondents with the latter more likely to agree and between respondents who left school aged 15 or younger and those who stayed in school longer.

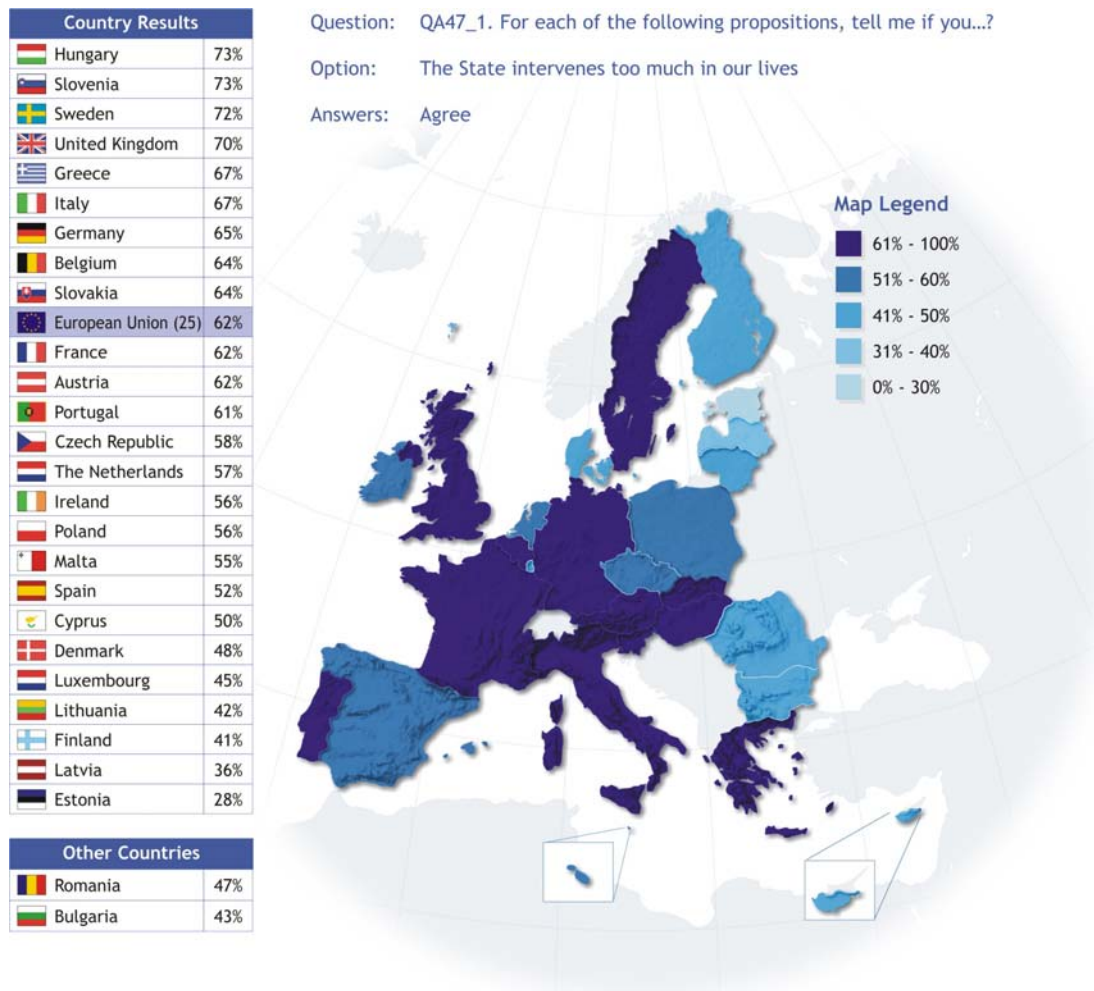

### Free competition is the best guarantee for economic prosperity

	% agree	% disagree	DK
<b>EU25</b>	<b>64%</b>	<b>24%</b>	<b>12%</b>

Retired	64%	21%	15%
Students	63%	23%	15%

### 2.4.2 State interventionism

When it comes to public opinion about state intervention, support is more widespread in the former EU15 countries than it is in the NMS10 countries (63% vs. 58%). However, there is a lot of variation in opinions between the countries concerning the role of the State. The view that the State intervenes too much is most widely held in Hungary and Slovenia (both 73%) and least widely held in Estonia (28%).

In terms of socio-demographic characteristics, differences are noted primarily on the basis of occupation: self-employed people are far more likely to feel that the State intervenes too much than the other occupational groups are. Interestingly, managers are more likely to disagree with this statement (39%). There are also differences in terms of education, with those who stayed in school until age 16 to 19 are most likely to agree.

---

**The State intervenes too much in our lives**

## 2.5. Domestic affairs and politics

### - Political participation important coupled with widespread interest in domestic affairs -

**81% of respondents believe that citizens should participate more actively in politics<sup>18</sup>.** Only 13% of respondents disagree with this proposition. **Furthermore, there is a high degree of interest in domestic affairs<sup>19</sup>.** Close to 6 out of 10 respondents (58%) claim to be interested in domestic affairs. It is interesting to analyse the difference between the interest in domestic affairs and that in European affairs: this will be mentioned briefly here, but analysed in further detail in part III of this report.

QA47.4 For each of the following propositions, tell me if you ...?

<sup>18</sup> QA47.4 For each of the following propositions, tell me if you...?

<sup>19</sup> QA52.1 Would you say that you are very interested, fairly interested, not very interested or not at all interested in domestic affairs?

### 2.5.1. Political participation

Support for more active political participation is widespread throughout the European Union and particularly strong in Greece (93%) and Sweden (90%). At 69%, support is lowest in Poland.

The view that citizens should participate more actively in politics is also widely supported in Bulgaria (81%) and Romania (77%). This is also the case in the two candidate countries, where more than 8 out of 10 people feel that citizens should participate more actively.

Clearly then, public opinion is very homogeneous and high levels of support for more active political participation are recorded for all the socio-demographic subgroups. The strongest agreement to this statement can be observed among respondents who had left full time-education at the age of 20 or older or among managers.

## 2.5.2. Interest in domestic affairs

**The degree of interest in domestic affairs varies quite significantly across the European Union.** The highest interest levels are noted in Finland (92%), followed by Greece (83%), Poland (82%) and Denmark (81%). Interest in domestic affairs is least widespread in Spain (30%).

Citizens in Bulgaria are more widely interested in domestic affairs than their Romanian counterparts are (65% vs. 47%). The contrast between Croatia and Turkey is even more pronounced (82% vs. 44%).

To a degree, a relationship is apparent between interest in domestic affairs and interest in European affairs. Finland not only has the highest levels of interest in domestic affairs; it also comes first in terms of European affairs. Conversely, interest levels are lowest on both accounts in Spain<sup>20</sup>.

**Very clear differences further exist between the various socio-demographic groups.** Men are significantly more likely than women are to feel interested in domestic affairs (65% vs. 52%). Young people are less interested than their older fellow citizens, with interest levels being the highest among people aged 40 to 54 (63%). Education strongly influences the levels of interest: only 44% of people who completed their full-time education aged 15 or younger claim to be interested in domestic affairs, compared to 74% of Europeans who stayed in full-time education until the age of 20 or older. In terms of occupation, managers are most inclined to feel interested (79%), while levels of interest are lowest among people who look after the home (41%)<sup>21</sup>.

		Domestic affairs		
		Interested	Not interested	DK
<b>EU25</b>		<b>58%</b>	<b>41%</b>	<b>1%</b>
<b>Sex</b>				
	Male	65%	34%	1%

	Students	53%	44%	3%

<sup>20</sup> See Part III, Section 1 for the full country results for the question about interest in European affairs.

<sup>21</sup> Similar patterns are found for levels of interest in European affairs, although overall interest levels in are higher for domestic affairs. See Part III, Section 1 for more information.

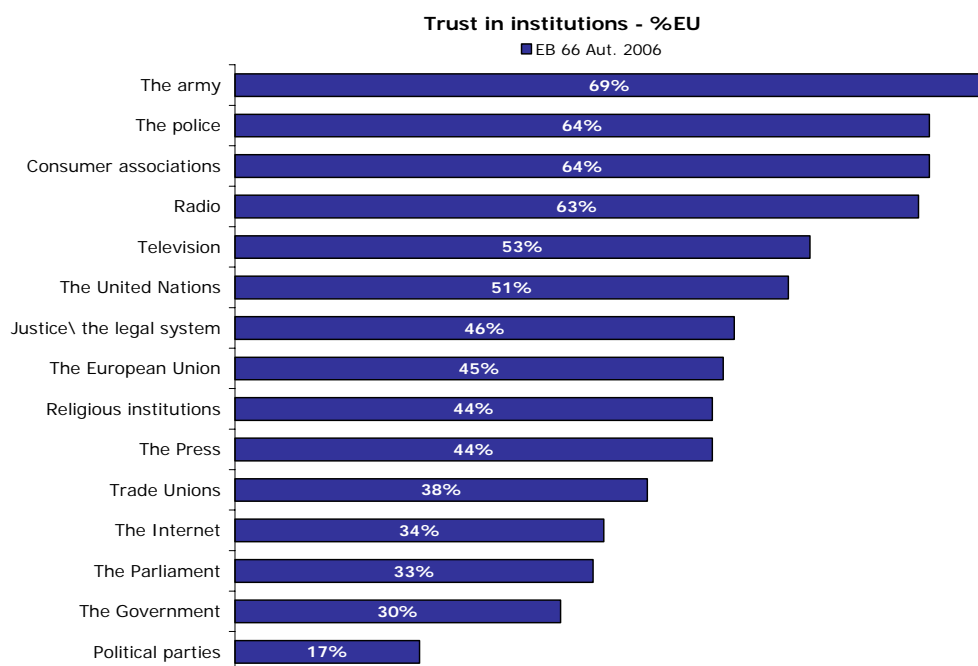

## 2.6. Trust in institutions and organisations

### *- Trust is broadest in those organisations responsible for protecting and informing citizens -*

Of the 15 institutions and organisations covered in the questionnaire, the **army** is most widely trusted by European citizens (69%, +1 point compared with autumn 2005), followed by **consumer associations** (64%) and the **police** (64%, -1 points). **The radio** (63%, +2 points) is in fourth position, making it the most widely trusted form of media. A large number of respondents were unable to give a judgement about the Internet (30%)<sup>22</sup>, certainly because this medium does not refer to one specific institution, easily identifiable.

As noted in earlier surveys, citizens have slightly more trust in **the United Nations** than in the **European Union**: 51% of respondents tend to trust the former compared with 45% for the latter. Moreover, for both international organisations, the level of trust has gone down by 3 points since spring 2006<sup>23</sup>.

At the same time, the public is more likely to trust the European Union than it is to trust the national political institutions. On average, only 33% of EU citizens trust their **national parliaments** and 30% trust their **government**. Political parties continue, on average, to inspire the trust of only 17% of European citizens.

<sup>22</sup> QA6. I would like to ask you a question about how much trust you have in certain institutions. For each of the following institutions, please tell me if you tend to trust it or tend not to trust it? The item about the Internet is new; many respondents lack an opinion about the trustworthiness of this information source (30%).

<sup>23</sup> Trust in the European Union is analysed in depth in part II of this report.

A comparison between the results obtained in the ten new Member States and the former EU15 shows that, on average, trust in national institutions and organisations tends to be stronger in the old Member States. The opposite holds when it comes to international organisations, particularly in the case of the European Union.

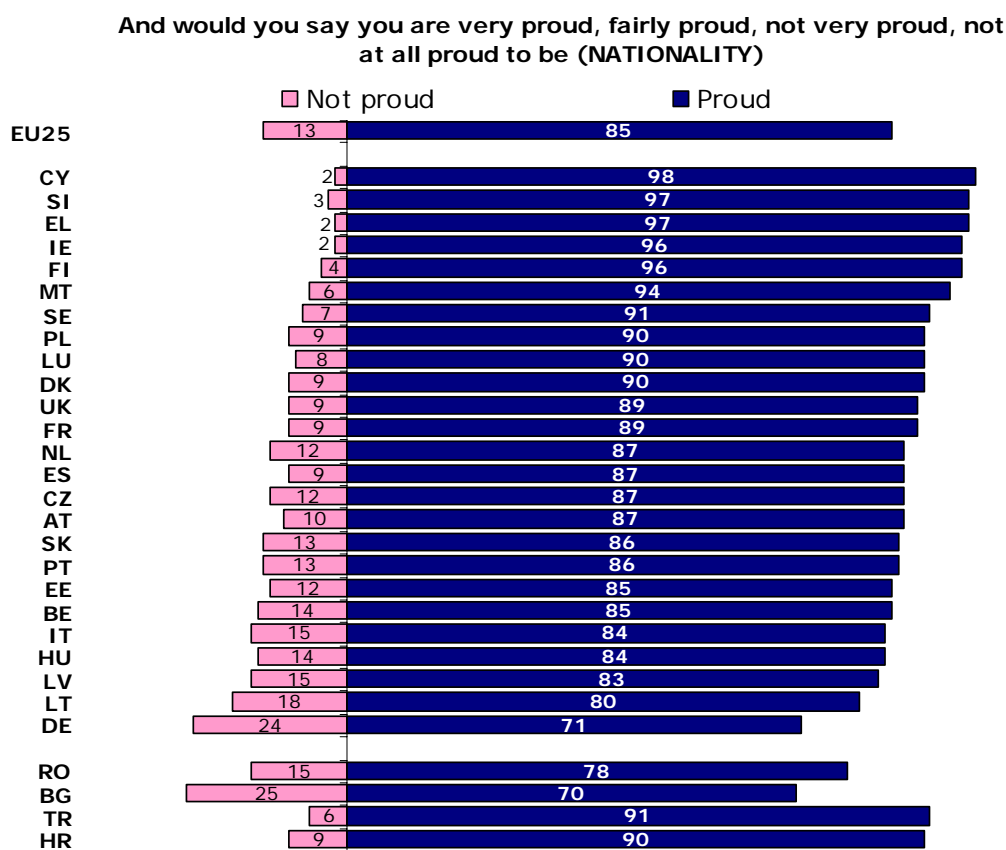

<b>% Tend to trust</b>	<b>EU15</b>	<b>NMS</b>	<b>Difference</b>
The police	67%	49%	+18
Parliament	36%	19%	+17
Consumer Associations	67%	51%	+16
Justice	48%	34%	+14
Trade unions	40%	30%	+10
Government	32%	22%	+10
Political parties	19%	10%	+9
The army	70%	65%	+5
Radio	63%	63%	=
Religious institutions	44%	46%	-2
Press	44%	47%	-3
The Internet	34%	37%	-3
Television	52%	58%	-6
The United Nations	50%	58%	-8
The European Union	42%	59%	-17

## 2.7. National pride

### - Strong national pride -

National pride is widespread throughout the European Union<sup>24</sup>. With the exception of Germany, where the notion of 'national pride' still remains sensitive more than sixty years after the end of World War II more than three out of four respondents are proud to be citizens of their country.

In the accession and candidate countries, there is also a broad sense of national pride except for Bulgaria, where a quarter of respondents indicate that they are not proud to be a citizen of their country.

<sup>24</sup> QA31 And would you say you are very proud, fairly proud, not very proud, not at all proud to be (NATIONALITY)?

## II. THE EU AND GLOBALISATION

In this section, results of questions are analysed according to the following issues:

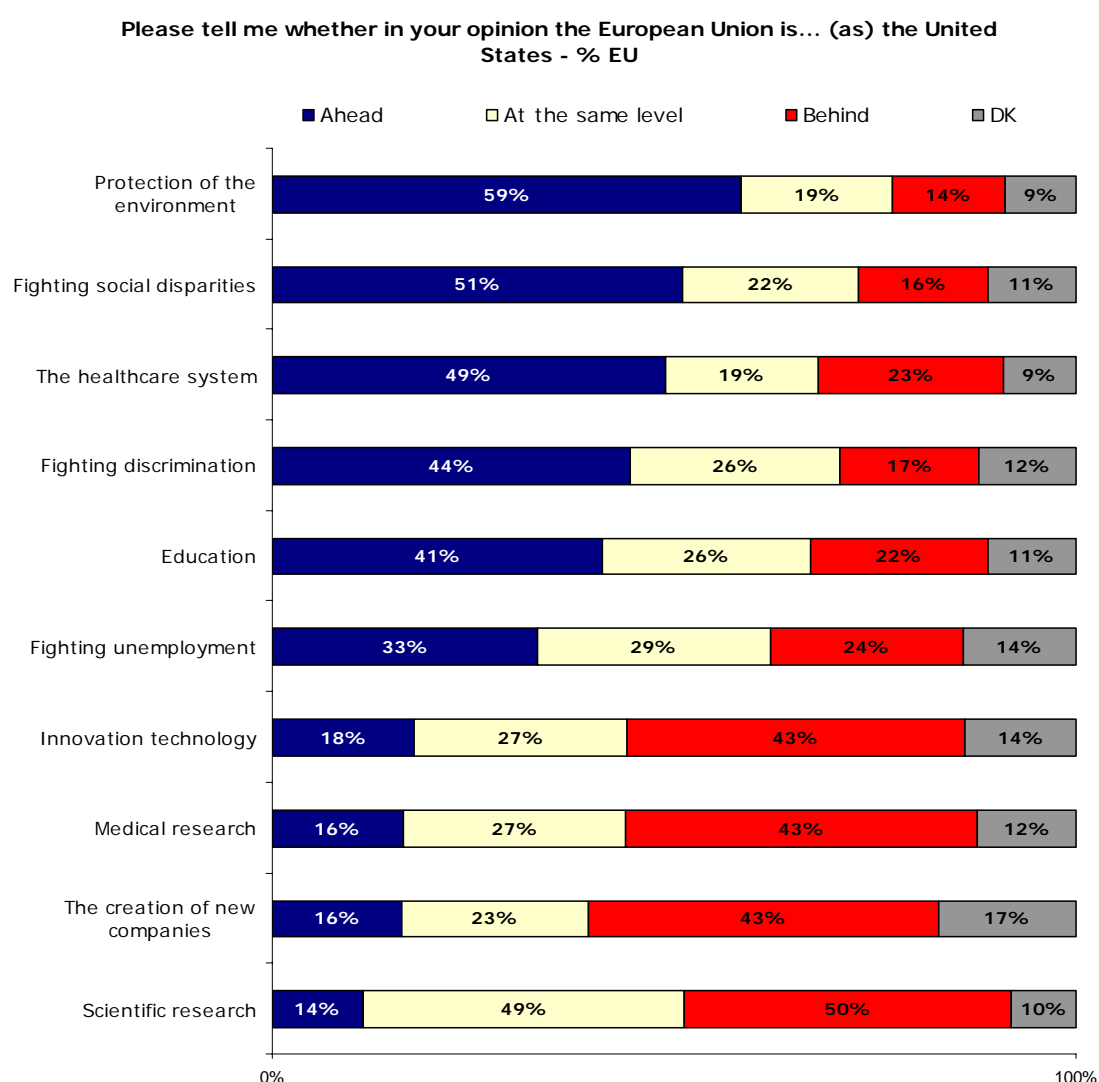

1. **The performance of the European Union**: The comparison between the European Union vis-à-vis the United States in certain areas, priorities to improve the performance of the European economy;
2. **The Single Market**: Public opinion about the effect of the Single Market, the public's assessment of the international competitiveness of companies and the perceived benefits of European Union achievements.
3. **Globalisation**: is globalisation an opportunity or a threat; does it have positive or negative consequences and how do citizens judge the role of the European Union in terms of its effects?

## 1. The performance of the European Union

### 1.1. Comparison between the EU and the US

*- Social issues seem better handled in Europe whilst the US does better in research and development -*

The EU is considered by EU citizens to be ahead of the US in protecting the environment, fighting social disparities, healthcare, fighting discrimination, education and fighting unemployment. Americans are seen to be better placed than Europeans when it comes to science, technology and the creation of new companies<sup>25</sup>.

<sup>25</sup> QA39. For each of the following, please tell me whether in your opinion the European Union is ahead, behind or at the same level as the United States?

Evolutions since spring 2006 are not striking. Nearly six out of ten respondents regard the European Union as being ahead of the United States in terms of protecting of the environment (59%, no change since spring 2006). Around half of the interviewees find that the European Union is ahead of the United States when it comes to fighting social disparities (51%, -2 points) and the healthcare system (49%, -2 points). As far as fighting discrimination is concerned, 44% of citizens believe the European Union is ahead of the United States (-3 points). For education the figure is 41% (-1 point) and, as regards the fight against unemployment, 33% feel the EU is ahead of the US (+1 point).

The average figures for the 25 EU countries conceal large differences in opinion between the 15 old Member States and the 10 new ones. People in the former EU15 tend to rate the position of the European Union vis-à-vis the United States more positively than people in the ten new Member States.

The difference is particularly large with regard to the healthcare system (with a 30-points difference between the EU15 and NMS10). Education is the only area where people in the NMS and EU 15 have the same opinion.

<i>% « the European Union is ahead of the United States regarding....»</i>	Perception of the European situation compared to the US situation		
	EU25	EU15	NMS
Protection of the environment	59%	62%	42%
Fighting social disparities	51%	55%	32%
The healthcare system	49%	54%	24%
Fighting discrimination	44%	48%	28%
Education	41%	41%	41%
Fighting unemployment	33%	35%	22%
Innovation technology	18%	19%	15%
Medical research	17%	18%	15%
The creation of companies	16%	16%	16%
Scientific research	14%	14%	13%

The analysis then looks at the issues where the European Union is seen to be lagging behind the United States. Close to half of the respondents find that the United States does better in scientific research (49%, -1 point). According to 45% of the interviewees, the EU lags behind the US in medical research (-1 point); 43% of the respondents share this same view regarding innovation technology and the creation of companies (both no change).

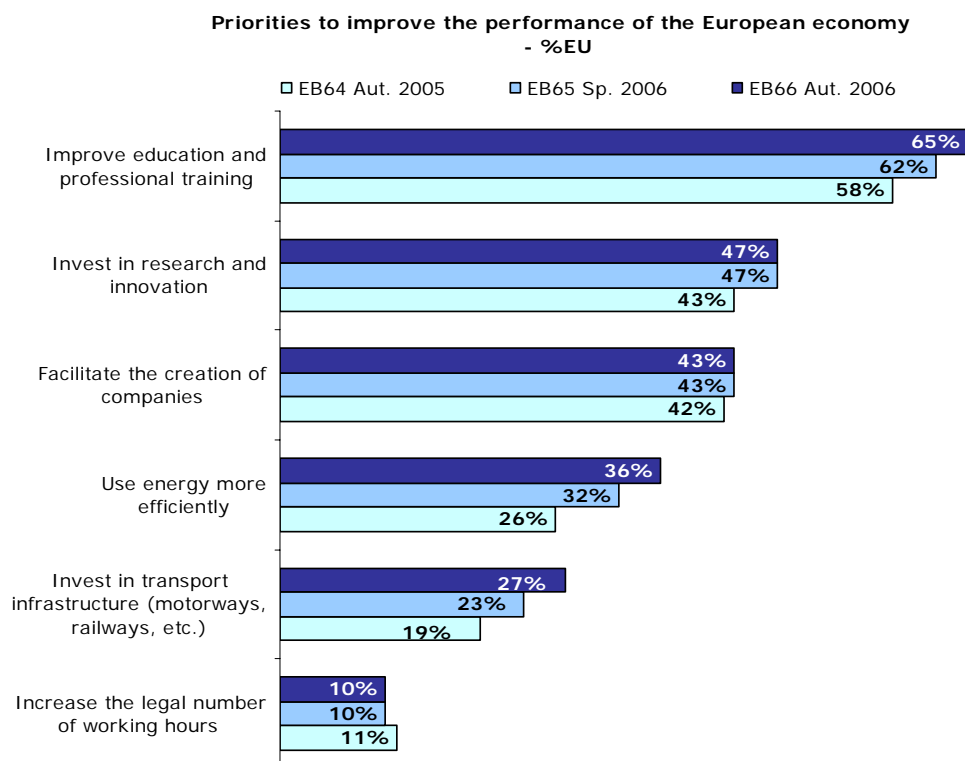

## 1.2. Priorities to improve the European Union's economic performance

### - Europeans want a knowledge-based economy -

Public opinion in Europe consider, more than ever, that the improvement of the European economy is closely linked to education and training.

**Improving education and vocational training** (65%, +3 points since spring 2006) remains the top priority of citizens. For close to half of European citizens, **investing in research and innovation** (47%, no change) and **facilitating the creation of companies** (43%, no change) are priority actions to improve the performance of the European Union's economy.

An increasing number of citizens want to prioritise the **more efficient use of energy** as a means of improving the European economy (36%, +4 points). The view that Europe should invest in **transport infrastructure** also continues to increase in popularity (27%, +3 points). Only one citizen in ten regards **increasing the legal number of working hours** as a priority (10%, no change)<sup>26</sup>.

<sup>26</sup> QA46. Which of the following statements would you prioritise to improve the performance of the European economy? (Maximum 3 answers possible)

The following major conclusions can be drawn from the analyses of the national results:

- ◆ In all EU Member States, **improving education and professional training** is the most popular action. In the former EU15 countries it is slightly more popular than in the NMS10 countries (66% vs. 58%). The extent to which the public sees it as a priority varies from 54% in Spain and Poland to 81% in Denmark.
- ◆ The extent to which citizens believe **investing in research and innovation** should be a priority to improve the European economy ranges from 32% in Ireland, Latvia and Hungary to 68% in Denmark. In ten Member States it is the second most popular action.
- ◆ The proportion of citizens who regard **facilitating the creation of companies** as a priority ranges from 12% in the United Kingdom to 61% in France. In nine Member States it is the second most popular action.
- ◆ In a growing number of Member States, people view **using energy more efficiently** as a priority. It is now the second most popular action in five countries and in the United Kingdom (56%), Cyprus (54%) and Denmark (51%) more than half of the public views it as a priority. Poland (17%) and Latvia (18%) are the only Member States where less than one-fifth of the citizens regard using energy more effectively as a priority to improve the European economy. This issue is more important for Bulgarian citizens (42%) than for those in Romania (18%).
- ◆ Slovakia is the only Member State where more than half of the respondents named **investing in transport infrastructure** (59%) making it the second most popular action there. On the whole, citizens in the NMS10 countries are more inclined to regard investing in transport infrastructure as a priority than the citizens in the former EU15 countries are (38% vs. 24%). Results in Bulgaria (39%) and Romania (35%) are on a par with the NMS10 countries.
- ◆ People in France and Portugal continue to attach higher than average importance to the idea of improving the performance of the European economy by **increasing the length of the working week** (both 24%).
- ◆ **Improving education and professional training** is the most popular action in Bulgaria (57%) and in Romania (56%). In Bulgaria, **investing in research and innovation** comes in second place (44%) whereas **facilitating the creation of new companies** is the second most popular action in Romania (51%), and is cited by a much lower proportion in Bulgaria (19%).
- ◆ Lastly, in the candidate countries, **improving education and professional training** is also seen as the main priority (58% in Croatia and 51% in Turkey). It should be noted that in Turkey the proportion of people without an opinion is very high (32% vs. EU average of 6%).

## 2. The Single Market

### 2.1. Public perception of the Single Market

*- Increased competition is positively perceived -*

**A majority of citizens throughout the European Union see the effects of the Single Market in a positive light.** According to over 6 out of 10 respondents the increased competition brought about by the single market has a positive effect (61%, +3 points). Conversely, only 18% of respondents say that this increased competition has a negative effect and one respondent in ten takes a neutral position (10%, -2 points) or lacks an opinion (11%, -1 point)<sup>27</sup>.

Question: QA40. The single market increased competition in a number of domains such as transport, telecommunication services, banking and insurance services. In general, would you say that this has a ... effect?

<sup>27</sup> QA40. The single market has increased competition in a number of domains such as transport, telecommunication services, banking and insurance services. In general would you say that this has... effect?

Overall, citizens in the ten new Member States judge the effect of the Single Market noticeably more positively than citizens in the former EU15 do (74% vs. 58%). Respondents in Poland (81%), Slovenia (80%) and Denmark (78%) responded most positively. In France (49%) and Hungary (53%), respondents appear to be least positive.

In Bulgaria and Romania, very few respondents see the effects of the Single Market in a negative light (only 5% in Bulgaria and 6% in Romania). It should also be noted that the proportion of citizens lacking an opinion in these two countries (27% and 20%, respectively) is higher than it is in the current Member States. The highest level of "don't know" responses (41%) and the lowest level of positive responses (45%) are found in Turkey.

Among all the socio-demographic groups identified in the survey, the majority view is that increased competition brought about by the single market has a positive effect. However, in this data, there are differences of opinion. Younger people, those who stayed longer in full-time education, students, self-employed and managers are more positive in their response. The level of "don't know" responses is above average for respondents that look after the home (19%), respondents who left full-time education aged 15 or younger (18%) and older respondents (15%).

### The single market has increased competition in a number of domains

	Positive	Negative	Don't know
<b>EU25</b>	<b>61%</b>	<b>18%</b>	<b>11%</b>
<b>Age</b>			
 15-24	69%	13%	11%
25-39	65%	17%	8%
40-54	61%	20%	9%
55 +	54%	20%	15%
<b>Education (End of)</b>			
 15-	48%	20%	18%
16-19	61%	19%	9%
20+	72%	16%	5%
Still Studying	70%	12%	11%
<b>Respondent occupation scale</b>			
 Self-employed	68%	17%	7%
Managers	72%	17%	5%
White collars	65%	17%	8%
Manual workers	60%	20%	10%
House persons	54%	15%	19%
Unemployed	60%	19%	10%
Retired	53%	21%	14%
Students	70%	12%	11%

As might be expected, people's attitudes to the European Union in general closely correlate to how they perceive the Single Market. The more positive an image people have of the EU, the more likely they are to view positively the increased competition brought about by the single market.

<i>The single market has increased competition in a number of domains</i>	Positive	Negative
	<b>EU25</b>	<b>61%</b>
<b>Image of the EU</b>		
Positive	76%	11%
Neutral	55%	18%
Negative	39%	36%
<b>EU membership</b>		
Good thing	73%	12%
Neither good nor bad	51%	22%
Bad thing	45%	33%

## 2.2. The effect of the Single Market on the competitiveness of companies

*- ... and due to the Single Market the international competitiveness of companies is now better -*

A relative majority of EU citizens is of the view that due to the Single Market the international competitiveness of companies is now better than it was 10 years ago (42%). Just under a quarter of EU citizens hold the opposite view (24%). Around one respondent in five believes that the situation is the same (21%) and around one respondent in eight lacks an opinion (13%)<sup>28</sup>.

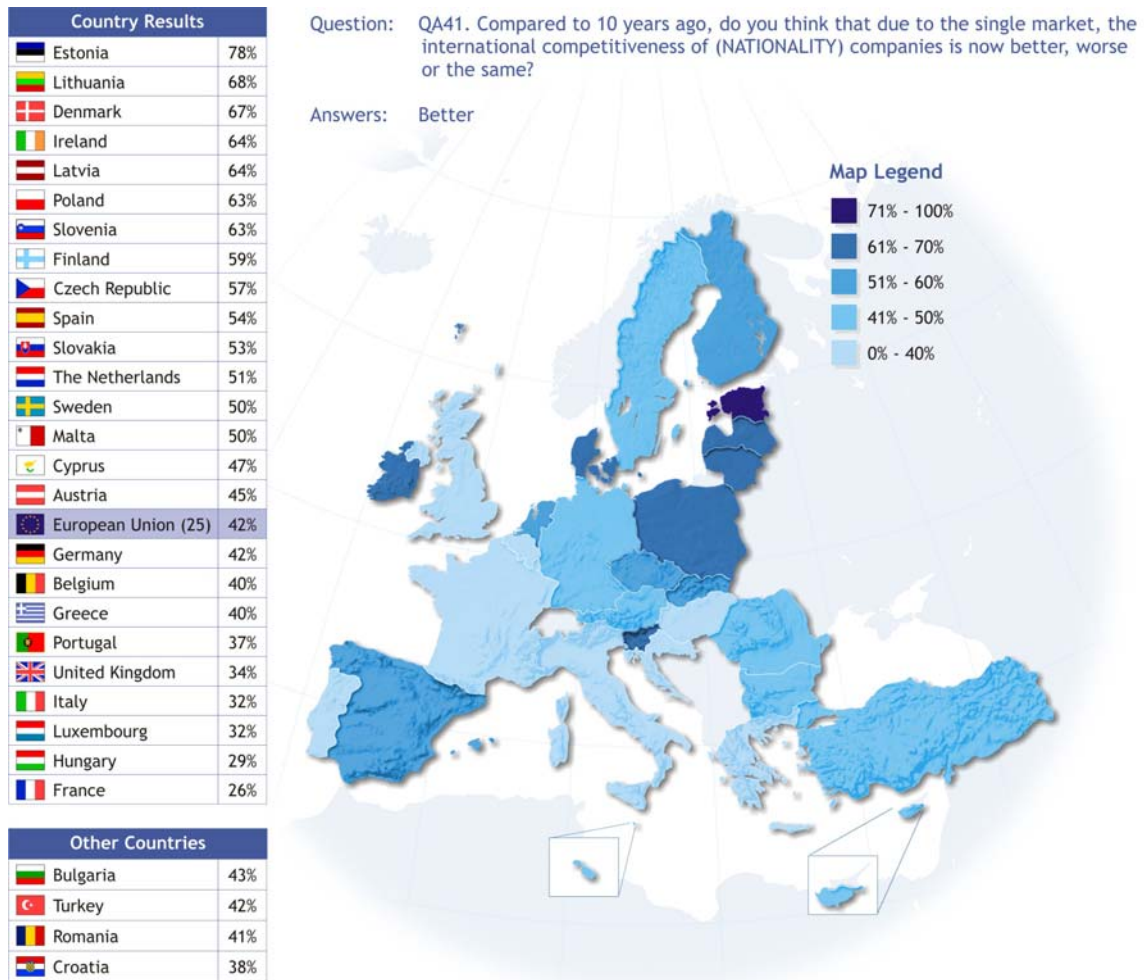

Question: QA41. Compared to 10 years ago, do you think that due to the single market, the international competitiveness of (NATIONALITY) companies is now better, worse or the same?

Overall, more citizens (57%) in the new Member States are likely to feel that the international competitiveness of European companies has improved than citizens in the 'old' Member States (40%). This view is particularly widespread in Estonia (78%) and it is also the majority view in the other new Member States. Hungary is the sole exception, as, here, the majority view is that companies now do worse (42%). The most positive attitudes among the EU15 countries are observed in Denmark (67%) and Ireland (64%). Conversely, in Italy (37%), Luxembourg (35%) and France (31%), the prevailing tendency is to feel that the situation of companies is now worse than it was 10 year ago.

<sup>28</sup> QA41. Compared to 10 years ago, do you think that due to the Single Market, the international competitiveness of (NATIONALITY) companies is now better, worse or the same?

Around 2 out of 5 respondents in Bulgaria (43%), Turkey (42%), Romania (41%) and Croatia (38%) consider that the Single Market has improved the competitiveness of companies in these countries.

Socio-demographically speaking, the majority view among all the groups is that the international competitiveness of companies is now better than it was ten years ago. Again, there are differences in the intensity of this opinion. The longer people stayed in full-time education and the more they feel they know about the European Union, the more they feel that this competitiveness has improved. There are also differences among the various occupational groups and depending on the size of people's locality.

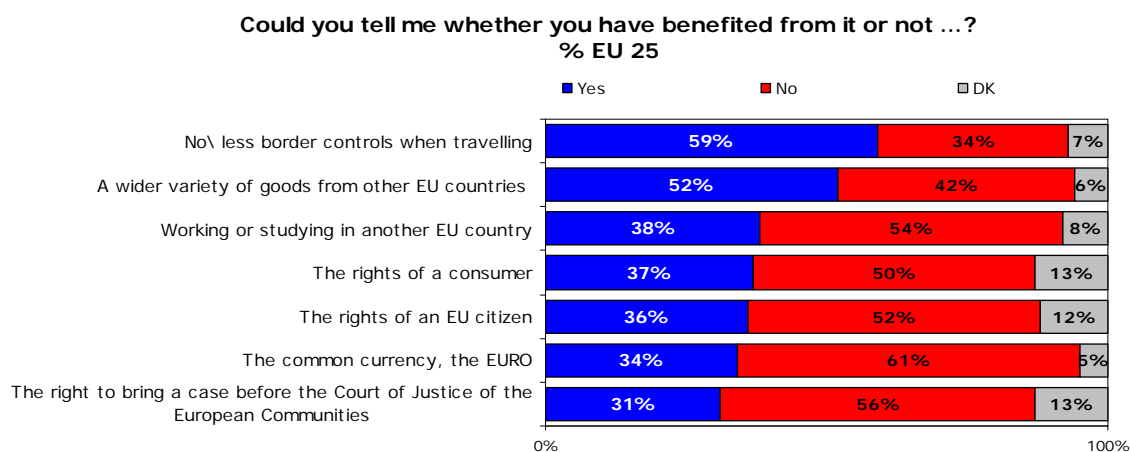

**Compared to 10 years ago, do you think that due to the single market, the international competitiveness of (NATIONALITY) companies is now better, worse or the same?**

	Better	Worse	The same	DK
<b>EU25</b>	<b>42%</b>	<b>24%</b>	<b>21%</b>	<b>13%</b>

4-7	49%	22%	21%	8%
8-10	53%	21%	19%	7%

### 2.3. Benefiting from the achievements of the European Union

*- Removal of border controls and a wider variety of goods are the chief benefits of the EU -*

A majority of EU citizens find that one of the benefits of the EU is that there are now fewer or no border controls when they are travelling (59%). Another achievement of the European Union that is generally appreciated is the availability of **a wider variety of goods from other EU countries**: 52% of EU citizens feel they have benefited from this. Other achievements of the European Union are less positively perceived<sup>29</sup>.

<sup>29</sup> QA42. For each of the following achievements of the European Union, could you tell me whether you have benefited from it or not?

## Main achievement: no or less border controls when travelling

The feeling that people have benefited from fewer or no border controls when travelling is generally more widely perceived in the new Member States than in the EU15 countries (67% vs. 57%). In all Member States, except Hungary (35%) and the United Kingdom (41%), the majority of citizens feel they have benefited from this achievement, with Slovakia (79%) and the Netherlands (78%) ranking first.

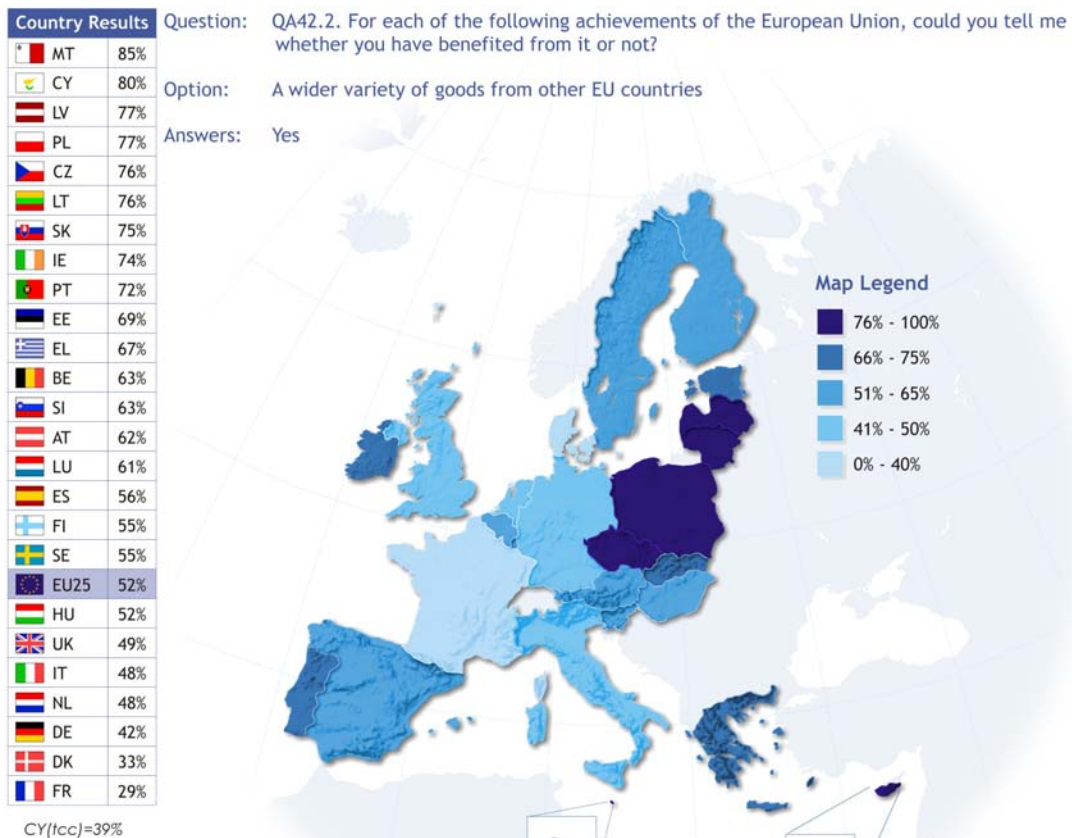

At a socio-demographic level, this is the majority view among all groups with the exception of people who left full-time education aged 16 or younger where views are divided. Among managers (78%) and people who left full-time education aged 20 or older (75%), this view is most widely held. People's self-perceived knowledge of the European Union also strongly determines whether they feel they have benefited from this achievement: 74% of EU citizens who feel they know a lot about the European Union feel they have benefited from no or less border controls when travelling, as against 47% who feel they know very little.

### No/ less border controls when travelling

	Yes, has benefited	No, has not benefited	DK
<b>EU25</b>	<b>59%</b>	<b>34%</b>	<b>7%</b>
<b>Sex</b>			
 Male	64%	31%	6%
Female	54%	38%	8%
<b>Age</b>			
 15-24	60%	32%	8%
25-39	64%	31%	5%
40-54	62%	33%	5%
55 +	51%	39%	10%
<b>Education (End of)</b>			
 15-	43%	45%	12%
16-19	58%	37%	6%
20+	75%	22%	4%
Still Studying	67%	27%	6%
<b>Respondent occupation scale</b>			
 Self-employed	67%	27%	5%
Managers	78%	19%	3%
White collars	65%	31%	4%
Manual workers	59%	35%	6%
House persons	44%	44%	12%
Unemployed	53%	40%	8%
Retired	49%	42%	10%
Students	67%	27%	6%
<b>EU Knowledge</b>			
 1-3	47%	42%	11%
4-7	67%	29%	4%
8-10	74%	23%	3%

### Second main achievement: a wider variety of goods from other EU countries

The feeling that people have benefited from this achievement is, on average, significantly more widely held in the new Member States than in the former EU15 countries (73% vs. 47%). It is a feeling that at least three out of four citizens in the new Member States hold, except in Hungary (52%), Slovenia (63%) and Estonia (69%). Conversely, in the 'old' Member States, agreement ranges from 29% in France to 74% in Ireland.

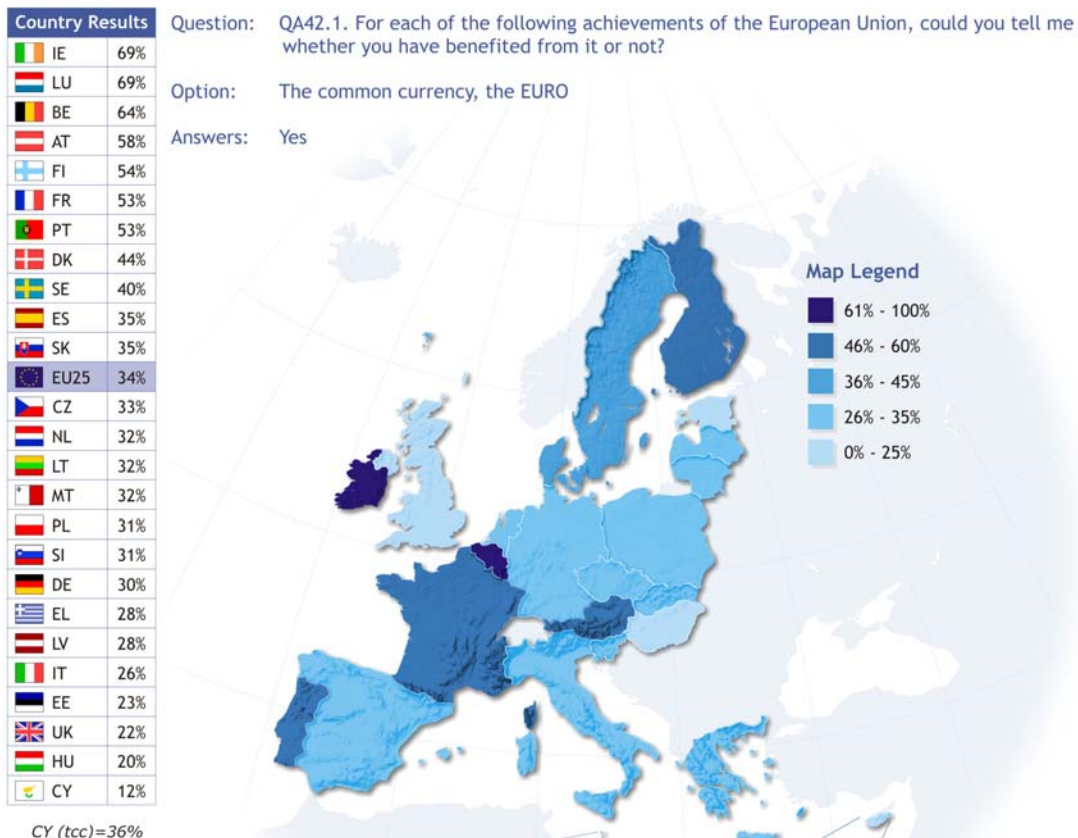

The younger people are, the longer they stayed in full-time education and the more they feel they know about the European Union, the more likely they are to say that they have benefited from a wider variety of goods from other EU countries. These three factors are the most important determinants of how people think in this respect.

### A wider variety of goods from other EU countries

	Yes, has benefited	No, has not benefited	DK
<b>EU25</b>	<b>52%</b>	<b>42%</b>	<b>6%</b>
<b>Sex</b>			
 Male	54%	41%	5%
Female	49%	44%	7%
<b>Age</b>			
 15-24	59%	33%	7%
25-39	55%	41%	5%
40-54	51%	44%	5%
55 +	46%	47%	8%
<b>Education (End of)</b>			
 15-	42%	49%	8%
16-19	51%	44%	5%
20+	57%	38%	5%
Still Studying	62%	30%	8%
<b>Respondent occupation scale</b>			
 Self-employed	55%	40%	5%
Managers	58%	37%	4%
White collars	55%	41%	4%
Manual workers	52%	43%	5%
House persons	44%	47%	9%
Unemployed	48%	47%	5%
Retired	45%	48%	7%
Students	62%	30%	8%
<b>EU Knowledge</b>			
 1-3	43%	48%	9%
4-7	58%	38%	4%
8-10	59%	37%	3%

Focussing briefly on **the extent to which people feel the common currency is perceived as a benefit** shows that this is most widely perceived to be the case in Ireland and Luxembourg (both 69%). It is also the majority view in Belgium (64%), Austria (58%), Finland (54%), and France and Portugal (both 53%), all of which are euro-zone countries. However, there are also euro-zone countries whose public opinion is quite the opposite: 72% of Greek and 69% of Italian respondents feel they have not benefited from this EU achievement.

Generally speaking, the feeling that one has benefited for these diverse achievements thanks to the European Union is closely linked to a respondent's general attitude towards the European Union. Those who feel their country has benefited from EU membership and who feel that EU membership is a good thing are far more frequently of the view that they themselves have benefited from the various achievements of the European Union.

**Do people feel they have benefited from each of the following achievements of the European Union? (by country)**

% yes	Working or studying in another EU country	The rights of a consumer	The rights of an EU citizen	The right to bring a case before the CoJ
	EU25	38%	37%	36%

UK	25%	33%	28%	29%

### 3. Globalisation

#### 3.1. Attitudes to globalisation

*- Globalisation is no longer primarily seen as a “threat”;  
public opinion is now more divided -*

With, on average, 40% of all respondents finding that globalisation represents a good opportunity for companies in their country thanks to the opening-up of markets and 41% feeling that globalisation represents a threat to employment and companies in their country, **attitudes to globalisation at the European level are divided**. Close to one-fifth of respondents were unable to choose between these two propositions<sup>30</sup>.

In comparison with spring 2006, agreement with the view that globalisation represents a good opportunity increased by 3 points while agreement with the view that it represents a threat fell by 6 points.

Question: QA43. Which of the following two propositions is the one which is closest to your opinion with regard to globalisation?

Overall, we see that a relative majority of interviewees in the former EU15 countries voice concern about the consequences of globalisation (43%; -6 points), whereas in the new Member States a relative majority of citizens view globalisation positively (46%; +4 points).

<sup>30</sup> QA43. Which of the following two propositions is the one which is closest to your opinion with regard to globalisation?

In ten EU Member States, globalisation is, above all, seen as an opportunity for national companies. Danish respondents (77%; no change) are the most positive in their assessment of the consequences of globalisation, followed by Swedish (59%; +5 points), Dutch (57%; +4 points) and Slovakian respondents (53%; +6 points). Conversely, in nine Member States, globalisation is seen as a threat. France and Greece top this list. Despite some improvement since spring 2006, the vast majority of people in both countries (each 64%; -8 points) continue to worry about globalisation.

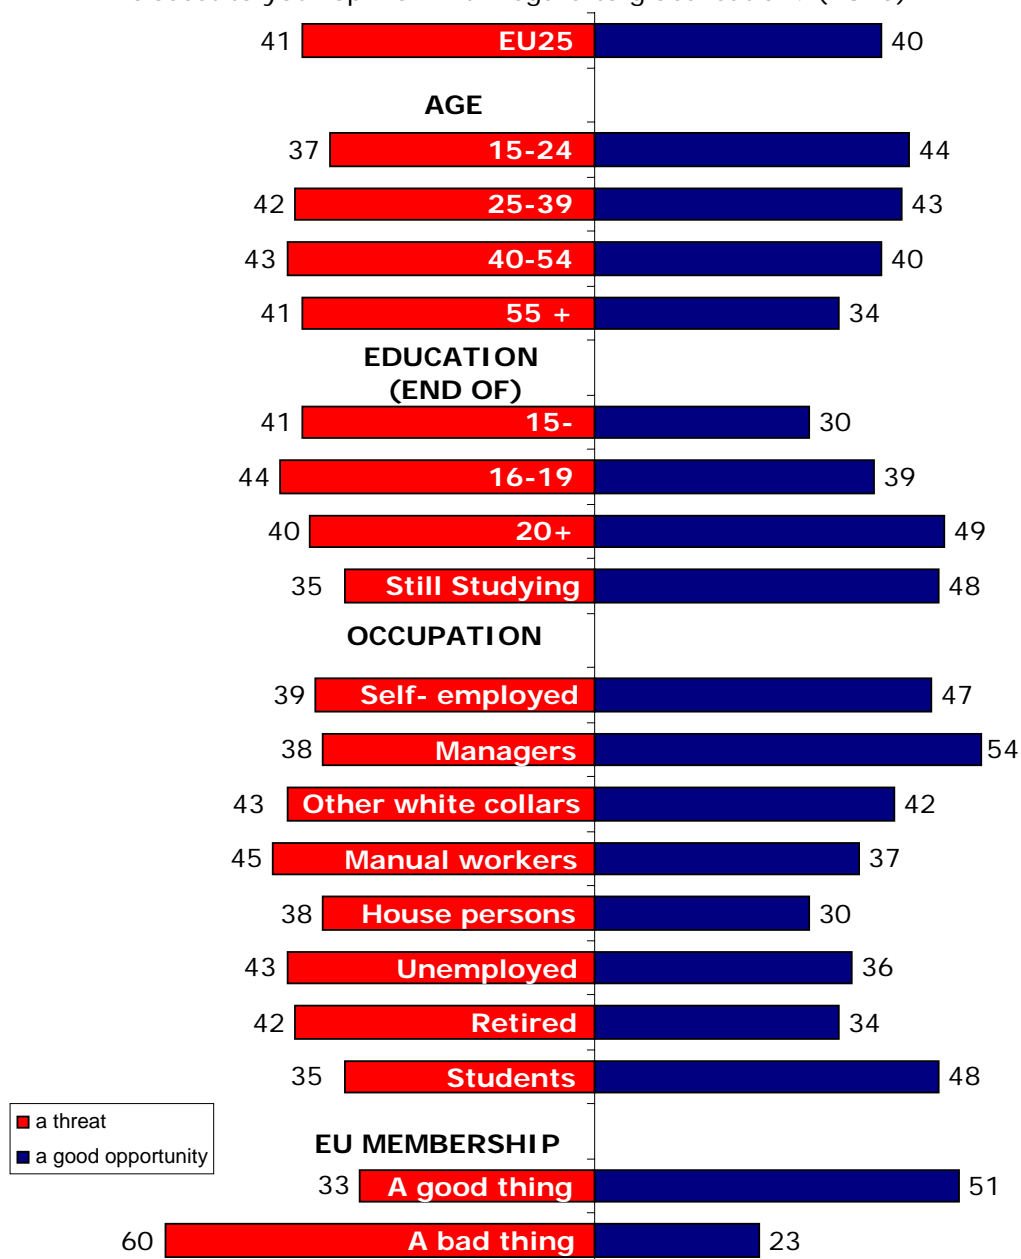

**Which of the following two propositions is the one which is closest to your opinion with regard to globalisation?**

In Romania (42%) and Bulgaria (39%), a large number of respondents answered "don't know" to the question about globalisation. Nonetheless, attitudes towards globalisation are more positive than negative. This is also the case in Turkey. In Croatia, on the other hand, a relative majority sees globalisation as a threat.

From a socio-demographic point of view, the survey shows that the majority of managers think positively about globalisation (54%) and for people who stayed in full-time education the longest (49%), students (48%), self-employed people (47%), people on the right of the political spectrum (46%), young people and men (both 44%) this view is held by a relative majority.

Which of the following two propositions is the one which is closest to your opinion with regard to globalisation? (EU25)

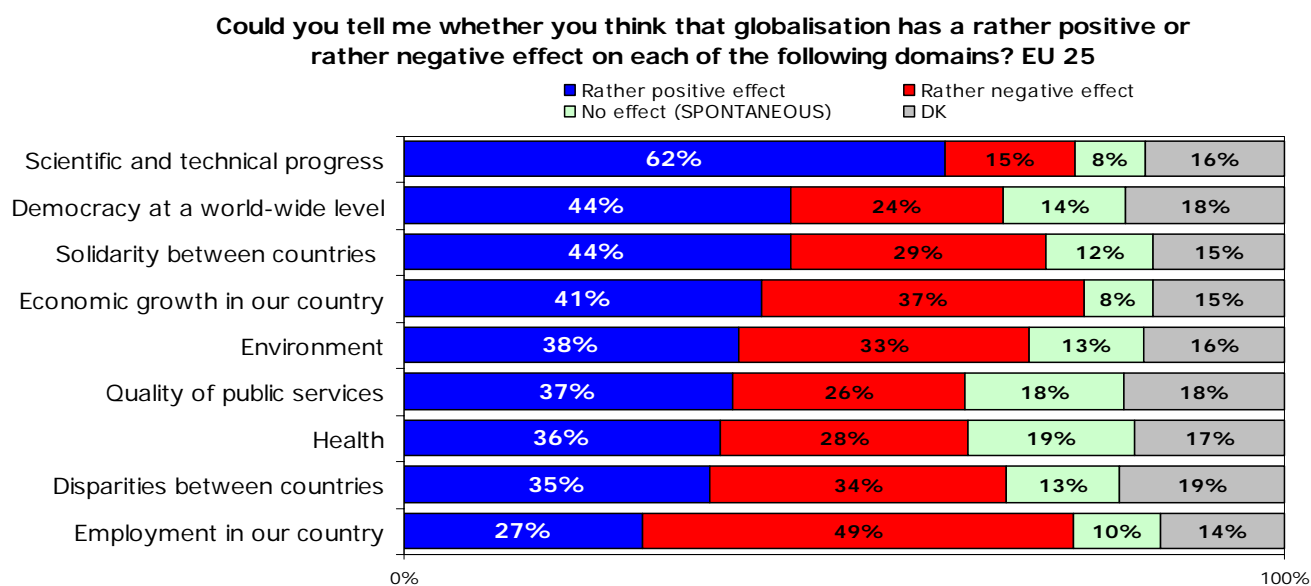

It is, furthermore, important to note that there are very large differences between citizens who support the European Union and those who are against it. **Supporters of the EU tend to have a positive attitude towards globalisation, whereas its opponents tend to see globalisation as a threat.**

### 3.2. The effects of globalisation

**- Globalisation has positive effect on scientific and technical progress but negative effect on national employment -**

The majority of European citizens positively assess the effect that globalisation has on **scientific and technological progress** (62%). In addition, a relative majority of citizens are of the view that globalisation has a **positive effect on democracy at a world-wide level** and on **solidarity between countries** (both 44%). Public opinion is also more positive than negative about the effect globalisation has on the quality of **public services** and **health**. A rather small majority believe that globalisation has positive effects on **economic growth in their country** (41% vs. 37% negative) and on the environment (38% vs. 33%). Views are divided about the effect globalisation has on **disparities between countries**. When it comes to **employment**, close to half of the respondents feel that globalisation has a fairly negative effect on the situation in their country (49% vs. 27% who think that globalisation has a rather positive effect in this respect)<sup>31</sup>.

<sup>31</sup> QA44. Could you tell me whether you think that globalisation has a rather positive or rather negative effect on each of the following domains?

## Positive effects of globalisation (by country)

% rather positive effect	Scientific and technical progress	Democracy at world-wide level	Solidarity between countries	Economic growth in our country	Environment	Quality of public services	Health	Disparities between countries	Employment in our country

TR	42%	33%	36%	35%	36%	36%	38%	33%	35%

Analysis according to countries reveals that views about the effect of globalisation on employment vary significantly from one country to another. Whereas in Denmark (57%), Ireland (52%), Lithuania (52%) and Estonia (51%), more than half of EU citizens find that globalisation has positive effects, in some other countries, quite the contrary view is held. This is particularly the case in Germany (73%) and France (70%), where the effect of globalisation on employment is widely perceived to be negative.

In Bulgaria and Romania around a third of respondents are unable to judge whether the effect of globalisation on the issues listed is positive or negative. High "don't know" levels are also noted in Turkey and Spain.

For all the listed areas, the percentage saying that globalisation has a rather positive effect is higher in the NMS10 countries than it is in the former EU15 countries. The gap in positive opinions between the two groups of Member States is largest when it comes to the perceived effects of globalisation on democracy and on the quality of public services.

Could you tell me whether you think that globalisation has a rather positive or rather negative effect on each of the following domains?			
	EU15	NMS10	Difference EU15- NMS10
<i>% rather positive effect</i>			
Democracy at a world-wide level	42%	56%	-24
Quality of public services	33%	57%	-24
Employment in our country	24%	41%	-17
Economic growth in our country	39%	49%	-10
Solidarity between countries	42%	52%	-10
Environment	37%	46%	-9
Disparities between countries	33%	41%	-7
Scientific and technical progress	61%	67%	-6
Health	35%	40%	-5

We next briefly examine the extent to which peoples' views of the effect of globalisation on employment in their country are influenced by socio-demographic factors. The largest differences in terms of gender, age, education and occupation are found in the percentage of 'no effect / don't know' responses. However, unemployed people and manual workers are particularly critical of the effect of globalisation on employment. Interestingly, there are only a few differences regarding the political inclination of the respondents: Those that place themselves on the left of the political scale are only slightly more likely to think that globalisation has a negative effect on employment in their country than those politically to the right (53% vs. 48%).

### 3.3. Testing how citizens judge the role of the European Union in this regard

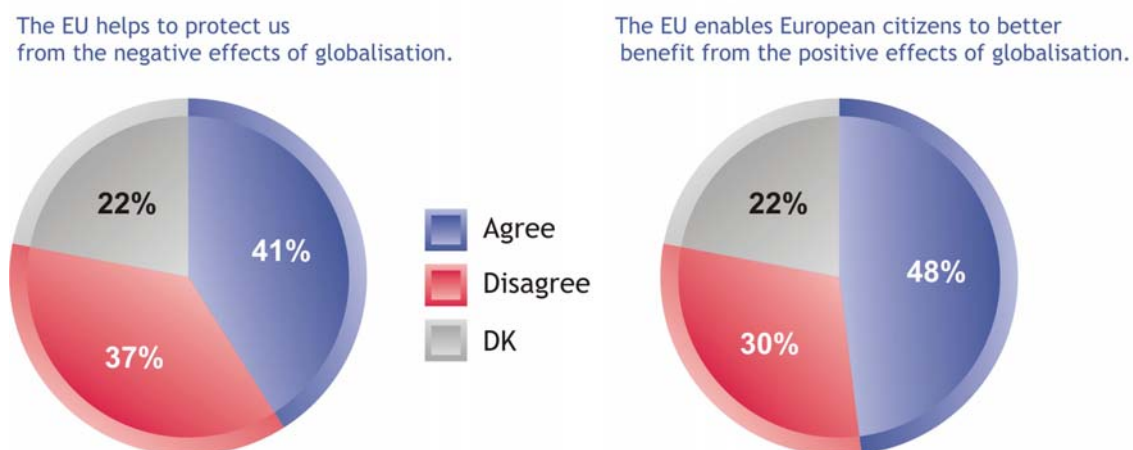

#### - Fairly positive judgement of the EU when it comes to face globalisation -

European citizens tend to judge the role the European Union plays with regards to the effects of globalisation as being positive.

To test how citizens assess the role of the EU in this respect, half the respondents were asked whether they agree or disagree with the statement that the European Union helps to protect them from the *negative effects* of globalisation. 41% of respondents agreed and 37% disagreed. One respondent in five had no opinion<sup>32</sup>.

The other half of the sample was asked whether they agree or disagree with the statement that the European Union enables European citizens to *better benefit* from the *positive effects* of globalisation. 48% of respondents agreed, 30% disagreed and, as with the other test item, 22 had no opinion<sup>33</sup>.

Question: QA45a/b. To what extent do you agree or disagree with the following statement:

On the whole, respondents are thus more likely to agree with the positively worded item. This also tends to be the case at the country level, particularly so in Finland, Sweden and Denmark. The exceptions are Luxembourg, Portugal, Spain and Greece.

In addition, the examination shows that, in the new Member States, more people agree with the two statements than is the case in the former EU15 nations. Positive attitudes tend to be most prevalent in Belgium, Slovakia and Poland. Conversely,

<sup>32</sup> QA45a. To what extent do you agree or disagree with the following statement: The European Union helps to protect us from the negative effects of globalisation?

<sup>33</sup> QA45b. To what extent do you agree or disagree with the following statement: The European Union enables European Union citizens to better benefit from the positive effects of globalisation?

France and Spain are the only two Member States where agreement on both statements is obtained from less than 4 out of 10 respondents.

Role of EU	Protection from negative effects	Better benefit from positive effects

In terms of socio-demographic analysis, we observe the same pattern as at country level: in every category more respondents agree with the statement that is presented in a positive way than with the statement with a “negative” wording.

---

### III. THE EUROPEAN UNION AND ITS CITIZENS

We shall now examine the aspects linked to the relationship between the European Union and its citizens, namely:

1. **Democracy and citizenship**: the feeling that one's voice is heard, involvement in European affairs, interest in European affairs, trust in the European Union, European citizenship and pride.
2. **Membership of the European Union**: support for membership of the European Union and its perceived advantages, the European Union's image and the direction in which things are going in the European Union.
3. **The European institutions**: do citizens know the EU institutions and do they trust them?
4. **Informing European citizens**: to what extent are citizens informed about European matters and where they look for and find information about the Union?

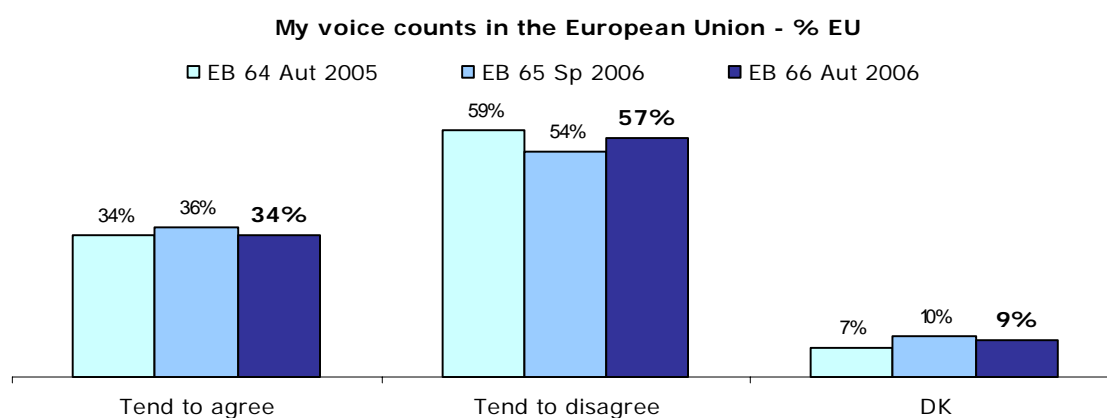

## 1. Democracy and citizenship

### 1. 1. Involvement in European affairs

*- Only one-third of EU citizens feel that their voice counts in the EU... -*

On average, 34% of respondents tend to agree that their voice counts in the European Union. This is two percentage points less than six month ago. The majority of respondents tend to disagree (57%, +3 points) and one respondent in ten lacks an opinion (9%, -1 point)<sup>34</sup>.

The only group of citizens where a majority feels that their voice counts in the European Union is that comprising those who feel they know a lot about the European Union (52%). Citizens who studied the longest and managers are also more likely than average to believe that their voice counts in the European Union but they do not form a majority.

<sup>34</sup> QA12.1. Please tell me for each statement, whether you tend to agree or tend to disagree?  
My voice counts in the European Union

### My voice counts in the EU

	Tend to agree	Tend to disagree	DK
<b>EU25</b>	<b>34%</b>	<b>57%</b>	<b>9%</b>
<b>Age</b>			
 15-24	37%	53%	10%

<b>EU knowledge</b>			
 1-3	23%	66%	11%
4-7	40%	53%	7%
8-10	52%	44%	4%

People's general attitude towards the European Union correlates with how they feel about whether their voice counts in the EU. People with positive views regarding the European Union are significantly more likely to feel that their voice counts than are citizens with a negative stance towards to European Union.

As the table below shows, around half of the people with positive views about the European Union feel that their voice counts, whereas the vast majority of people with negative views feel that their voice does not count.

<i>My voice counts in the EU EU25</i>	<b>% Tend to agree</b>	<b>%Tend to disagree</b>
<b>Positive views</b>		
<b>Image of the EU is positive</b>	<b>50%</b>	42%
<b>Tends to trust the EU</b>	<b>48%</b>	44%
<b>Membership to the EU is good</b>	<b>48%</b>	44%
<b>Country has benefited from membership</b>	<b>46%</b>	46%
<b>Negative views</b>		
<b>Image of the EU is negative</b>	13%	<b>83%</b>
<b>Membership to the EU is bad</b>	13%	<b>82%</b>
<b>Country has not benefited from membership</b>	18%	<b>76%</b>
<b>Tends not to trust the EU</b>	22%	<b>72%</b>

On average, there are no differences between the former EU15 countries and the ten new Member States. However, between the Member States, support for the view that one's voice counts in the European Union ranges from only 21% in Estonia, Italy and Latvia to 56% in Luxembourg.

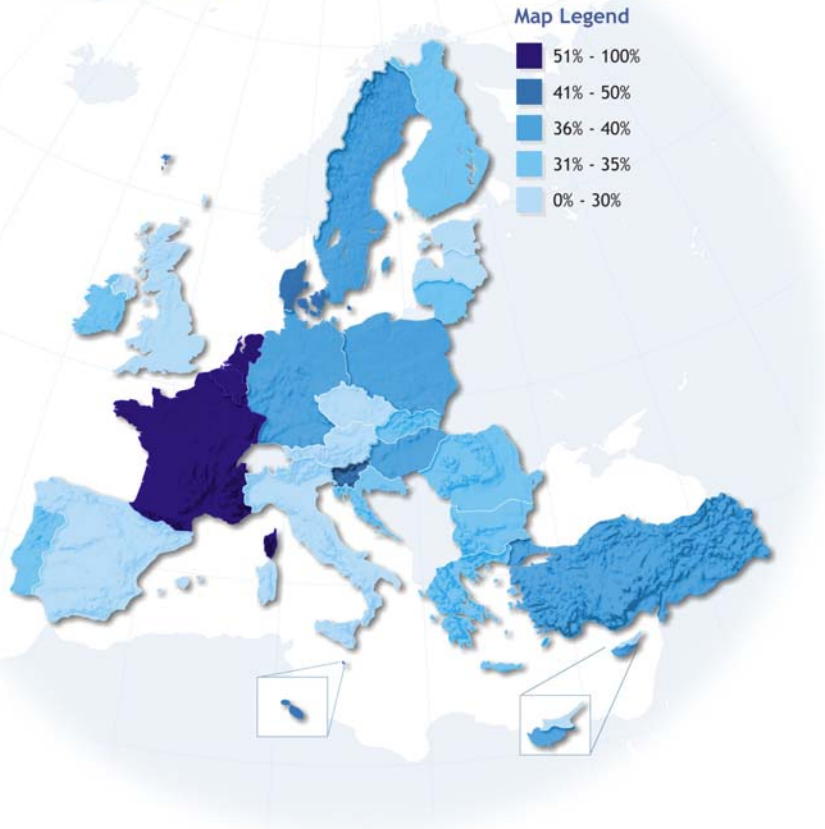

In Bulgaria and Romania, around a third of respondents feel their voice counts (31% in Bulgaria and 33% in Romania). Compared with spring 2006, public opinion is now more positive in these two countries (+5 points in both).

Question: QA12.1. Please tell me for each statement, whether you tend to agree or tend to disagree.

Option: My voice counts in the EU

Answers: Tend to agree

A country analysis of the shifts in the percentages since the previous survey shows the following developments:

- ◆ **The proportion of respondents agreeing that their voice counts has increased** significantly in Slovakia (+10 points), Lithuania (+8), Sweden (+5), the Czech Republic (+4), Luxembourg, Belgium, Finland, Latvia and Malta (all +3).
- ◆ It has **gone down most significantly** in Italy, Cyprus (both -12 points), Hungary (-11) and Spain (-8). Significant drops are also noted in Ireland (-6), the United Kingdom (-4) and Slovenia (-3).

**- ...and very few people feel involved in European affairs... -**

Only around one respondent in five (19%) tends to agree with the proposition “I feel very much involved in European affairs”<sup>35</sup>. Three out of four respondents disagree with this proposition.

---

Question: QA12.3. Please tell me for each statement, whether you tend to agree or tend to disagree.

Option: I feel very much involved in European affairs

---

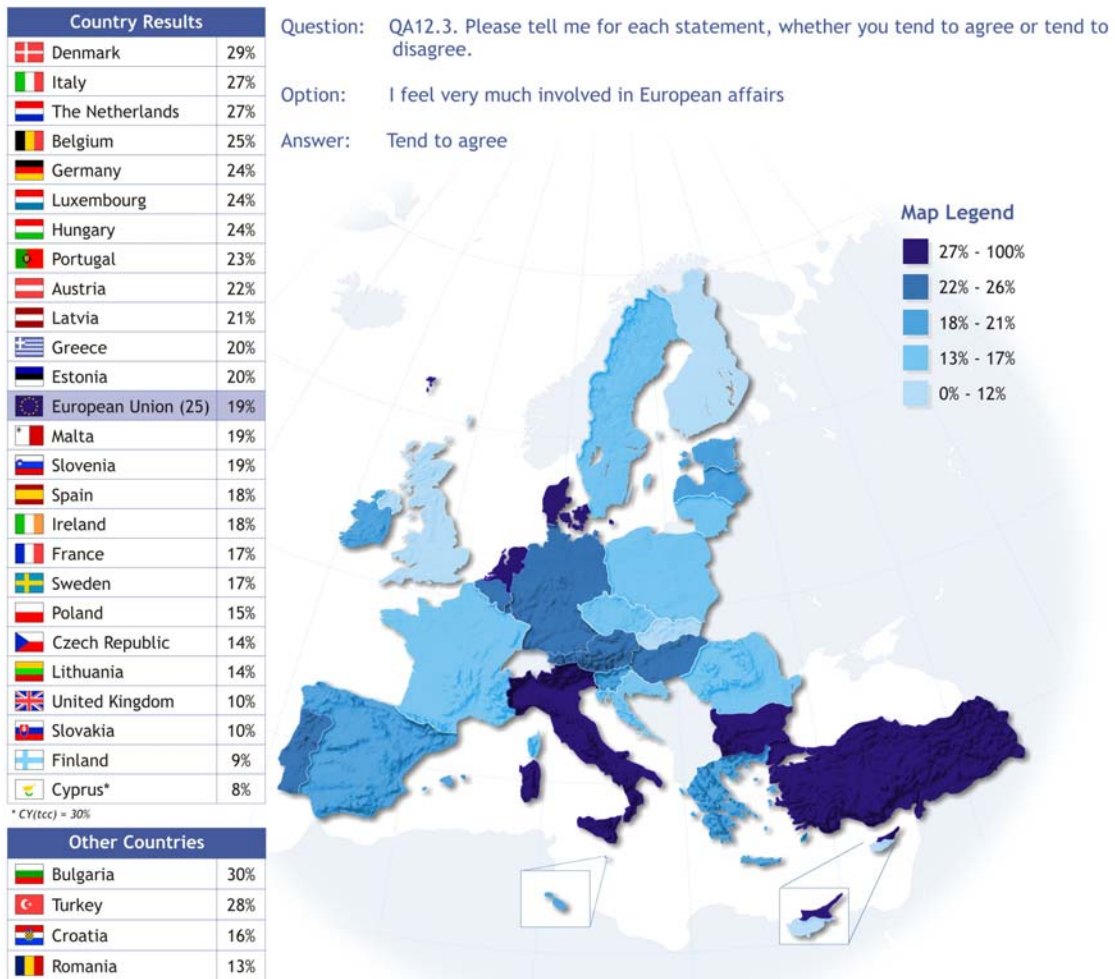

A comparison with the previous results shows that people are now less likely to agree than they were in Autumn 2005 (26%; -7 points). The proportion of people who disagree is now 3 percentage points higher than it was at the end of 2005 (72%).

---

<sup>35</sup> QA12.3.

Throughout the European Union, only a small minority of people feels very much involved in European affairs. The figures range from 8% in Cyprus to 29% in Denmark.

In Bulgaria, the feeling of involvement in European affairs (30%) is higher than in any country surveyed and much higher than in Romania (13%). The feeling of involvement is also relatively high in Turkey (28%).

From a socio-demographic perspective, self-employed people (27%), managers and people who stayed in full-time education until the age of 20 or older (both 26%) are most likely to feel very much involved in European affairs. Otherwise, respondents with a good EU knowledge are those who feel the most involved in European affairs (49% vs. only 8% for those who have a low EU knowledge).

### I feel very much involved in European affairs

	Tend to agree	Tend to disagree	DK
<b>EU25</b>	<b>19%</b>	<b>75%</b>	<b>5%</b>

**- ...which affect whether people feel interested or not in EU affairs -**

On average, 44% of EU citizens feel interested in European affairs against 54% who are not<sup>36</sup>.

Question: QA52.2. Would you say that you are very interested, fairly interested, not very interested or not at all interested in...?

Option: European affairs

**Interest levels are much higher among people who feel that their voice counts in the European Union (60%) and even more so among people who feel that they are very much involved in European affairs (76%).**

QA52.2 Would you say that you are interested, fairly interested, not interested or not at all interested in... ?  
...European affairs

**Respondents who feel that their voices count in Europe (QA12.1) (34% of the whole sample)**

**Respondents who feel very much involved in European**

<sup>36</sup> QA52.2. Would you say that you are very interested, fairly interested, not very interested or not at all interested in European affairs?

Over 8 out of 10 people who are very interested in domestic affairs are also very interested in European affairs (84%) and 6 out of 10 of those who are not at all interested in domestic affairs are equally not at all interested in European affairs<sup>37</sup>.

<i>Interest in domestic affairs</i>	<b>Total EU25</b>	<b>Interest in European affairs by interest in domestic affairs (EU25)</b>				
		Very interested	Fairly interested	Not very interested	Not at all interested	DK
<i>Very interested in domestic affairs</i>	<b>13%</b>	84%	15%	4%	2%	2%
<i>Fairly interested in domestic affairs</i>	<b>45%</b>	14%	77%	36%	10%	19%
<i>Not very interested in domestic affairs</i>	<b>28%</b>	2%	6%	57%	27%	11%
<i>Not at all interested in domestic affairs</i>	<b>12%</b>	1%	1%	2%	60%	1%
<i>DK</i>	<b>1%</b>	0%	0%	0%	0%	67%
Total	<b>100%</b>	100%	100%	100%	100%	100%

Socio-demographically, there are large differences between men and women, between those who left school aged 20 or older and those who left school before the age of 16 and between managers and house persons. Again, there is an important gap between those who have a good knowledge of the EU, with 80% of this group interested in European affairs, compared to 23% of those who have a low level of EU knowledge.

<sup>37</sup> The full analyses for the question measuring interest in domestic affairs is presented in the first part of this report, section 2.5.

Students	43%	54%	2%
<b>EU knowledge</b>			
 1-3	23%	75%	2%
4-7	57%	42%	1%
8-10	80%	19%	0%

Interest levels vary significantly among the Member States. Over 7 out of 10 citizens in Finland (73%) and Poland (71%) feel interested in European affairs. In Luxembourg (64%) and Greece (62%), this applies to 6 out of 10 citizens. Conversely, only a quarter of Spanish respondents feel interested in European affairs.

The country pattern described above is similar to that observed for interest in domestic affairs, where high interest levels were noted in Finland (92%), Greece (83%) and Poland (82%), and low levels seen in Spain (30%).

## 1.2. Trust in the European Union

### - Trust levels decreasing slightly -

Compared with spring 2006, average trust levels are now slightly lower (-3 points). On average, 45% of citizens tend to trust the European Union, while 40% tend not to trust it<sup>38</sup>.

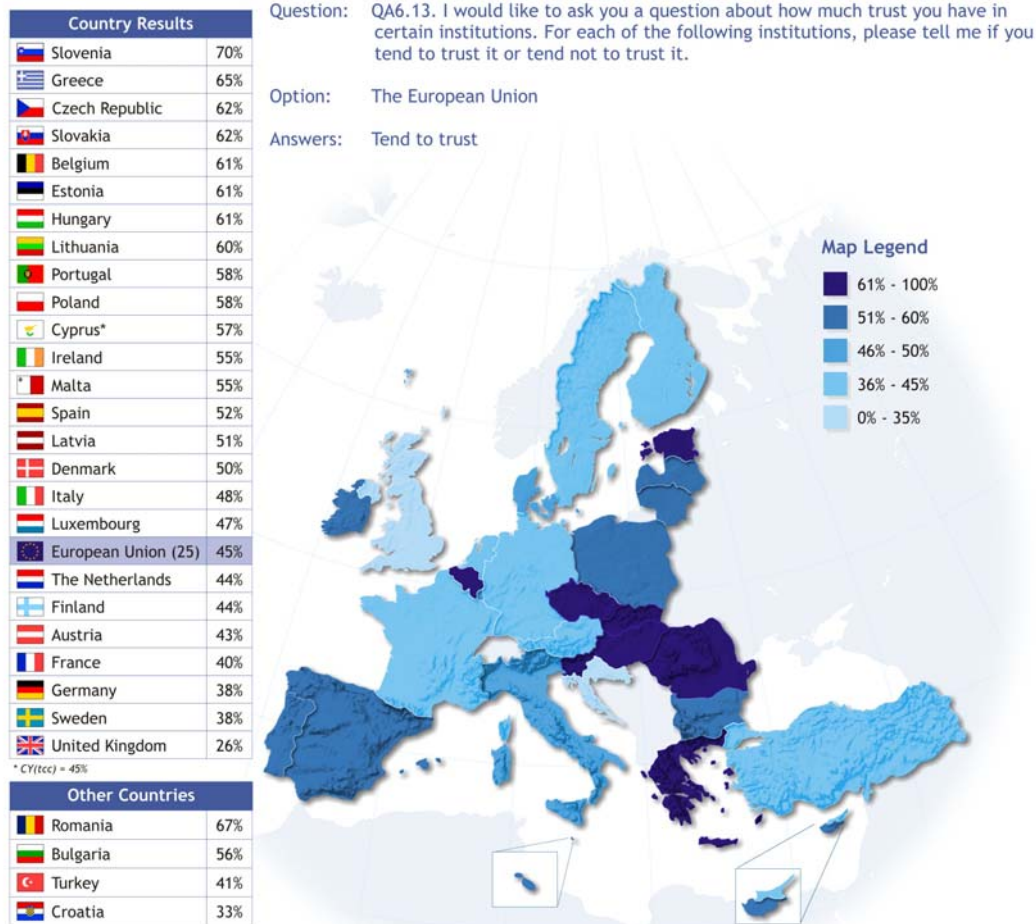

This decrease is the result of negative changes in trust levels in 8 of the 25 Member States: Hungary (-9 points), Italy (-8 points), Luxembourg (-7 points), Denmark, the United Kingdom (both -5 points), Cyprus, the Netherlands (both -4 points) and Germany (-3 points).

However, there are also Member States where trust levels have improved: Latvia (+8 points), Slovenia (+7 points), Estonia (+5 points), Lithuania and Finland (both +3 points).

Overall, this points to a more positive mood in the new Member States (59%, +6 points) and a less positive mood in the former EU15 countries (42%, -3 points). On this dimension, there is now a 17 points difference between the new Member States and the former EU15 countries, compared with a 15 points difference in spring 2006. Trust levels range from 26% in the United Kingdom to 70% in Slovenia.

Just prior to their accession to the EU, trust levels have remained stable in Romania (67%, -1 point) and Bulgaria (56%, -1 point). Trust levels have improved in Turkey (41%, +6 points) but are now lower in Croatia (33%, -5 points).

<sup>38</sup> QA6.13 I would like to ask you a question about how much trust you have in certain institutions. For each of the following institutions, please tell me if you tend to trust it or tend not to trust it? The European Union

In socio-demographic terms, trust levels vary from 36% of people who completed their full-time education by age 15, to 62% of people who are still studying. Likewise, respondents who claim to have a (very) good knowledge of European affairs - which increases with education - are more likely to have confidence than are those who feel they know (very) little about the European Union (56% versus 36%)<sup>39</sup>.

Age is another important determinant of trust: 56% of people aged 15 to 24 tend to trust the European Union, compared with 40% of people aged 55 and over. There are also differences between men and women, although these are not as pronounced. A lower proportion of women show trust in the EU (42% vs. 47% of men), but this is also a consequence of their higher level of "don't know" answers for this item (17% vs. 11% of men).

<sup>39</sup> QA14. Using this scale, how much do you feel you know about the European Union, its policies, its institutions? (1 = nothing at all, 10 = a great deal).

### The European Union

	Tend to trust	Tend not to trust	DK

8-10	56%	40%	4%

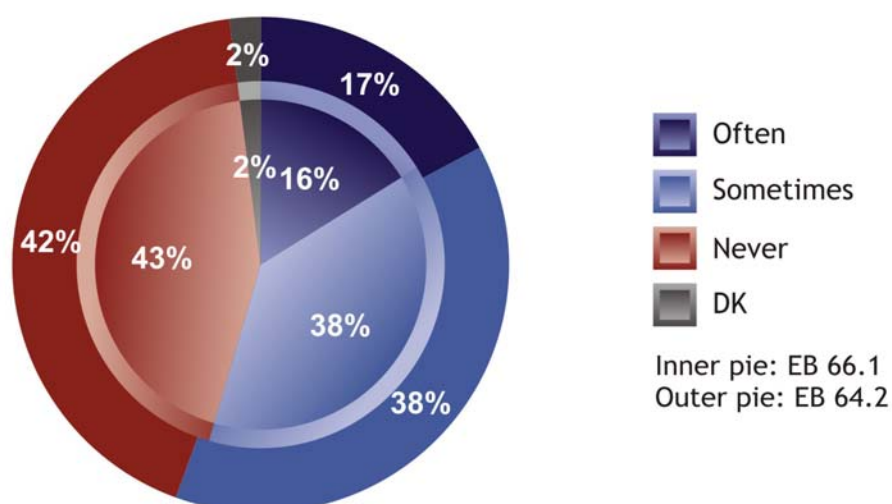

### 1.3. European citizenship

#### - Over half of EU citizens feel European -

On average, 16% of EU citizens often think of themselves as European in addition to their nationality and 38% do this sometimes<sup>40</sup>: in other words, **the notion of being European applies to more than half of EU citizens**. Just over 4 out of 10 interviewees never think of themselves as European (43%).

Public opinion about the concept of European citizenship has not changed since autumn 2005.

Question: QA30. Do you ever think of yourself as not only (NATIONALITY), but also European?  
Does this happen often, sometimes or never?

The EU average conceals large differences between the Member States: the concept of European citizenship is much more embedded in some countries than it is in others.

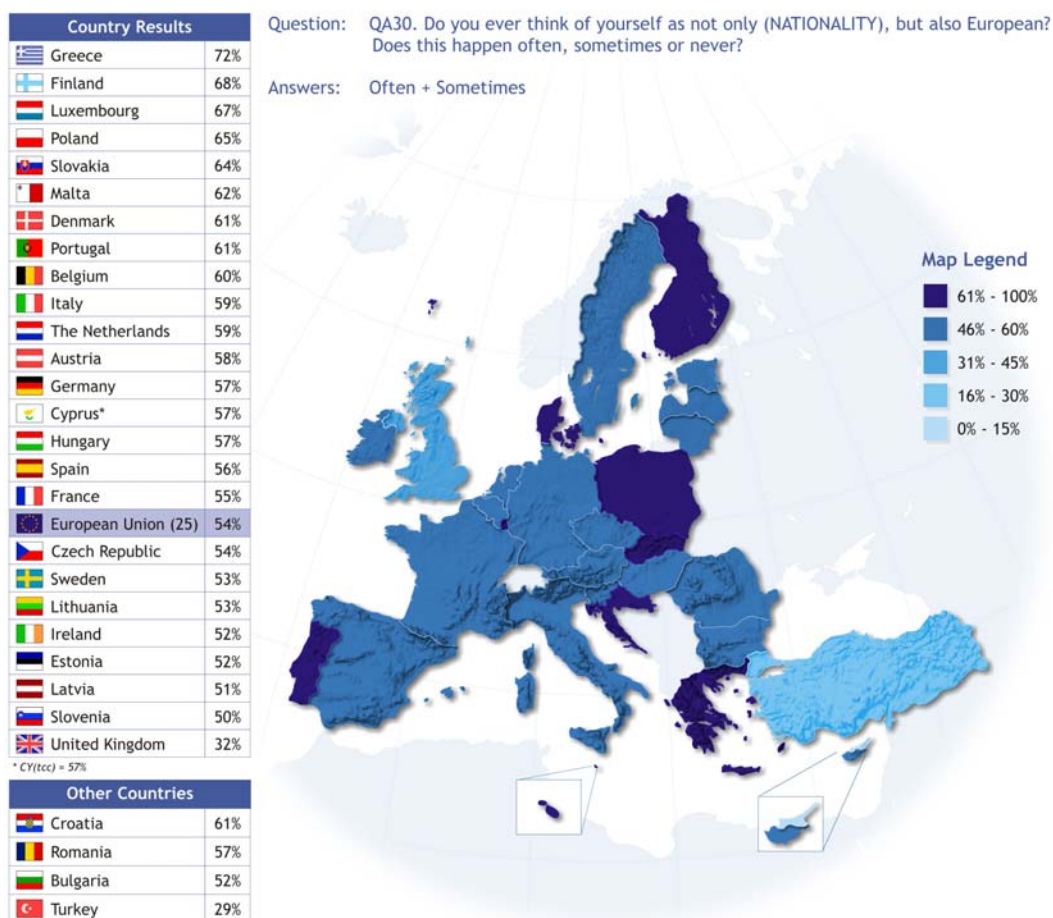

In Greece (72%), Finland (68%) and Luxembourg (67%), over 2 out of 3 respondents sometimes or often feel European. The reverse appears to be the case in the United Kingdom, where 67% of respondents indicate they never feel European. Notwithstanding the differences between the Member States, it should be noted that **the United Kingdom is the only country where less than half of the interviewees feel European**.

<sup>40</sup> QA30. Do you think of yourself as only (NATIONALITY), but also European? Does this happen often, sometimes or never?

A significant proportion of people living in Luxembourg (33%), Malta (29%) and Greece (27%) indicate that they often feel not only to be their own nationality but also European.

In Romania and Bulgaria, over half of the respondents feel European (57% and 52%, respectively). In Croatia, the figure is even higher (61%), whereas, in Turkey, the concept of European citizenship is less widely identified with (29%).

Identification with European citizenship is more common among men than it is among women (60% vs. 49%, respectively). Age also plays a role: older people are less likely than younger people are to feel European. Very large differences are also found on the basis of education, occupation and knowledge of the European Union.

Do you ever think of yourself as not only (NATIONALITY), but also European? Does this happen often, sometimes or never?

	Often	Sometimes	Never	DK

8-10	31%	41%	25%	2%

## 1.4. European pride

### - The majority of EU citizens feel proud to be European -

Close to 6 out of 10 respondents declare to feel proud to be European (59%). Nevertheless, one fifth of the respondents do not feel proud to be European (19%) and, furthermore, 17% of respondents do not feel European<sup>41</sup>.

It should be noted that this latter answer category ("I do not feel European") was added for the first time to better understand the results. The effect of this change is that, in comparison to previous years, the level of European pride now appears to be lower.

On average, citizens living in the 10 new Member States are more likely to feel proud to be European than their counterparts in the 15 'old' Member States (72% versus 56%). Levels of pride are particularly high in Slovakia (80%) and Poland (75%). At the other extreme of the opinion spectrum, lies the United Kingdom where close to half of the respondents cannot say whether they feel proud or not - as that they simply do not feel European (49%). In Lithuania, a significant minority of people are not proud (29%) or do not feel to be European (19%). Other countries where over a quarter lack pride are Germany (29%) and Greece (26%). Apart from the United Kingdom, Latvia and Lithuania are the only two Member States where more than 1 out of 5 citizens do not feel European (both 23%).

High levels of pride are noted in Romania (73%). This is less so in Bulgaria (50%). In Croatia around 6 out of 10 people feel proud to be European (61%) whereas in Turkey close to 2 out of 5 people do not feel European (37%) and only 28% feel proud to be so.

<sup>41</sup> QA32 And would you say you are very proud, fairly proud, not very proud, not at all proud to be European?

**QA32. And would you say you are very proud, fairly proud, not very proud, not at all proud to be European?**

European pride is strongly correlated with how people score on the main indicators of the Eurobarometer. 79% of people with a positive image of the EU are proud, while 38% of those with a negative image of the European Union do not feel European.

## 2. Being a member of the European Union today

### 2.1. Support for membership of the European Union

#### - Support for membership of the European Union has fallen slightly -

Support for European Union membership is slightly lower than it was in Spring 2006. On average, 53% of European Union citizens now believe that their country's membership of the European Union is a good thing (-2 points), while 16% of respondents think that it is a bad thing (+3 points)<sup>42</sup>.

Support for European Union membership remains strongest in Ireland, where almost 8 out of 10 people see it as a good thing (78%; +1 point). Luxembourg (74%; +2 points), the Netherlands (72%; -2 points) and Belgium (69%; +4 points) are the three other Member States where more than two-thirds of people share this view. At the other end of the scale, support for European Union membership is lowest in the United Kingdom (34%; -8 points), Austria (36%; +2 points), Finland (39%; no change) and Hungary (39%; -10 points).

<sup>42</sup> QA7a. Generally speaking, do you think that (OUR COUNTRY)'s membership of the European Union is ...? - a good thing - a bad thing - neither good nor bad.

There are significant socio-demographic differences on this dimension, particularly in terms of the education, occupation and age of respondents. 67% of respondents who studied beyond the age of 20 consider that it is a good thing compared with 41% of those who left school the earliest (i.e. a difference as high as 26 percentage points). 68% of managers approve of membership compared with 45% of those who look after the home. 60% of respondents aged 15-24 believe that it is a good thing to be part of the EU compared with 48% of those aged 55 and over.

## Support for membership

	A good thing	A bad thing	Neither good nor bad	DK/NA
<b>EU average</b>	53%	16%	27%	4%
<b>Age</b>				
 15-24	60%	10%	26%	4%
25-39	55%	15%	27%	3%
40-54	52%	17%	27%	3%
55 +	48%	18%	28%	5%
<b>Education (End of)</b>				
 15-	41%	20%	32%	6%
16-19	49%	17%	31%	3%
20+	67%	11%	20%	1%
Still Studying	66%	9%	21%	4%
<b>Occupation</b>				
 Self-employed	60%	16%	22%	2%
Managers	68%	12%	19%	1%
White Collars	58%	14%	26%	2%
Manual Workers	47%	16%	33%	4%
House Persons	45%	17%	30%	8%
Unemployed	46%	18%	32%	4%
Retired	47%	19%	30%	5%
Students	66%	9%	21%	4%
<b>EU knowledge</b>				
 1-3	42%	18%	33%	7%
4-7	61%	14%	24%	1%
8-10	67%	12%	19%	2%

In terms of **subjective EU knowledge**<sup>43</sup>, there is a 25 points difference between respondents who consider that they know a great deal about the European Union and those who feel that they know very little (67% versus 42%).

<sup>43</sup> For many years, the Eurobarometer has asked European Union citizens to assess their level of knowledge about the European Union, its policies and its institutions. Respondents are asked to rate their level of knowledge on a scale of 1 (know nothing at all) to 10 (know a great deal) representing their level of knowledge. For ease of reference, the scores have been grouped together. Here is the exact wording of the question:

"QA14. Using this scale, how much do you feel you know about the European Union, its policies, its institutions?"

## 2.2. The benefits of membership of the European Union

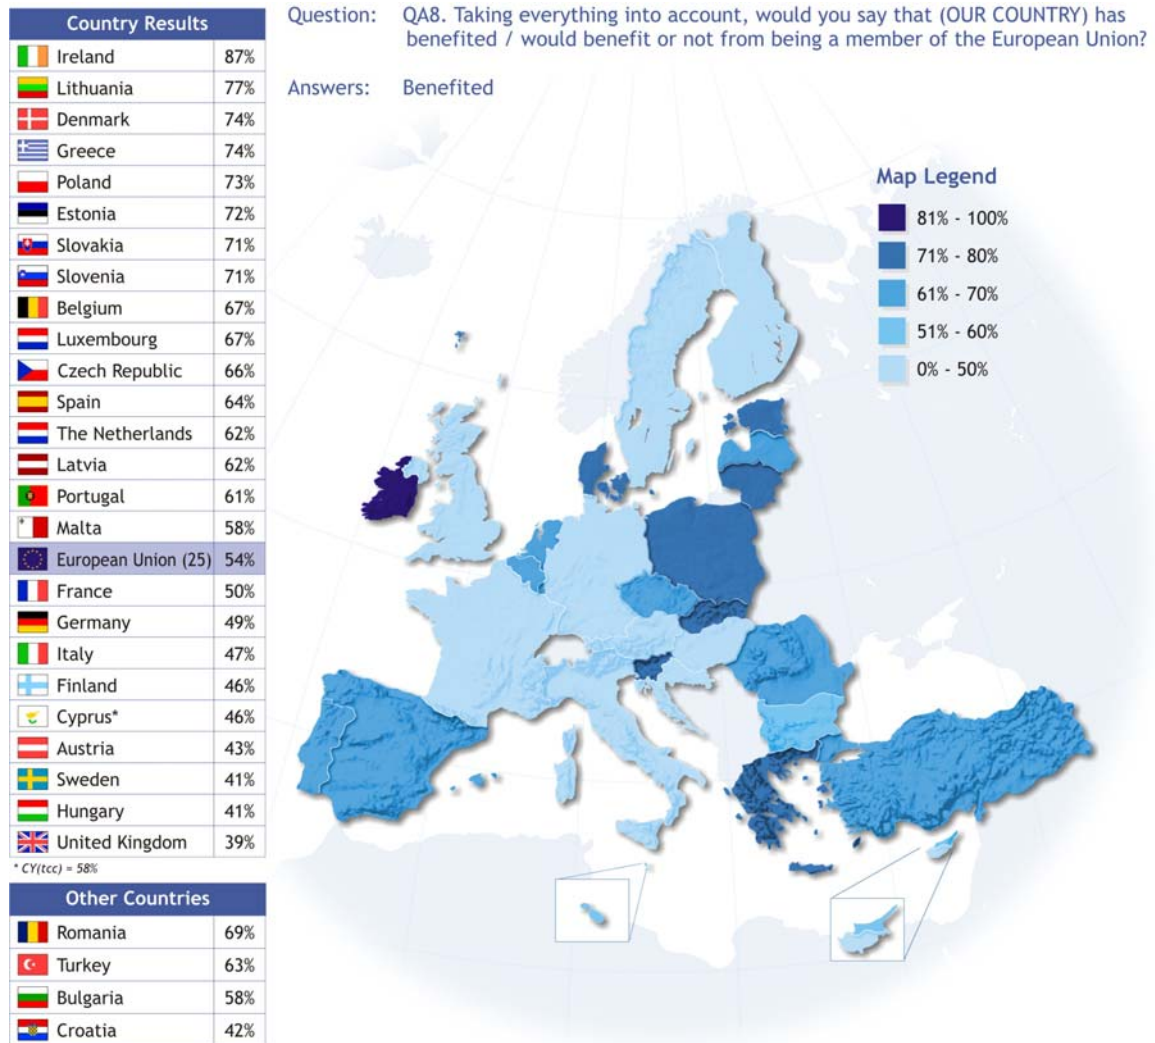

### - A majority still believe that their country has benefited from EU membership -

As in Spring 2006, **54% of citizens on average believe that their country has benefited** from EU membership. Around one third of the EU citizens continue to feel that their country has not benefited (34%; +1 point)<sup>44</sup>. The gap between positive and negative responses is now 20 points, compared with 21 points in Spring 2006.

Public opinion continues to be the most positive in Ireland, where almost 9 out of 10 respondents consider that on balance their country has benefited from membership of the European Union (87%; no change). Lithuania comes in second place (77%; +5 points), followed by Denmark (74%; -1 point) and Greece (74%; +2 points). Support for this view is the lowest in the United Kingdom (39%; -3 points), Sweden (41%; -2 points) and Hungary (41%; -11 points).

<sup>44</sup> QA8a. Taking everything into consideration, would you say that (OUR COUNTRY) has on balance benefited or not from being a member of the European Union?

There are also significant differences in socio-demographic terms on this aspect. The higher their level of education, the more respondents believe that their country has benefited from EU membership (69% of students think that their country has benefited from membership compared with 41% of those who left school the earliest).

At the same time, upper professional categories are once again more inclined to recognize the benefits of EU membership (67% of managers feel that their country has benefited from membership versus 45% of unemployed people).

## Benefit of membership

	Benefited	Not benefited	DK/NA
<b>EU average</b>	54%	34%	12%
<b>Age</b>			
 15-24	65%	23%	12%
25-39	58%	32%	10%
40-54	54%	36%	10%
55 +	46%	40%	14%
<b>Education (End of)</b>			
 15-	41%	43%	16%
16-19	51%	38%	11%
20+	67%	25%	7%
Still Studying	69%	18%	12%
<b>Occupation</b>			
 Self-employed	63%	30%	7%
Managers	67%	26%	7%
White Collars	61%	31%	8%
Manual Workers	51%	38%	11%
House Persons	46%	35%	20%
Unemployed	45%	43%	12%
Retired	46%	40%	14%
Students	69%	18%	12%

Benefit of membership has also a stronger support among younger respondents (65% of respondents aged 15-24 feel that their country has benefited from membership versus 46% of those aged 55 and over.)

### 2.3. Advantages of membership of the European Union

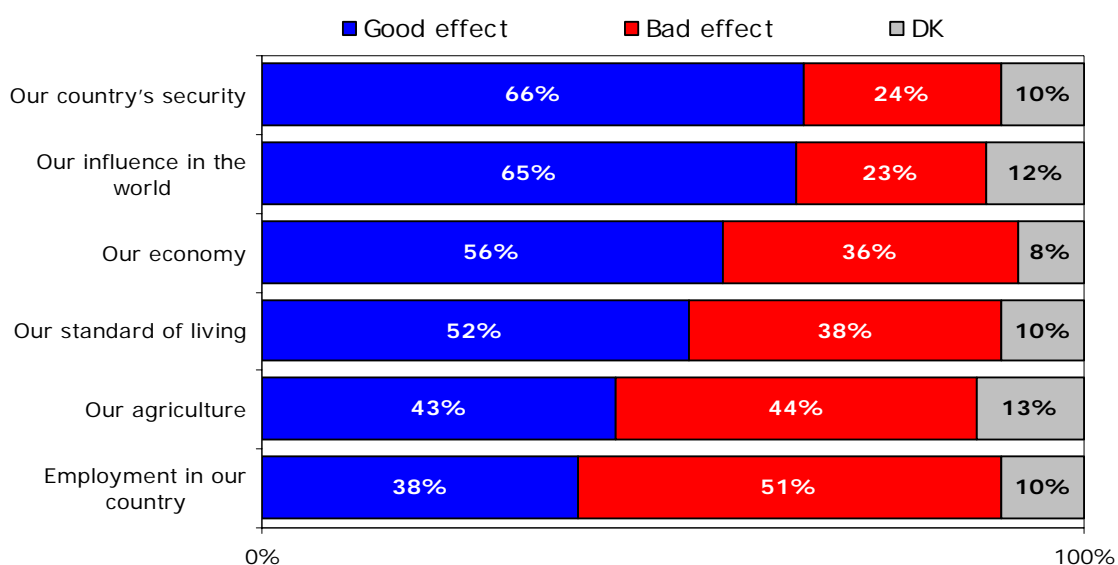

*- EU Membership is good for national security, influence in the world, economy and the standard of living -*

Overall, two-thirds of European citizens are of the view that belonging to the European Union has positive effects on their **country's security** (66%) and on their **country's influence in the world** (65%), affirming the widespread support that exists for the Union's common security and defence and foreign policies<sup>45</sup>.

In general, over half of European citizens believe that belonging to the European Union is good for their **economy** (56%) and their **standard of living** (52%)<sup>46</sup>.

European citizens are more **critical about the effect EU membership has on their agriculture and employment in their country**. With regards to employment, the majority of European citizens feel that belonging to the European Union has a bad effect (51%).

Advantages and disadvantages of (OUR COUNTRY) belonging to the European Union - % EU

<sup>45</sup> Support for the CSDP and the EU's foreign policy is discussed in Part IV, chapter 2 of this report.

<sup>46</sup> QA9a. People disagree about the advantages or disadvantage of (OUR COUNTRY) belonging to the European Union. I am going to read out some points and, for each one, I would like you to tell me if (OUR COUNTRY) being in the European Union has a very good, fairly good, bad or very bad effect?

Compared to Autumn 2005, when people were asked to assess the effects of their country belonging to the EU on their country's security, on their standard of living, on agriculture and on employment in the country, the results are quite stable. We find a small increase in the proportion of people who feel that belonging to the European Union has a good effect on agriculture and on the national employment situation (both +3 points).

The averages presented above conceal large variations between the Member States. **Overall, the feeling the membership has good effects is significantly more widespread in the ten new Member States than is the case in the former EU15 countries.** At country level, the variations for each of the six issues are<sup>47</sup>:

### **Our country's security**

The view that EU membership has a good effect on this point is most widespread in Slovenia (87%, +6 points since autumn 2005). Furthermore, this opinion is expressed by more than 8 out of 10 respondents in Estonia (85%, +9 points), Greece (84%, +5 points), Cyprus (84%, +4 points), Poland (84%, +7 points), Slovakia (83%, +8 points), the Czech Republic (82%, +2 points) and Lithuania (81%, +6 points). The United Kingdom is the only Member State where less than half of the public feels that their country has benefited from membership of the European Union in terms of national security (41%, -3 points).

### **Influence in the world**

At 81%, respondents in Greece top the list of their European counterparts in feeling that EU membership has a good effect on their country's influence in the world. Three-quarters of respondents in Denmark, Belgium (both 77%), Ireland and Germany (both 75%) share this view. Once again, British respondents appear to be more critical (46%).

### **National economy**

Close to 9 out of 10 Irish respondents are of the view that EU membership has had a good effect on the Irish economy (89%). Around 8 out of 10 respondents in Estonia (81%) and Denmark (80%) feel this way about their national situation. Conversely, in Hungary, Portugal, France, the United Kingdom, Italy and Cyprus less than half of respondents hold positive views in this regard.

### **Standard of living**

A similar ranking is to be found when it comes to the standard of living. In Ireland, 88% of respondents (+2 points) hold positive views, followed by 77% of Danish respondents (no change) and 74% of Estonian respondents (+18 points). At 35%, Hungarian respondents are least optimistic (-7 points). France is the only other Member State where respondents are this critical (37%, -5 points).

---

<sup>47</sup>Where the question was previously asked (autumn 2005, EB64), changes at country level are also presented. Further details can be found in the tables in the annexes.

### **Agriculture**

The view that EU membership has a good effect on agriculture is most widespread in Poland (77%, +16 points), Lithuania (67%, +9 points) and Denmark (67%, -3 points). Conversely, in Finland (22%, no change), Hungary (24%, +4 points) and the United Kingdom (27%, -1 point), less than 3 out of 10 respondents feel that EU membership has had a good effect on agriculture in their country.

### **Employment in our country**

In ten Member States – most notably Ireland (81%, +2 points) -, the percentage of respondents who consider that EU membership has a positive effect on **employment** outnumber those who think the opposite. The other countries are the Czech Republic, Denmark, Estonia, Spain, Lithuania, the Netherlands, Poland, Slovakia and Finland. In autumn 2005, there were only seven Member States where this was the case. At the same time, in Germany (24%) and France (26%), only a small minority of respondents find that EU membership has a good effect on employment in their country. Public opinion in these two countries has not changed since the previous survey.

**Perceived effects of (future) European Union membership (by country)**

In Bulgaria and Romania, the majority of citizens believe that EU membership will have a good effect on all the six areas<sup>48</sup>. **Even with regard to employment, where EU citizens are quite critical, Bulgarians and Romanians express hope** (both 59%, +3 in Romania and no change in Bulgaria,). Like citizens in the EU, they are most inclined to feel that EU membership will have a good effect on their country's security: 82% of Romanian respondents express this view (no change) and, in Bulgaria, the figure is 79% (+1 point).

Turkish respondents are also broadly positive about the effects EU membership would have on their country for all the areas covered by the survey. It should be noted that the order of the ranking in which they positively perceive these areas is slightly different from the order of the ranking at EU level. In Turkey, the country's national economy and standard of living come first, followed by its security.

---

<sup>48</sup> QA9b. People disagree about the advantages of disadvantage of (OUR COUNTRY) belonging to the European Union. I am going to read out some points and, for each one, I would like you to tell me if (OUR COUNTRY) being in the European Union would have a very good, fairly good, bad or very bad effect?

## 2.4. The image of the European Union

### - The European Union's image is now slightly less positive -

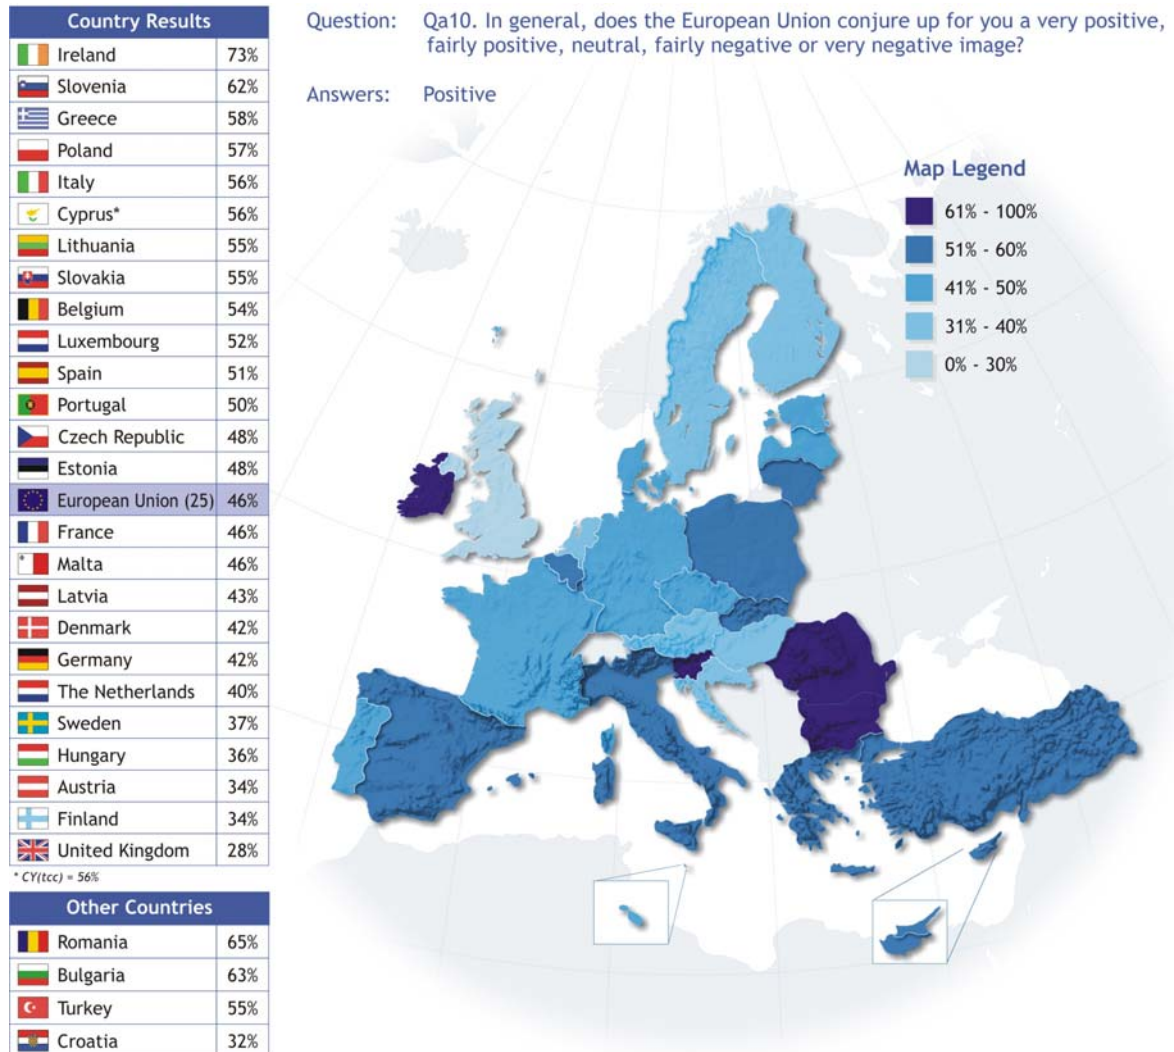

On average, the number of EU citizens who view the European Union positively is slightly less than in Spring 2006 (46%; -4 points). The European Union's image is now neutral for around one third of citizens (34%; +2 points) while one sixth of citizens perceive it negatively (17%; +2 points)<sup>49</sup>.

The European Union's image continues to be the most widely perceived as positive in Ireland (73%; no change). Furthermore, in nearly all Member States, citizens who view the European Union's image positively outnumber those who view it negatively. However, that is not the case in the United Kingdom where 36% of the public perceive the EU negatively; 28% of citizens in the UK see it positively. In Austria and Sweden, citizens having a positive image of the European Union only just outnumber those who have a negative perception (by 6 and 7 percentage points, respectively).

In Bulgaria, the public perception of the European Union's image has improved significantly since Spring 2006 (63%; +4 points) while it is more or less unchanged in Romania (65%; +1 point). The European Union's image is mostly positive in Turkey (55%; +12 points), whereas public opinion in Croatia is clearly divided, with positive and negative scores of 32% and 29% respectively.

<sup>49</sup> QA10. In general, does the European Union conjure up for you a very positive, fairly positive, neutral, fairly negative or very negative image?

The image that respondents have of the EU is correlated with their level of education, occupation and age. The European Union has a positive image among 59% of students and 58% of the respondents who left full-time education at the age of 20 or after, while this only holds for 36% of people who completed their full-time education aged 15 or younger. Furthermore, among the occupational groups, the image of the EU is most positively perceived by managers (58%) and least so by unemployed people (38%). Overall, the younger people are, the more positive their image of the EU is.

We can observe the same pattern to that already observed regarding the benefits of EU membership (part III, 2.2): the youngest age group and well-educated respondents have the most positive opinions regarding the European Union.

### The European Union's image

### 3. The European institutions

#### 3.1. Awareness of and trust in the European institutions

*- The European Parliament is the most widely known and trusted European institution -*

Of the nine European institutions tested, **the European Parliament** is the most widely known: 90% of those interviewed have heard of it<sup>50</sup>. Over 8 out of 10 interviewees have heard of the **European Commission** (82%) and around 7 out of ten respondents have heard of the **European Central Bank** (72%) and the **Court of Justice of the European Communities** (70%). The other institution that more than half of the respondents have heard of is the **Council of the European Union** (63%).

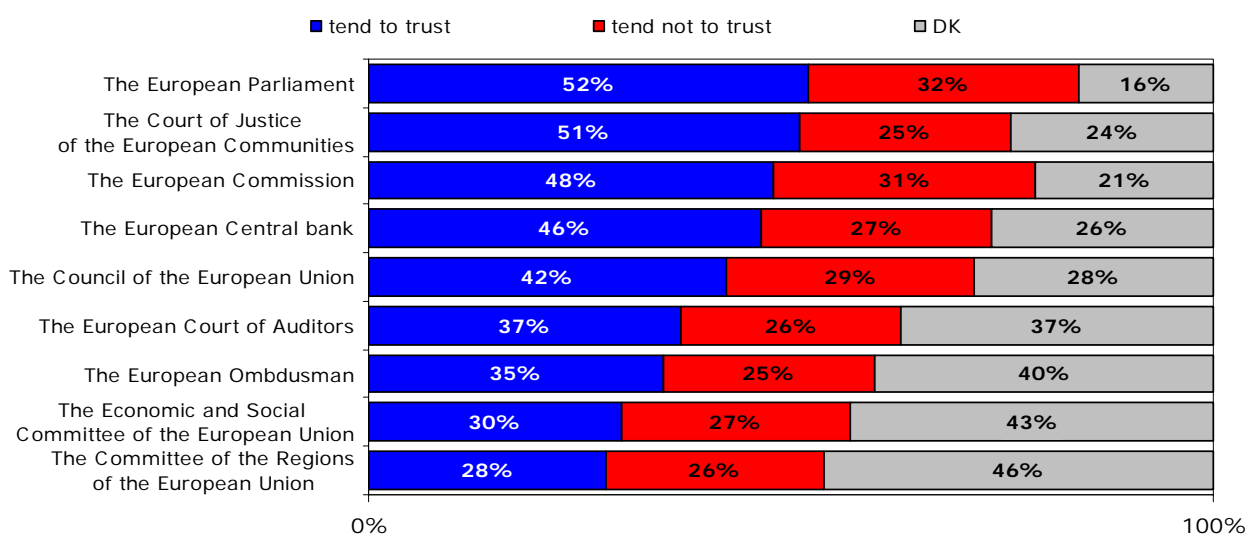

The four other institutions are less well known among the EU public. Awareness of the Committee of the Regions and the Economic and Social Committee remains fairly low. Compared with the previous wave, awareness of the Court of Auditors, the European Ombudsman, the Committee of the Regions and the Economic and Social Committee is now slightly more widespread than it was in Autumn 2005 (all +3 points).

<sup>50</sup> QA18. Have you heard of... ?

Around half of respondents indicate that they tend to trust the European Parliament (52%), the Court of Justice (51%) and the European Commission (48%)<sup>51</sup>. In line with the degree to which the public has heard of the EU institutions and bodies, people find it difficult to say whether they trust some of the institutions. Nearly half of the respondents could not say whether they tend to trust the Committee of the Regions (46%) and the Economic and Social Committee (43%). Approximately one quarter to a third of respondents tend not to trust the 9 institutions tested.

There is less variation in the extent to which citizens tend to “distrust” the European institutions. Levels of distrust are highest for the two most well-known institutions (32% for the EP and 31% for the EC). At 25%, levels of “distrust” are lowest for the Court of Justice and the Ombudsman. The example of the Committee of the Regions of the European Union is quite striking: This institution is distrusted by 26% of European citizens (compared to 28% who trust it). These results come despite the fact that the institution is known by only 28% of the respondents. Thus it seems that some respondents seem to have a certain “suspicion” towards European institutions even if they have never heard of them.

#### And for each of them, please tell me if you... ?

For most institutions no significant changes in trust levels have been recorded since Autumn 2005. The exceptions are the Court of Auditors, where an increase in trust levels of 4 points has been recorded and the European Ombudsman who is now trusted by 35% of EU citizens, compared to 32% a year earlier.

<sup>51</sup> QA19. And, for each of them, please tell me if you tend to trust it or tend not to trust it?

## 3.2. Trust in the European Commission and the European Parliament

### 3.2.1. The European Commission

#### - Trust in the European Commission remains stable -

Concerning more specifically the image of certain European institutions, the level of trust in the European Commission has not changed significantly since Spring 2006, at EU level. On average, almost half of EU citizens now trust this institution (48%; +1 point), whereas under a third do not trust it (31%; +2 points)<sup>52</sup>. It should be noted that the proportion of citizens tending not to trust the European Commission remains higher than was the case between Autumn 1999 and Autumn 2004.

Sp. 1999	Aut. 1999	Sp. 2000	Aut. 2000	Sp. 2001	Aut. 2001	Sp. 2002	Aut. 2002	Sp. 2003	Aut. 2003	Sp. 2004	Aut. 2004	Sp. 2005	Aut. 2005	Sp. 2006	Aut. 2006
EB51	EB52	EB53	EB54	EB55	EB56	EB57	EB58	EB59	EB60	EB61	EB62	EB63	EB64	EB65	EB66

However, at country level, there have been significant shifts in the level of trust since Spring 2006. Trust in the European Commission continues to be the most widespread in Slovenia (73%; +8 points). The next highest levels are to be found in Belgium (68%; +5 points), Greece (68%; +7 points) and Slovakia (66%; +10 points). The United Kingdom continues to be the country where trust in the European Commission is the lowest (25%; -3 points); it is the only Member State where less than 4 out of 10 citizens trust the Commission.

In Bulgaria and Romania, trust in the European Commission has improved significantly since Spring 2006: 62% of Romanians now trust the Commission (+8 points), while the corresponding percentage in Bulgaria is 51% (+7 points). The level of trust has also improved slightly in the two candidate countries and now stands at 43% in Croatia (+4 points) and 32% in Turkey (+3 points).

<sup>52</sup> QA19.2 And for each of the following European bodies, please tell me if you tend to trust it or tend not to trust it? The European Commission

Question: QA19\_2. And, for each of them, please tell me if you tend to trust it or tend not to trust it?

Option: The European Commission

Answers: Tend to trust

In socio-demographic terms, the three most significant differences among respondents tending to trust the European Commission concern the following variables: education (58% of who studied beyond the age of 20 trust the Commission compared with 37% of those who left school at age 15 or earlier), occupation and place of birth (57% of respondents born in an EU country other than the country where they now live tend to trust the Commission versus 42% of those born in a European country outside the EU). Levels of “don’t know/no answer” partly explain this last difference (28% for people who are born in a European country but outside the EU).

## Trust in the European Commission

Outside Europe	45%	28%	27%

### 3.2.2. The European Parliament

#### - The European Parliament continues to be the most trusted institution -

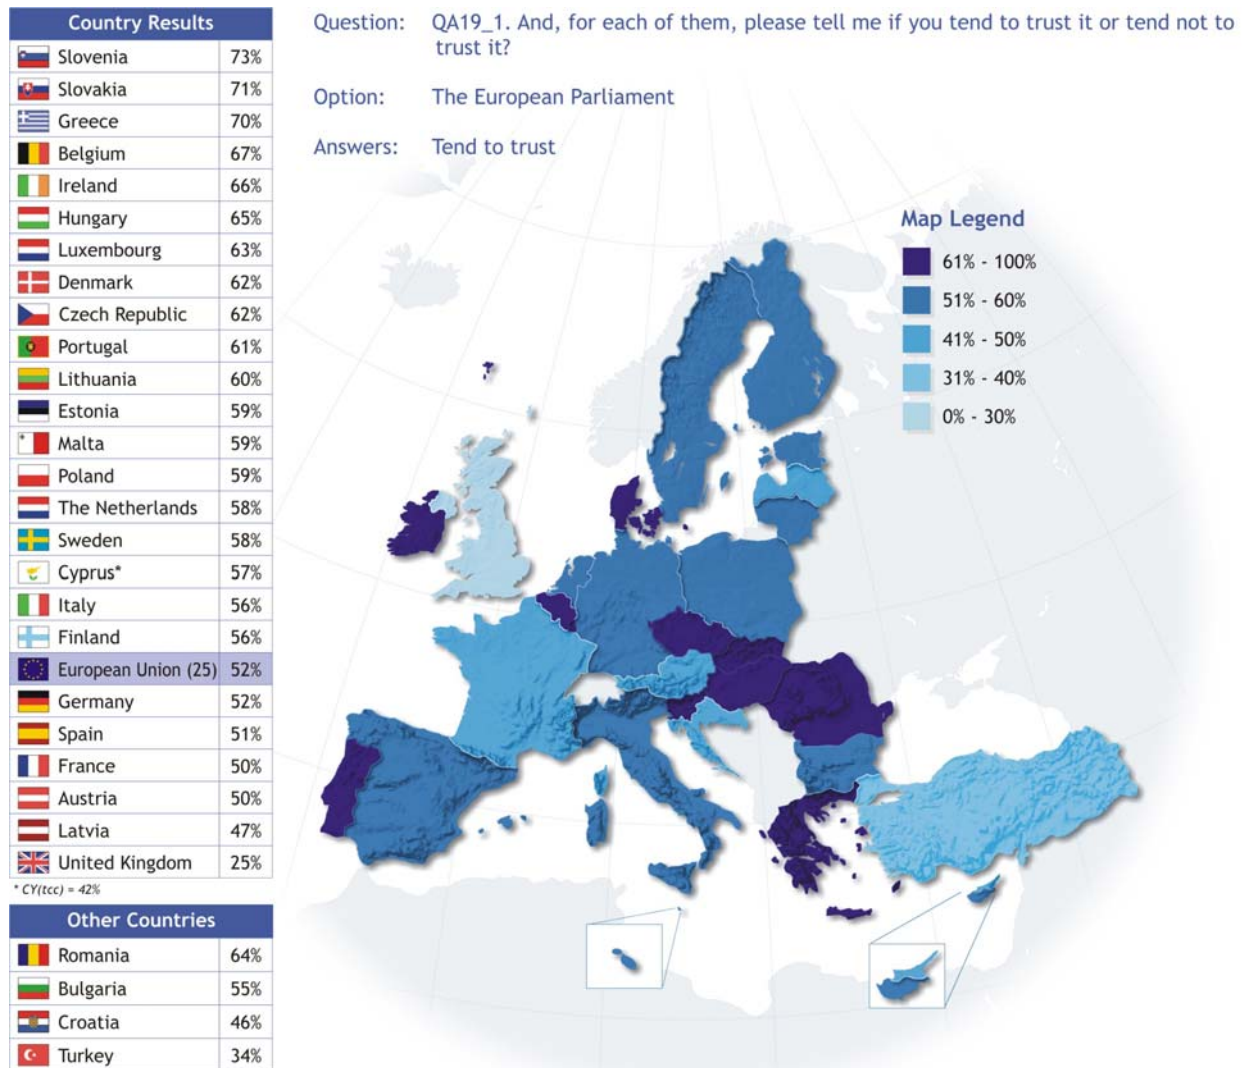

Trust in the European Parliament remains stable with on average 52% of EU citizens trusting this institution. At the same time, the level of lack of trust at 32% confirms the negative trend observed since Autumn 2004<sup>53</sup>.

Trust in the European Parliament is now most widespread in Slovenia (73%; +8 points), followed closely by Slovakia (71%; +9 points) and Greece (70%; +7 points). In Belgium, (67%; +2 points), Ireland (66%; +4 points) and Hungary (65%; -6 points), around two thirds of citizens trust the European Parliament although the level of trust in Hungary is now significantly lower than in Spring 2006. Trust is the lowest in the United Kingdom and has fallen further since Spring 2006 (25%; -6 points). As was the case regarding trust in the European Commission, the United Kingdom is the only Member State where fewer than 4 out of 10 citizens trust the European Parliament.

In Bulgaria and Romania, trust in the European Parliament has improved almost as much as trust in the European Commission: 64% of Romanians (+5 points) and 55% of Bulgarians (+4 points) now trust it. The level of trust has also improved slightly in Croatia (46%; +3 points), but has remained stable in Turkey (34%).

<sup>53</sup> QA19.1 And for each of the following European bodies, please tell me if you tend to trust it or tend not to trust it? The European Parliament

Once again, a socio-demographic analysis reveals clear differences, which are similar to those noted for the European Commission. The respondent's education, place of birth, occupation and subjective level of knowledge about the EU remain the most relevant variables.

### 3.2.3. A comparison of the two institutions

Trust in the European Parliament always tends to be somewhat more widely displayed by the public than is trust in the European Commission and, moreover, the confidence curves of the two institutions remain more or less parallel over time.

A comparison with the spring 2006 survey shows that, in nearly all the Member States, trust in the two institutions improved. The only exceptions are Italy, Hungary, the United Kingdom and Cyprus. More specifically, the analysis shows that in 14 Member States trust levels for both the European Parliament and the European Commission are now significantly higher, with the largest increases seen in Slovakia and Sweden. In an additional three countries, an increase in levels of trust for either the Parliament or the Commission has been recorded.

	The European Parliament			The European Commission		
	Sp. 2006	Aut. 2006	Diff. Sp.2006/ Aut.2006	Sp. 2006	Aut.2006	Diff. Sp.2006/ Aut.2006

HR	43%	46%	+3	39%	43%	+4
TR	34%	34%	=	29%	32%	3

As the table below shows, peoples' trust in specific European institutions is linked to how they feel generally about the European Union. It can, for instance, be seen that only 15% of people with a negative image of the EU trust the European Commission, whereas trust in the Commission is claimed by 70% of people who have a positive image of the EU.

	The European Parliament			The European Commission		
	Tend to trust	Tend not to trust	DK	Tend to trust	Tend not to trust	DK

Not benefited	32%	54%	14%	30%	52%	18%

### 3.3. The Presidency of the Council of the European Union

*- In Finland, the Presidency of the Council of the EU is widely known and important -*

During the second half of 2006, **Finland** held the Presidency of the Council of the European Union<sup>54</sup> and, at the time of the survey, 9 out of 10 of its citizens had seen, read or heard something in the media on the subject of their country's Presidency (91%; 3 points more than in the months of the last Finnish Presidency in 1999).

<sup>54</sup> QA21a. In the European Union, each Member State, in turn, becomes the President of the Council of the European Union for six months. Right now, it's the turn of Finland. Have you recently read in the newspapers or heard on the radio or television anything about Finland's presidency?  
QA21b. Whether you have heard about it or not, do you think it is important or not that Finland is President of the Council of the European Union at this time? Would you say it is...?

Furthermore, a large majority of Finnish citizens consider it important that their country presides over the Council of the European Union (81% vs. 72% in 1999).

**- The forthcoming German Presidency is considered important, but awareness levels are low -**

In the autumn 2006 Eurobarometer, a further question was asked about the reputation and importance of the Presidency in the Member State which was to take over the task from 1 January 2007, namely **Germany**<sup>55</sup>.

At the time of the survey, just over a third of German respondents had already read, heard or seen something in the media about their country's forthcoming Presidency of the Council of the European Union with effect from 1 January 2007 (35%).

Despite the low awareness levels, many German respondents consider it important that their country will hold the Presidency from January. This opinion was expressed by 70% and represents an increase from the 66% who considered the Presidency to be important last time it was held by Germany in 1999.

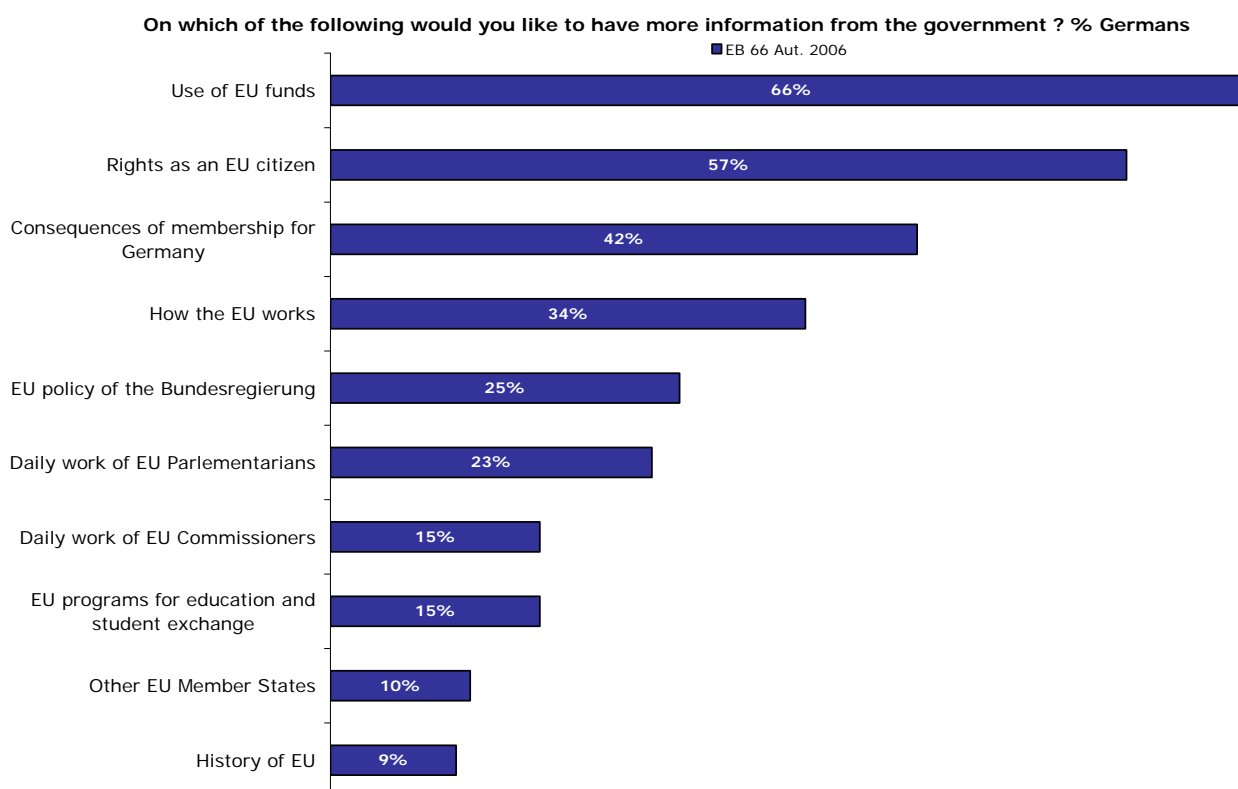

<sup>55</sup> QA21c In the European Union, each Member State, in turn, becomes the President of the Council of the European Union for six months. From 1 January 2007, it will be the turn of Germany. Have you recently read in the newspapers or heard on the radio or television anything about Germany's presidency...? QA21d Whether you have heard about it or not, do you think it is important or not that Germany will be President of the Council of the European Union from the 1 January 2007? Would you say it is...?

**- German citizens want their Government to provide more information on the use of EU funds and their rights as EU citizens -**

Two out of three respondents in Germany indicated that they would like to receive more information from their Government on the use of EU funds (66%). There is also widespread interest in information about people's rights as an EU citizen (57%)<sup>56</sup>.

Around 4 out of 10 respondents would like to receive information about the consequences of membership for Germany (42%) and a third of the respondents are interested in information about how the European Union works (34%).

The German public is interested in various means which their Government could use to better inform its citizens about the European Union and how it works<sup>57</sup>. The three most popular means are "supplements in newspapers or magazines", cited by 45% of respondents, "film and TV ads" (43%) and "discussions, TV shows, entertainment with EU topics" (32%).

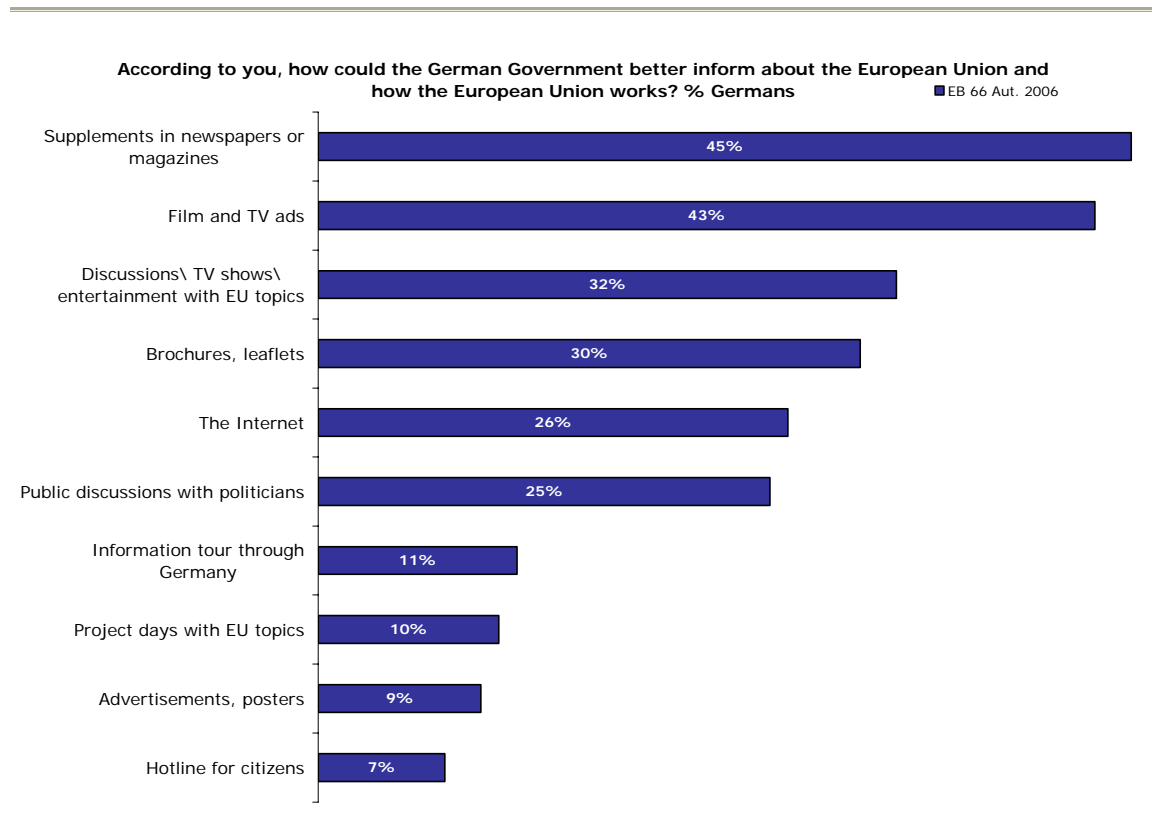

<sup>56</sup> QA22b. On which of the following would you like to have more information from the Government? This question was only fielded in Germany and respondents could give a maximum of three answers.

<sup>57</sup> QA22a. According to you, how could the German Government better inform about the European Union and how the European Union works?

There is also significant interest in “brochures or leaflets” (30%), “the Internet” (26%) and “public discussions with politicians” (25%).

The survey also highlights which means are not very popular. Less than 1 respondent in 10 chose “a hotline for citizens (7%), “advertisements or posters” (9%). “Project days with EU topics” and “an information tour through Germany” were selected by respectively 10% and 11% of the German respondents.

## 4. Information about the European Union

### 4.1. Subjective knowledge of the European Union

#### 4.1.1. The EU knowledge scale

For many years, the Eurobarometer has asked European Union citizens to assess their own level of knowledge about the European Union, its policies and its institutions. Respondents are asked to rate their level of knowledge on a scale of 1 (know nothing at all) to 10 (know a great deal) representing their level of knowledge<sup>58</sup>. For ease of reference, the scores have been grouped together.

***- Compared with spring 2006, slightly more people feel they know a bit about the EU and less people feel they know quite a lot -***

The distribution of responses shows that, in autumn 2006, 22% of people interviewed consider that they know nothing or almost nothing about the European Union (scores 1 and 2). In spring 2006, this figure was significantly lower (17%).

As in spring 2006, the majority of respondents (53%) rate their level of knowledge between 3 and 5, therefore considering their knowledge about the European Union to be fairly limited (+1 point).

The proportion of Europeans that feel they know quite a lot (scores 6 to 8) has gone down from 28% to 22% since spring 2006.

As in spring 2006, only 2% of respondents feel that they know a great deal about the European Union (scores 9 and 10).

---

<sup>58</sup> QA14. Using this scale, how much do you feel you know about the European Union, its policies, its institutions?

Using this scale, how much do you feel you know about the European Union, its policies, its institutions? - % EU

To facilitate the interpretation of responses to this question, the average score obtained on the scale from 1 to 10 is analysed. **The average level of subjective knowledge of European Union citizens in autumn 2006 is 4.2, down from 4.5 in spring 2006.**

The decrease noted in subjective knowledge applies to most segments of the European public with the exception of those who score lowest on the opinion leadership scale. Levels of self-perceived knowledge among this group have not changed in recent years, and, with an average score of 3.2, this group of Europeans has the lowest self-perceived knowledge level. As the table below shows, large differences are also found depending on peoples' level of education<sup>59</sup>.

<sup>59</sup> A table detailing the full results of the socio-demographic analysis of QA14 can be found in the annexes.

The average subjective knowledge			
	EB65 Sp. 2006	EB66 Aut. 2006	Diff. Sp. 2006/ Aut. 2006
<b>EU25</b>	<b>4.5</b>	<b>4.2</b>	<b>-0.3</b>
<b>Sex</b>			
Male	4.9	4.5	-0.4
Female	4.1	3.8	-0.4
<b>Age</b>			
15-24	4.4	4.2	-0.2
25-39	4.6	4.3	-0.3
40-54	4.7	4.2	-0.5
55 +	4.3	4.0	-0.3
<b>Education (end of)</b>			
15-	3.8	3.5	-0.3
16-19	4.4	4.1	-0.3
20+	5.3	4.9	-0.4
Still studying	4.7	4.4	-0.3
<b>Opinion leadership</b>			
--	3.2	3.2	=
-	4.3	3.9	-0.4
+	4.9	4.5	-0.4
++	5.8	5.5	-0.3

**The analysis by country** of this question is also based on the average obtained in each country.

Whereas, in spring 2006, six countries had an average subjective knowledge score above 5, in autumn 2006, Luxembourg is the only Member State where this is now the case (5.4; +0.1 point). After Luxembourg, subjective knowledge levels are next highest in Denmark (4.9; -0.2 point), the Netherlands (4.8; -0.6 point) and Austria (4.8; no change).

The lowest subjective levels of knowledge in the European Union are found in the United Kingdom where the average score fell from 4.1 to 3.5. Hungary (3.6; -0.2), Spain (3.7; no change) and France (3.8; -0.7) are the other countries with an average score below 4.

As regards the accession countries, self-perceived knowledge levels remained stable in Romania (4.5; +0.1 point) but went down slightly in Bulgaria (4; -0.3 points).

The previously noted gap between the two candidate countries has more or less disappeared due to an increase in Turkey (4.1; +0.4 points) and a drop in Croatia (4.3; -0.3 points).

How much do you feel you know about the European Union, its policies, its institutions?

Scale from 1 "know nothing at all" to 10 "know a great deal" - Average

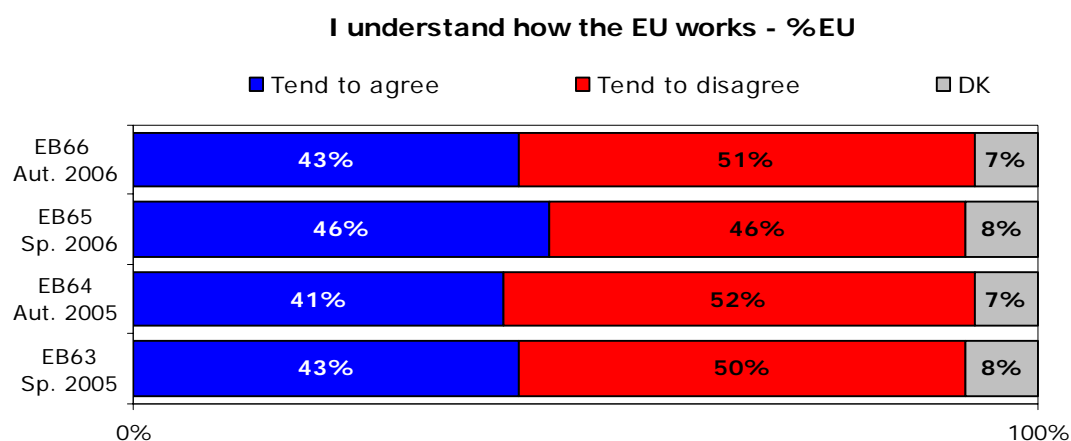

#### 4.1.2. Understanding the way the European Union works

##### - Drop in understanding the way the European Union works -

In line with the results presented in the previous section, a slightly smaller proportion of citizens than in spring 2006 now understand how the European Union works: 43%, down from 46%<sup>60</sup>.

The majority of respondents tend to disagree with the statement (51%, +5 points) and a further 7% of respondents indirectly state that they do not understand the way the European Union works by choosing the "don't know" response.

Socio-demographic analysis shows large cleavages between the various segments of the European population. Compared with people who left school before the age of 15, those who stayed in full-time education until the age of 20 or older are twice as likely to feel they understand the way the European Union works (58% vs. 27%). The gap is even more extreme for the opinion leadership index: 24% of those who score lowest on the scale feel they understand how the European Union works compared with 66% of those who score highest on the scale<sup>61</sup>.

Geographical analysis shows that the feeling that one understands the way the European Union works continues to be more widely held in the 10 new Member States than in the 15 "old" Member States (50% versus 41%, respectively).

A more detailed analysis of individual country results indicates that the feeling that people understand the way the European Union works is now most widespread in Luxembourg (65%; +7 points). Poland now comes in second place (59%; -3 points), followed by Cyprus (58%; +4 points) and Slovenia (57%; -2 points).

<sup>60</sup> QA12.2. Please tell me for each statement, whether you tend to agree or tend to disagree.

I understand how the European Union works

<sup>61</sup> A table detailing the full results of the socio-demographic analysis of QA12 can be found in the annexes.

The lowest level of subjective understanding is now that in Spain (31%; -4 points). Other countries where fewer than four out of ten people feel they understand the way the European Union works are the Czech Republic (34%; -5 points), Italy (36%; -1 point), France (37%; -9 points), Portugal (38%; -2 points), Malta (39%; +5 points) and Ireland (39%; -2 points).

Whilst still comparatively low, subjective understanding increased to 41% in Romania (+4 points) and to 35% in Bulgaria (+5 points). In Croatia (45%) and Turkey (35%; +1 point), levels of understanding did not change since spring 2006.

## 4.2. Effective knowledge about the European Union

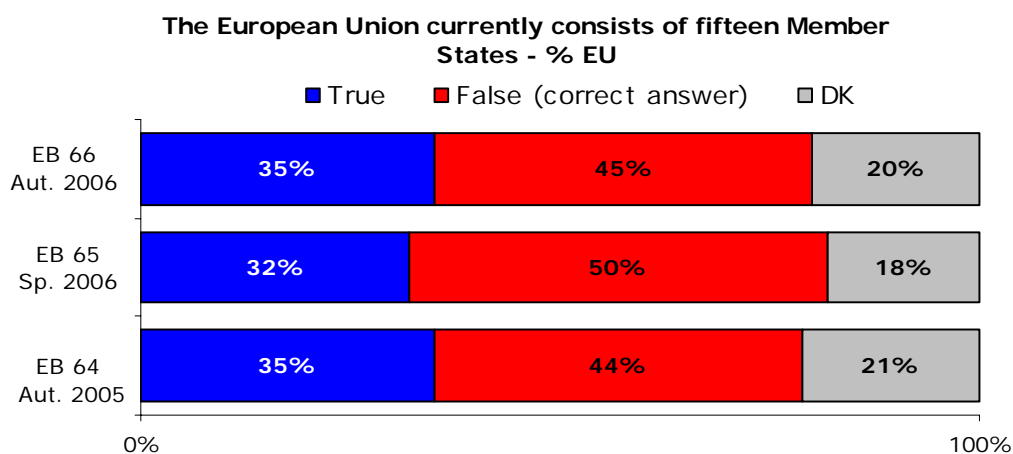

### 4.2.1. The knowledge quiz

People's effective knowledge about the EU is measured by a quiz consisting of three statements about the European Union. Respondents are asked to say whether each statement is true or false<sup>62</sup>.

*- Effective knowledge remains weak -*

#### a) The European Union currently consists of fifteen Member States

In response to the statement that the European Union is composed of 15 Member States, 45% of respondents gave the correct answer, i.e. that it is false, while 35% gave the wrong answer. 20% did not know the answer.

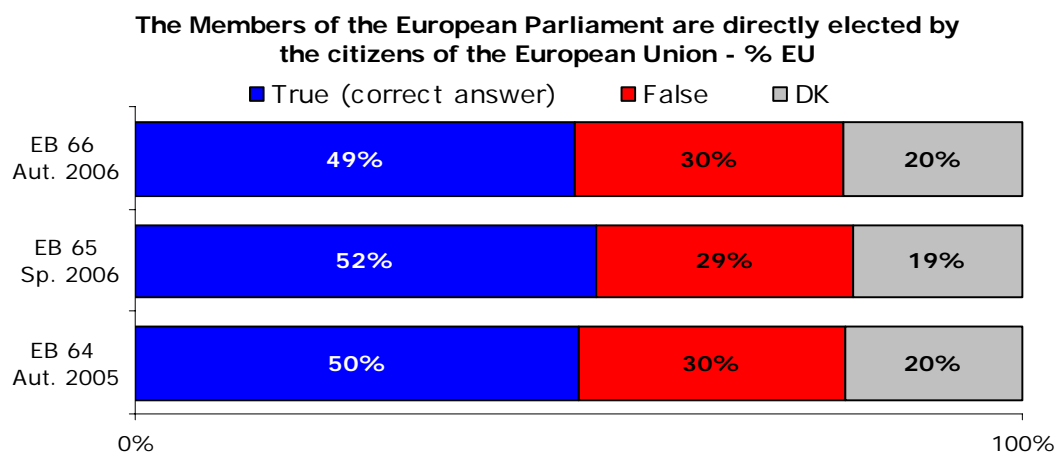

Respondents did less well on this quiz item than in spring 2006, when 50% of respondents gave the correct answer.

<sup>62</sup> QA20. For each of the following statements about the European Union could you please tell me whether you think it is true or false?

**b) Members of the European Parliament are elected directly by European Union citizens**

Less than half of respondents (49%) correctly state that MEPs are elected directly by European citizens, while 30% believe that this is not the case and 20% are unable to give an answer.

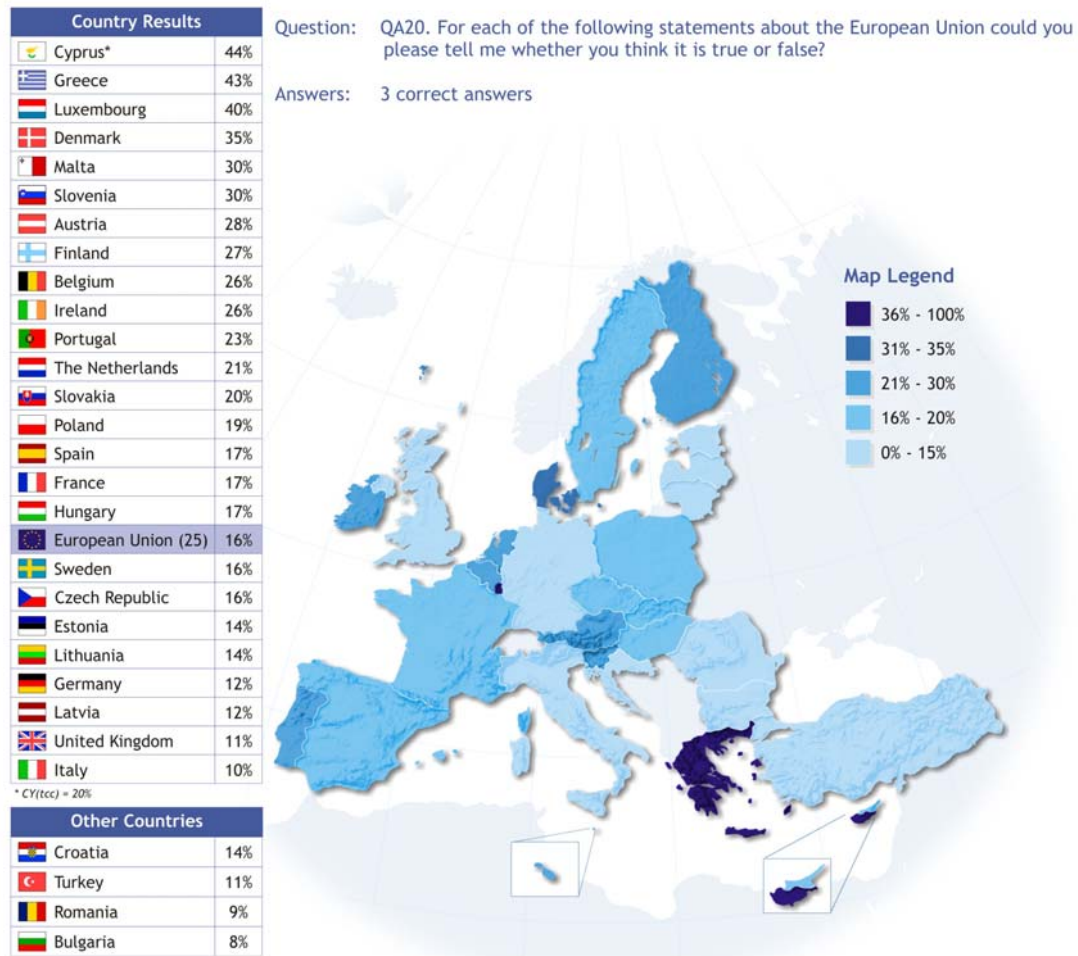

The autumn 2006 results are slightly less positive than those obtained in the spring.

**c) Every six months, a different Member State takes the EU Presidency**

Likewise, less than half of respondents know that every six months, a different Member State takes over the EU Presidency (47%).

A country analysis of the quiz scores shows that effective knowledge is low throughout the European Union but that some countries, nonetheless, do better than others. In Cyprus (44%), Greece (43%) and Luxembourg (40%), two-fifths of respondents answered all three quiz items correctly. These scores compare starkly against Italy, where only 1 respondent out of 10 answered all items correctly. In the two accession countries, the scores are even lower (8% of Bulgarian and 9% of Romanian respondents answered all three items correctly).

A socio-demographic analysis of the quiz scores further indicates that effective knowledge is relatively low among all the groups identified in the survey. Not surprisingly, the people who did best on the quiz are those who stayed in school the longest and those who feel – subjectively – that they know a lot about the EU. However, even among this latter group, only 3 out of 10 respondents answered all three items correctly (31%). A quarter of respondents who completed their full-time education until the age of 20 or older knew the answers to all the items (25%).

#### 4.2.2. Knowledge about the way the European Union's budget is spent

People's perceived use of the European Union's budget is a further measure of effective knowledge<sup>63</sup>.

##### - Administrative overheads remain over-estimated -

The latest survey results show that many European citizens continue to lack accurate knowledge about the use of the European Union's budget.

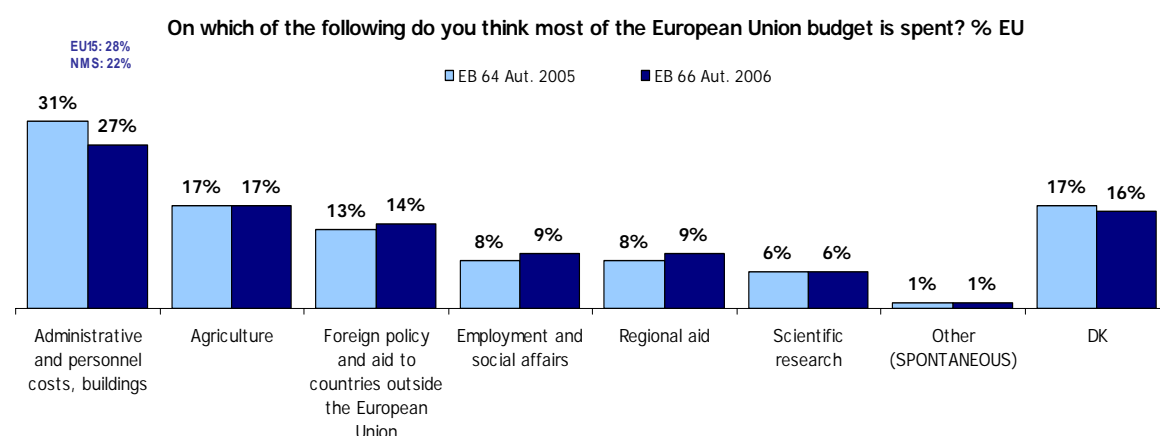

Over a quarter of European citizens (27%) believe that **administrative overheads** represent the European Union's main budget heading. In autumn 2005, this figure was even higher (31%) pointing to a slight improvement in this regard.

However, as in autumn 2005, only 17% of the persons interviewed think that most of the budget is spent on **agriculture**.

Some 14% of respondents believe that the European Union allocates the most important part of its budget to the areas of **foreign policy** and **aids to non-EU countries**.

Expenditure related to **employment and social affairs** and **regional aid** are each seen by 9% of European citizens as the largest Union expenditures. Some 6% of respondents believe that the lion's share of the European Union's budget is devoted to **scientific research**.

Lastly, it is to be noted that 16% of respondents felt unable to express an opinion on this question, thereby affirming their lack of knowledge on this subject.

<sup>63</sup> QA28. On which of the following do you think most of the European Union budget is spent?

On the basis of this measurement, effective knowledge is somewhat better in the 10 new Member States than it is in the 15 'old' Member States, at least as regards views about expenditure on agriculture and administrative overheads:

- ◆ Agriculture: only 16% of respondents in the 15 'old' Member States think that most of the budget is spent on agriculture, compared with 23% in the 10 new Member States.
- ◆ 28% of the persons interviewed in the 15 'old' Member States consider that the European budget is allocated, above all, to the European Union's administrative overheads, compared with 22% in the ten new Member States.
- ◆ Furthermore, in the former EU15 countries, respondents, on average, more frequently indicated that they did not know how the European Union budget is spent than respondents in the new Member States did (17% vs. 13%, respectively).

Looking at the country results in more detail shows that:

- ◆ Finland (40%) and Germany (39%) have the highest percentage of citizens who believe that administrative overheads absorb the major part of the European Union's budget.
- ◆ It is in Denmark that the largest proportion of respondents (48%) considering that agriculture accounts for the biggest part of European expenditure can be found, followed by Sweden (38%).
- ◆ Lastly, it should be noted that a large part of the population in Bulgaria does not know how the European Union budget is spent (44%). In Romania the figure is lower (33%) and on a par with that found in some of the Member States. In Spain, Portugal (both 32%) and Cyprus (31%), over 3 out of 10 respondents were also unable to express an opinion.

### 4.2.3. Knowledge about the right of access to information

Lastly, the survey measures whether people know that they have the right to request access to non-published documents of European Union institutions<sup>64</sup>.

#### - Very low awareness of the right to request access to EU documents -

Only a very small minority of respondents (16%) answered in the affirmative that they know they have the right to request access to non-published documents of European Union institutions.

---

Question: QA17. Did you know, that you have the right to request access to non-published documents of European Union institutions?

---

Apart from the 40% of citizens who feel they know a lot about the European Union, this is a right that very few citizens are aware of. Highest awareness levels are noted among managers (27%) and people who left full-time education aged 20 or older (24%)<sup>65</sup>.

In the Member States, awareness of this right ranges from 10% in Estonia to 29% in Luxembourg. In Bulgaria and Romania, 10% and 15% of respondents respectively know that they have the right to request access to non-published documents of the EU institutions.

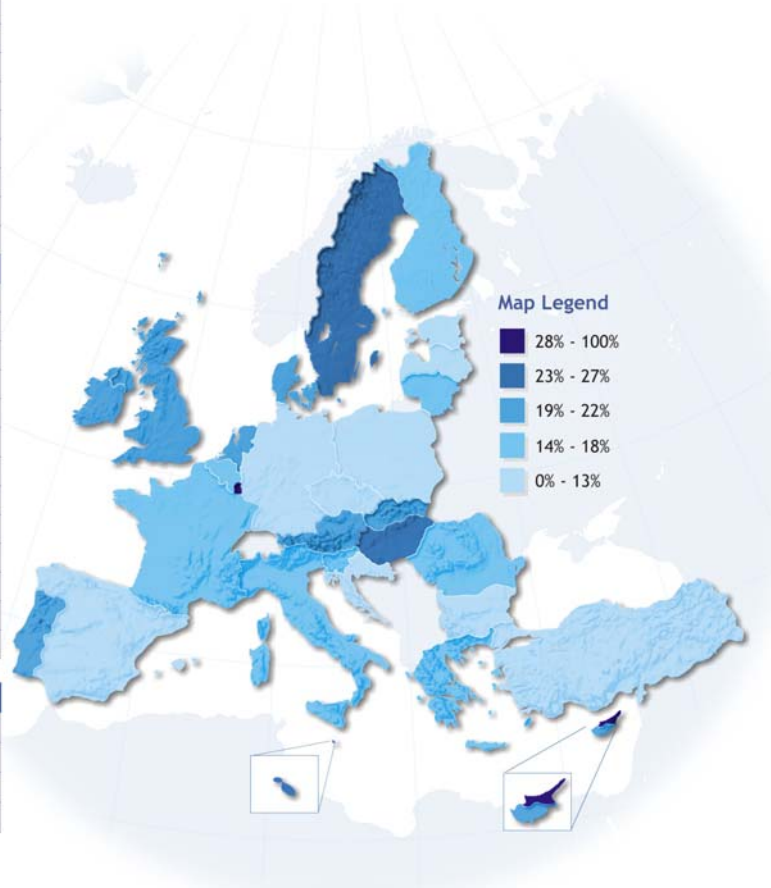

---

Question: QA17. Did you know, that you have the right to request access to non-published documents of European Union institutions?

Answers: Yes

### 4.3. Looking for and finding information about the European Union

*- Citizens rarely look for information about the EU but say that information is easy to find -*

One EU citizen in three sometimes (27%) or often (6%) looks for information about the European Union, its policies or its institutions<sup>66</sup>. The majority rarely (29%) or never (37%) looks for information.

---

Question: QA15. Are you looking for information about the European Union, its policies, its institutions...?

---

<sup>66</sup> QA15. Are you looking for information about the European Union, its policies, its institutions often, sometimes, rarely or never?

Frequency of searching for information about the EU is most strongly correlated with education and self-perceived knowledge of the European Union: the longer people stayed in full-time education and the more they feel they know about the European Union, the more often they look for information about the European Union.

**Are you looking for information about the European Union, its policies, its institutions ...?**

	Often	Sometimes	Rarely	Never	DK
<b>EU25</b>	<b>6%</b>	<b>27%</b>	<b>29%</b>	<b>37%</b>	<b>1%</b>
<b>Education (End of)</b>					
 15-	4%	21%	24%	50%	1%
16-19	5%	27%	30%	38%	0%
20+	10%	35%	31%	23%	0%
Still Studying	5%	31%	34%	29%	1%
<b>EU Knowledge</b>					
 1-3	2%	13%	25%	60%	0%
4-7	6%	38%	33%	22%	0%
8-10	33%	39%	18%	10%	0%

There are also very large differences in the reported frequency between the Member States. Thus, it is seen that, in Luxembourg, around half of the respondents sometimes or often look for information about the EU (51%), whereas in Spain this is reported by 1 respondent in 5 (19%).

Romanian respondents report that they seek information more frequently than respondents in Bulgaria: in the latter country, only 22% sometimes or often look for information about the EU, compared with 38% in Romania.

In Croatia (30%) and Turkey (32%), just under a third of respondents sometimes or often look for information about the European Union.

Whilst the majority of EU citizens rarely look for information about the EU, **close to half judge that information about the European Union, its policies or its institutions is easy to find (48%)**. Around a third of respondents find it difficult (34%) and one fifth lack an opinion (18%).

In other words, **if EU citizens do not look regularly for information about the EU, it is not because it is difficult to find it**. People's self-perceived knowledge about the EU or their lack of interest for EU information could be two different causes explaining it.

---

Question: QA16. Do you find it easy or not to find information about the European Union, its policies, its institutions?

---

In addition to education and self-perceived knowledge, the perceived ease of finding information is furthermore strongly correlated with age: **the younger people are, the easier they find it to find information about the European Union.**

**Do you find it easy or not to find information about the European Union, its policies, its institutions ...?**

	Very easy	Fairly easy	Fairly difficult	Very difficult	DK
<b>EU25</b>	<b>9%</b>	<b>39%</b>	<b>25%</b>	<b>9%</b>	<b>18%</b>
<b>Age</b>					
 15-24	15%	46%	18%	5%	15%
25-39	10%	45%	22%	6%	16%
40-54	8%	40%	26%	8%	17%
55 +	6%	30%	29%	14%	22%
<b>Education (End of)</b>					
 15-	4%	25%	29%	16%	26%
16-19	7%	39%	26%	9%	18%
20+	13%	49%	23%	5%	11%
Still Studying	17%	51%	15%	4%	12%
<b>EU Knowledge</b>					
 1-3	5%	27%	25%	14%	30%
4-7	10%	48%	26%	5%	10%
8-10	29%	45%	16%	6%	4%

It is interesting to note that citizens in the ten new Member States tend to feel it easier to find information about the European Union than their fellow citizens in the former EU15 nations (55% vs. 46%). Latvia (69%) and Slovenia (68%) top the list of numbers of respondents that say it is easy to find information about the European Union. At 38%, Spain is the only country where fewer than 4 out of 10 respondents find it easy to find information. Readers are reminded that Spain is also the country where people are least likely to look for information (19%).

Here, as well, Bulgaria and Romania differ from each other, with more respondents in Romania than in Bulgaria reporting it easy to find information about the EU (50% vs. 35%).

Close to half of the respondents in Croatia find it easy to find information (47%), whilst in Turkey the figure is slightly lower (41%).

Question: QA16. Do you find it easy or not to find information about the European Union, its policies, its institutions?

Answers: Very easy + Fairly easy

## IV. THE CURRENT ROLE OF THE EUROPEAN UNION

This section examines the following areas:

1. **The current role of the EU**: what actions citizens feel the EU should prioritise, the extent to which people support a role for the Union in taking policy decisions and the role of the European Union vis-à-vis the United States.
2. **Current policy issues**: Support for the common security and defence policy, the common foreign policy and the single currency.

## 1. The current role of the European Union

### 1.1. The European Union's priorities

#### *- Fighting poverty, social exclusion and unemployment remain the top priorities -*

When it comes to the actions that European citizens think that the EU should carry out as a matter of priority<sup>67</sup>, **fighting poverty and social exclusion** (43%) along with **fighting unemployment** (40%) rank first.

In a second step, two other things are seen as priorities for the European Union by more than a quarter of European citizens: **maintaining peace and security in Europe** (29%) and **fighting terrorism** (27%).

At a slightly lower level, but still figuring prominently amongst responses, is **protecting the environment** (22%). Almost similar proportions of respondents believe that **fighting illegal immigration** (19%) and **getting closer to European citizens** (18%) should be given priority. All the other tested areas are seen as lesser priorities.

Regarding two actions, enlargement and fighting organised crime, two different wordings were tested in order to see whether **variation in the terminology has** an impact on the results. For half of the sample, the item on enlargement was referred to as "welcoming new Member countries" and the one on fighting organised crime was phrased as "fighting organised crime and drug trafficking". The other half of the sample was asked about the same actions, but with **different wordings**: "Prepare a new enlargement of the EU", and simply "fighting against organised crime".

It is evident that, although there is a 2-point difference when we speak just about "organised crime" without mentioning "drug trafficking", the impact of variation in the wording is not significant. All the other items were asked in exactly the same way in both splits and these results were consistently similar (1-point maximum difference), as it can be seen in the table below (page 168). Thus, in order to facilitate the analysis of the results, they are presented for the whole sample: on the graph page 169, the items are averages of the results obtained in the two halves of the sample.

---

<sup>67</sup> QA26. From the following list of actions, could you tell me what should be for you, the three actions that the European Union should follow in priority?

<b>From the following list of actions, could you tell me what should be, for you, the three actions that the European Union should follow in priority?</b>	
<b>Split A</b>	<b>Split B</b>
<b>Welcoming new Member Countries 4%</b>	<b>Prepare a new enlargement of the EU 4%</b>
Getting closer to European citizens, for example by giving them more information about the European Union, its policies and its institutions 18%	Getting closer to European citizens, for example by giving them more information about the European Union, its policies and its institutions 18%

Don't know 2%	Don't know 2%

Items asked in split A

Items asked in split B

Items asked in both splits

**The three actions that the European Union should follow in priority -  
% EU**

Views on which policy areas the European Union should focus differ somewhat when responses from the old and new Member States are compared. In the new Member States, there are stronger calls for the EU to tackle unemployment as well as poverty and social exclusion compared with the old Member States (55% and 56% vs. 37% and 41%, respectively). In the old Member States, compare to the new Member States, we are more likely to see views that priority should be given to getting closer to citizens (20% vs. 8%), fighting terrorism (29% vs. 19%) and fighting illegal immigration (22% vs. 5%). This pattern largely reflects the differences between the two groups of countries in terms of issues viewed as national concerns. At the country level, there are large variations. For instance, the view that fighting unemployment should be a priority for the EU is held by only 13% of Danish respondents while in Poland, around two out of three interviewees hold this view (65%). The protection of the environment is an important priority for Swedish respondents (50%). This compares sharply with public opinion in Portugal (11%). In terms of terrorism, the country results range from 5% in Portugal to 34% in Denmark while Turkish respondents are even more inclined to believe that fighting terrorism should be an EU priority (40%)<sup>68</sup>.

With regard to the comparison of the results with those observed in Spring 2006, two important points should be underlined.

First of all and foremost, there was one item less in the list for this latest wave. Indeed, "protecting consumers and guaranteeing the quality of products" (12%) is the combination of two items previously tested "guaranteeing the quality of food products" (9% in Spring 2006) and "protecting consumers and guaranteeing the quality of other products" (7% in Spring 2006).

Secondly, as explained previously, there was a difference in the wording used for enlargement and crime for each half of the sample and therefore only half the sample was presented with an identical wording to that of Spring 2006.

The combination of the above elements prevents us from analysing the evolution in results between this latest wave and the previous one, at the EU level, but above all at the country level. We will however, refer to tendencies in terms of the general progression of results.

Compared with Spring 2006, the hierarchy of priorities is quite stable. Fighting terrorism, and, to a lesser extent, the fight against illegal immigration seem to be of higher importance than 6 months ago. Regarding terrorism, the increase in concern at the EU level is due to considerable changes in public opinion in certain countries, namely: the UK, Denmark and France.

---

<sup>68</sup> See part I, sub-chapter 1.5

## 1.2. Joint or national decision-making?

The question about whether decisions should be taken at the national level or made jointly within the EU shows to what extent citizens want the European Union to be involved in a large number of policy areas<sup>69</sup>.

### *- Most widespread support for the fight against terrorism -*

There is widespread consensus among European citizens that decisions with regard to **fighting terrorism** should be made jointly within the European Union (79%). Many also believe decisions should be taken jointly when it comes to **scientific and technological research** (70%), **protecting the environment** and **defence and foreign affairs** (both 64%).

<i>Support for joint-decision making</i>	<b>EU25</b>	<b>EU15</b>	<b>NMS10</b>	<b>Diff. EU15/ NMS10</b>
Fighting terrorism	79%	77%	89%	-12
Scientific and technological research	70%	68%	80%	-12
Protecting the environment	64%	64%	67%	-3
Defence and foreign affairs	64%	62%	73%	-11
Energy	60%	60%	61%	-1
Fighting crime	59%	56%	71%	-15
Support for regions facing economic difficulties	57%	55%	69%	-14
Immigration	57%	55%	67%	-12
Competition policy	54%	53%	57%	-4
Agricultural and fishery	49%	48%	54%	-8
Consumer protection	46%	44%	54%	-10
Fighting unemployment	38%	35%	52%	-17
The education system	29%	28%	35%	-7
Health and social welfare	29%	27%	40%	-13
Taxation	27%	25%	33%	-8
Pensions	23%	21%	35%	-14

It is interesting to find that on average only 38% of European citizens favour joint-decision making when it comes to fighting unemployment, when this is seen as one of the Union's top priorities. However, public opinion varies considerably from country to country. In Sweden, only 20% of people want decisions concerning the fight against unemployment to be taken jointly within the European Union, whereas 55% of people in Poland and Portugal hold this view.

As the table above shows, support for joint decision-making is broader in the new Member States than it is in the old Member States, although the two groups of countries think alike when it comes to decision-making about energy, competition and the protection of the environment.

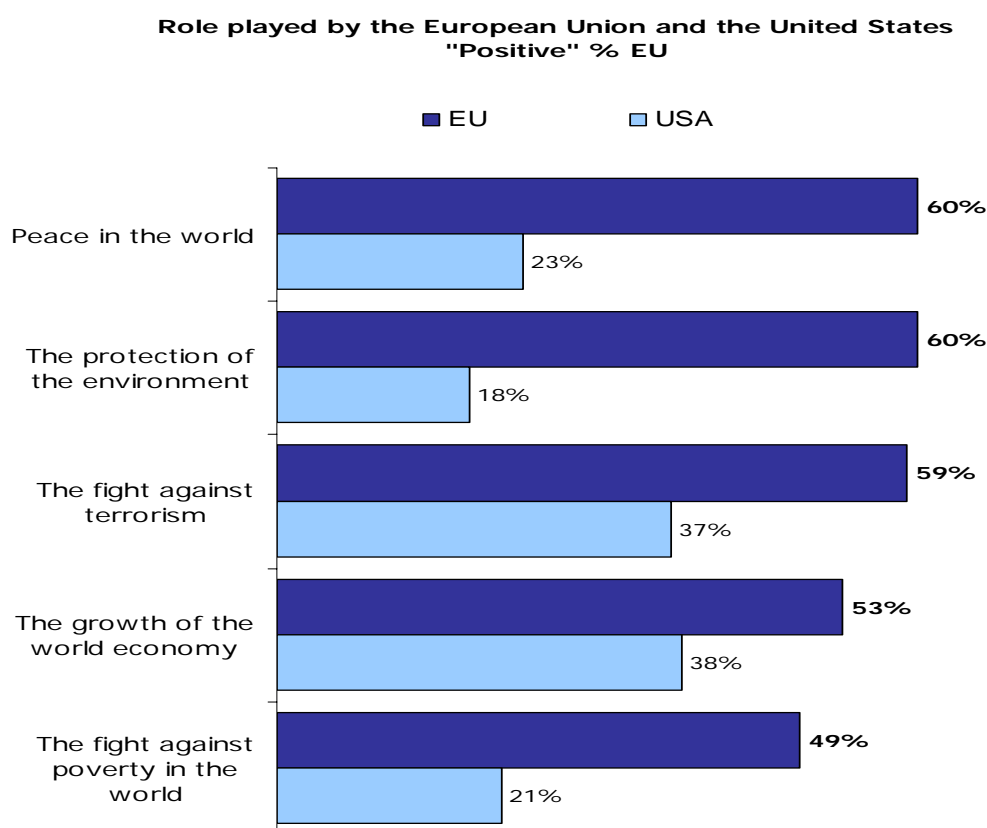

<sup>69</sup> QA24. For each of the following areas, do you think that decisions should be made by the (NATIONALITY) government or made jointly within the European Union?

Public opinion has remained stable since the previous survey (Autumn 2005). The only significant shift that has been recorded is a 3 point increase in the percentage of EU citizens who feel that competition issues should be decided by at the national level (37%, up from 34% in Autumn 2005).

### 1.3. The role of the European Union vis-à-vis that of the United States

#### - Role of the EU much more positively perceived than that of the US -

The perception of the role played by the European Union is broadly positive, certainly in comparison with the role the United States is perceived to play<sup>70</sup>. The difference between the assessment of the persons interviewed with regard to the European Union's action and that of the United States is significant.

The largest difference is found with regards to the role played by the two world powers with respect to protecting the environment: 42 percentage points in favour of the EU. The difference is 37 points in the case of peace in the world. On the other hand, the divergence of opinions is smaller as regards the positive role played by the two entities in boosting world economic growth (15 points).

<sup>70</sup> QA29a. In your opinion, would you say that the United States tend to play a positive role, a negative role or neither a positive nor a negative role regarding...?  
QA29b. And in your opinion, does the European Union tend to play a positive role, a negative role or neither a positive nor a negative role regarding...?

	European Union			United States		
	% positive	% negative	% Neither positive nor negative	% positive	% negative	% Neither positive nor negative
<b>Peace in the world</b>	60%	13%	21%	23%	55%	18%
<b>The protection of the environment</b>	60%	13%	20%	18%	60%	15%
<b>The fight against terrorism</b>	59%	11%	23%	37%	43%	16%
<b>The growth of the world economy</b>	53%	13%	26%	38%	33%	20%
<b>The fight against poverty in the world</b>	49%	16%	27%	21%	50%	22%

Overall, a much higher proportion of citizens in the NMS10 countries give positive assessments of the role of both the United States and the European Union in these five areas. However, even if they are more positive than EU15 citizens, respondents from the NMS10 are still fairly critical regarding the role of the United States related to "peace in the world", "the protection of the environment", as well as related to "the fight against poverty in the world".

In comparison to Autumn 2005, the role of the European Union is now slightly less positively assessed when it comes to peace in the world (-3 points). Conversely, its role in the growth of the world economy is now more positively assessed (+4 points).

At the country level, people in Cyprus tend to be much more critical about the role of the United States than the role of the European Union. When it comes to the protection of the environment, the gap is 73 points in favour of the EU. Conversely, in Italy the gap between the percentage of citizens who positively assess the US and those who positively assess the EU tends to be the smallest.

A further point to make is that although citizens in both Bulgaria and Romania widely assess the role of the EU positively they differ about their assessment of the US when it comes to peace in the world, terrorism, poverty and the protection of the environment. Romanians rate the role of the US more positively than Bulgarians tend to do.

## Perceived role played by the European Union and the United States (by country)

% Positive	The protection of the environment		Peace in the world		The fight against terrorism		The growth of the world economy		The fight against poverty in the world	
	EU	US	EU	US	EU	US	EU	US	EU	US
<b>EU25</b>	<b>60%</b>	<b>18%</b>	<b>60%</b>	<b>23%</b>	<b>59%</b>	<b>37%</b>	<b>53%</b>	<b>38%</b>	<b>49%</b>	<b>21%</b>

## 2. Support for current policy issues

This chapter examines levels of support for three current policy issues: The common security and defence policy, the common foreign policy and the single currency.

### 2.1. The common security and defence policy

#### 2.1.1. Support for the ESDP

#### - Support for the ESDP remains widespread -

European public opinion also **remains very positive** on issues relating to the European Security and Defence Policy (ESDP). On average, 3 out of 4 European Union citizens are in favour of a common security and defence policy, i.e. the same level as in Spring 2006<sup>71</sup>.

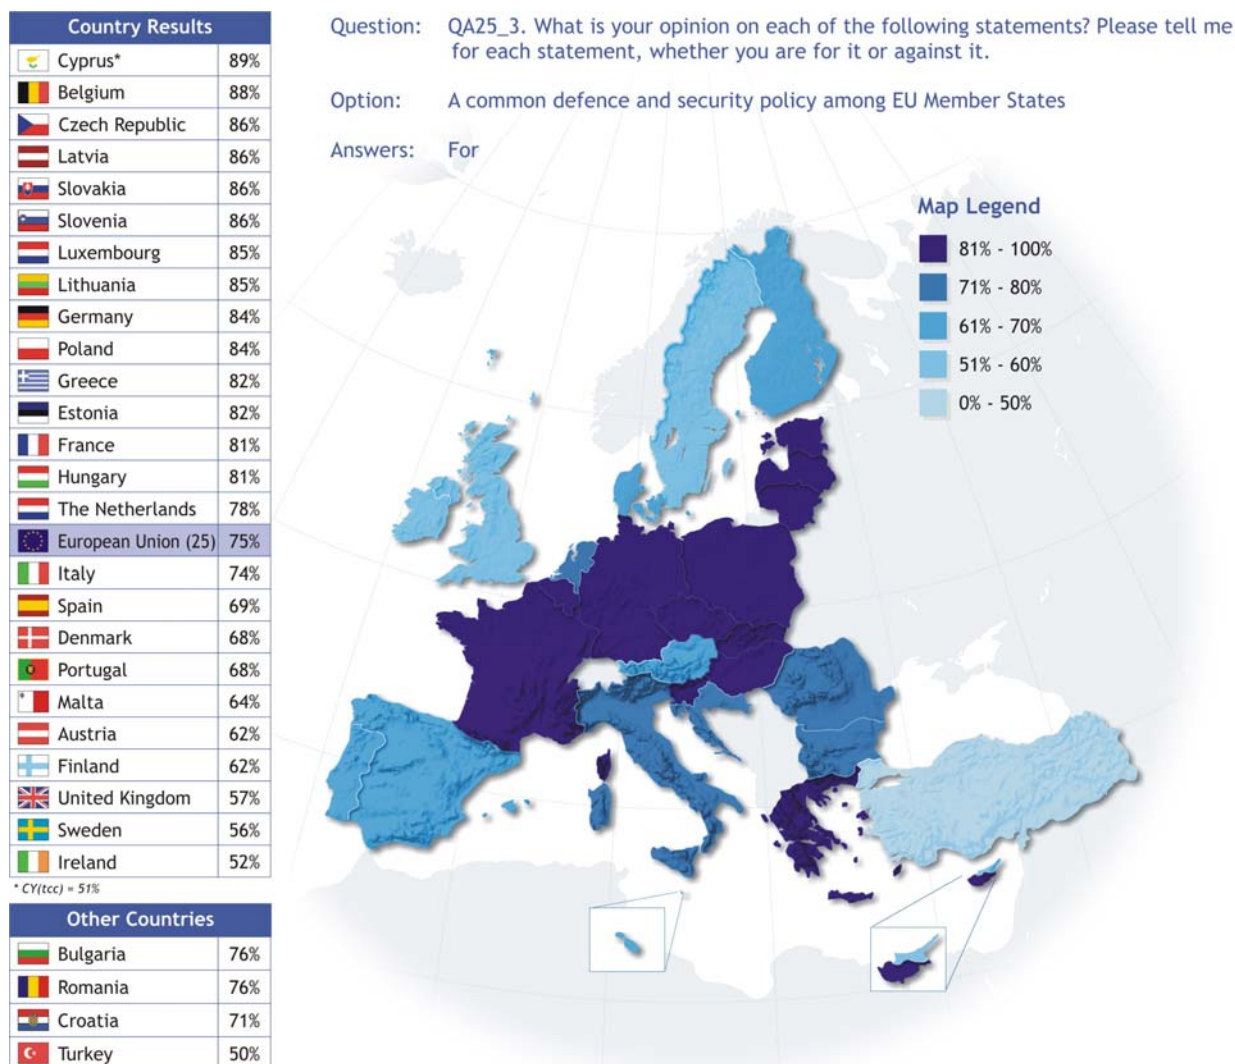

As in Spring 2006, support tends to be even stronger in the ten new Member States: there is a difference of 11 points between the average in the former EU15 countries and that in the ten new Member States (73% and 84% respectively). However, support varies considerably from one country to another; it is the highest in Cyprus (89%; +2 points) and Belgium (88%; +3 points), and the lowest in Ireland (52%; -7 points), Sweden (56%; -3 points) and the United Kingdom (57%; no change).

<sup>71</sup> QA25.3. What is your opinion on each of the following statements? Please tell me for each statement, whether you are for it or against it.

A common defence and security policy among European Union Member States

In Bulgaria and Romania, support now stands at 76% , up from 70% in Bulgaria and 75% in Romania. In the candidate countries, although support has increased in Turkey (50%; +7 points), it has decreased in Croatia (71%; -4 points).

For this dimension, public opinion is fairly homogeneous in socio-demographic terms. However there are significant differences depending on the respondent's education and age. For example, 83% of respondents who studied beyond the age of 20 are in favour of the ESDP compared with 67% of those who left school the earliest, while 83% of managers support the ESDP compared with 68% of house persons.

## Support for the ESDP

Retired	70%	18%	12%
Students	78%	14%	8%

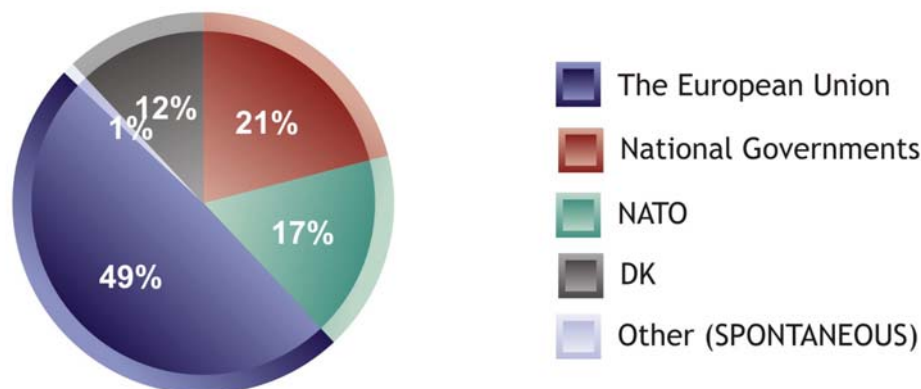

### 2.1.2. Who should take decisions about European defence?

Decisions that concern matters related to European defence are taken at various levels. The Eurobarometer has surveyed which one of three actors– national governments, NATO, or the EU - should take decisions in the European public's view<sup>72</sup>.

**- The EU remains the most popular entity to decide on European defence policy -**

**Around one European citizen in two feels that decisions concerning European defence policy should be taken by the European Union** (49%; +1 since autumn 2005). Just over one-fifth believes that national governments should take these decisions (21%; -2 points), whereas the view that NATO should take these decisions is held by 17% (-1 point) of European citizens.

Question: QA27. In your opinion, should decisions concerning European defence policy be taken by national governments, by NATO or by the European Union?

Public opinion varies considerably from country to country. Comparing firstly the overall view in the ten new Member States with the overall view in the former EU15 countries shows the following:

<sup>72</sup> QA27. In your opinion, should decisions concerning European defence policy be taken by national governments, by NATO or by the European Union?

- ◆ The view that decisions should be taken by the European Union is slightly more widespread in the former EU15 nations than in the ten new Member States (50% vs. 46%).
- ◆ The view that decisions should be taken at national level is slightly more popular in the 'old' Member States (22%) than it is in the new Member States (18%).
- ◆ Conversely, in the new Member States, support for NATO is significantly more widespread: 25% of respondents in these ten nations believe NATO should take decisions about European defence policy, compared with 16% of respondents living in the 15 'old' Member States.

More specifically, an analysis of the national results shows the following:

- ◆ Denmark is the only country where the majority view is that decisions concerning European defence policy should be taken by **NATO** (40%; -5 points). In other countries, this view is shared by a far smaller proportion of the population (with Poland in second place at 29%; -1 point).
- ◆ In quite a few countries, there is significant support for decisions concerning European defence policy being taken at the **national level**. It is the majority view in Ireland (38%; no change). Though not the majority view, 4 out of 10 respondents in Finland (40%; no change) and Sweden (41%; -2 points) want these issues to be decided by their own government. In Denmark (35%; +5 points), Greece (34%; +3 points), Malta (32%; -11 points) and Austria (31%; -4 points), around a third of the public supports this view.
- ◆ In all Member States, except Denmark and Ireland, the most popular opinion is that decisions concerning European defence policy should be taken by the **European Union**. Support for this view is most widespread in Cyprus (74%; -6 points), followed by Luxembourg (66%; +4 points), Greece (61%; -1 points) and Belgium (60%; -1 point).
- ◆ Citizens in Bulgaria (59%; +3 points) are significantly more likely to support EU decision-taking in this area than citizens in Romania (48%; +3 points).
- ◆ In Croatia (47%; +2 points) and Turkey (42%; +4 points), the majority view is that decisions concerning European defence policy should be taken by the European Union.

**In your opinion, should decisions concerning European defence policy be taken by ... ?**

■ The European Union ■ National Governments ■ NATO ■ Other (SPONTANEOUS) ■ DK

Peoples' preferences differ depending on their socio-demographic characteristics, most notably depending on their age and their level of education. The younger people are and the longer they stayed in full-time education, the more they prefer for decisions to be taken by the European Union. In fact, there is a 16-point gap here between people who left school aged 15 or younger and those who stayed in full-time education until the age of 20 or older (42% vs. 58%).

Lastly, public opinion varies somewhat depending on peoples' political views. The more to the right people place themselves on the political scale, the less likely they are to want decisions to be taken by the European Union. This group is more in favour of NATO than people who place themselves on the left of the political scale (22% vs. 15%, respectively).

### Decisions concerning ESDP should be taken by...

## 2.2. Common foreign policy

### - Still broad support for a common foreign policy -

In general support for a common foreign policy continues to be stable with more than two out of three European citizens supporting this idea (68%; +1 point)<sup>73</sup>. The proportion of citizens who oppose a common foreign policy is unchanged at 21%.

Support for one common foreign policy among the member states of the European Union, towards other countries - % EU

There is a difference of 9 points between the level of support in the former EU15 countries and that in the ten new Member States (66% and 75% respectively). Furthermore, there are large variations at country level. In the Member States, support for a common foreign policy is highest in Slovenia (80%; +4 points) and Greece (80%; +3 points), and lowest in the United Kingdom (48%; -2 points) and Sweden (50%; +1 point).

In Romania and Bulgaria, the level of support has increased by 3 percentage points and now stands at 70% in both countries. In the candidate countries, public opinion continues to be significantly more critical in Turkey (39%; -2 points) than in Croatia (65%; -1 point).

<sup>73</sup> QA25.2. What is your opinion on each of the following statements? Please tell me for each statement, whether you are for it or against it.

One common foreign policy among the Member States of the European Union, towards other countries

	Bulgaria	70%
	Romania	70%
	Croatia	65%
	Turkey	39%

Question: QA25\_2. What is your opinion on each of the following statements? Please tell me for each statement, whether you are for it or against it.

Option: A common foreign policy among the Member States of the EU, towards other countries

Answers: For

Support levels for a common foreign policy vary chiefly according to the respondent's occupation and education. 76% of managers support a common foreign policy compared with 59% of house persons. It is also noteworthy that 76% of respondents who studied beyond the age of 20 are in favour of a common foreign policy versus 60% of those who left school the earliest.

### Support for a common foreign policy

	For	Against	DK/NA
<b>EU average</b>	68%	21%	11%
<b>Education (End of)</b>			
 15-	60%	21%	19%
16-19	68%	22%	10%
20+	76%	19%	5%
Still Studying	67%	22%	11%
<b>Occupation</b>			
 Self-employed	74%	21%	5%
Managers	76%	19%	4%
White Collars	72%	20%	7%
Manual Workers	68%	21%	12%
House Persons	59%	19%	21%
Unemployed	65%	24%	11%
Retired	64%	21%	14%
Students	67%	22%	11%
<b>EU knowledge</b>			
 1-3	59%	22%	18%
4-7	74%	20%	6%
8-10	77%	19%	5%

In terms of EU knowledge, there is a difference in support for a common foreign policy of 18 percentage points between respondents who feel that they know a great deal about the European Union and those who feel that they know very little (77% versus 59%).

### 2.3. Support for the single currency

#### - Support for the single currency remains stable -

Nearly 5 years after the Euro was introduced in twelve European Union Member States, 60% of all respondents (regardless of whether they are part of the euro zone or not) state that they are in favour of European Monetary Union with a single currency, the euro<sup>74</sup>. Since spring 2005, public opinion has been stable, at least with respect to the average EU25 results.

In the euro zone countries<sup>75</sup>, support for the single currency ranges from 49% in Greece to 87% in Ireland. In the ten new Member States that joined the EU in 2004, it varies between 43% in Cyprus and 83% in Slovenia.

Support for the Euro remains least widespread in the United Kingdom (29%). In Denmark and Sweden, the two other former EU15 countries which did not introduce the Euro, support for the Euro is much more widespread than it is in the United Kingdom: 51% in Sweden and 53% in Denmark.

Support for the single currency has increased significantly since spring 2006 in Romania, 7 out of 10 citizens are in favour of the single currency (+5 points) and in Bulgaria this applies to 66% of citizens (+4 points).

In the candidate countries, support for the euro has also increased. In Croatia, 63% are now for the single currency (+4 points); in Turkey, it has increased from 34% to 40%.

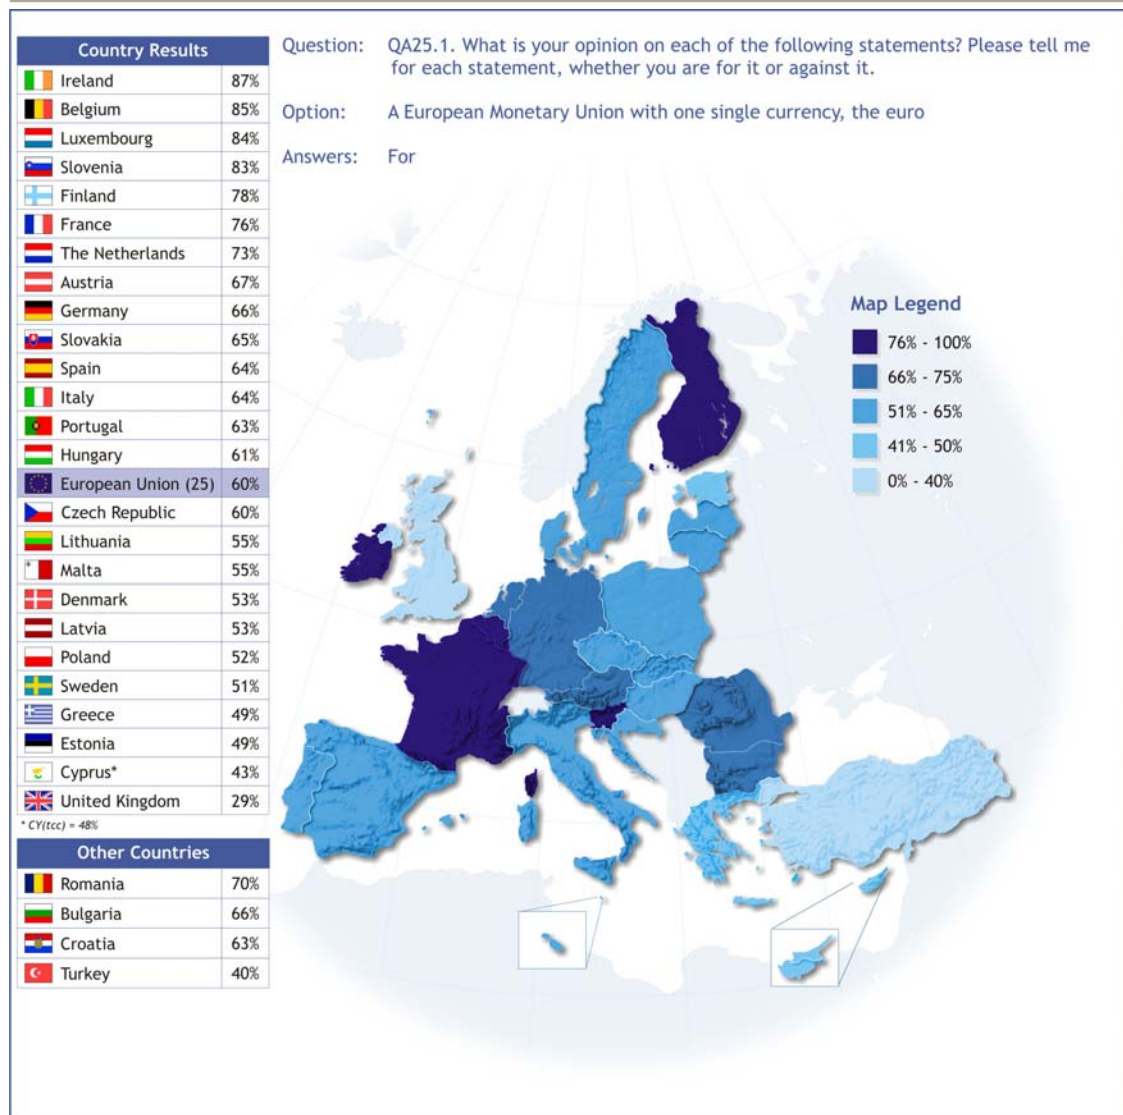

Public opinion about the Euro is influenced by various factors ranging from the economic climate in a country to specific developments related to the Euro.

<sup>74</sup> QA25.1. What is your opinion on each of the following statements? Please tell me for each statement, whether you are for it or against it.

A European Monetary Union with one single currency, the euro

<sup>75</sup> As the survey was carried out in Autumn 2006, the Eurozone did not yet include Slovenia.

Consequently, at country level, support for the Euro sometimes shows large shifts from one survey to the next. In the period between the spring 2006 survey and the autumn 2006 survey, public approval of the Euro increased in fourteen Member States. The largest increases are noted in Lithuania (+9 points), Malta (+8 points), Latvia and Austria (both +7 points). Hungary (-5 points), Italy (+5 points in the % that is against the euro) and Cyprus (-3 points) are the only countries where support for the euro is now lower.

Looking at different socio-demographic groups, support for the Euro is most widespread among<sup>76</sup>:

- ◆ Managers and citizens with the highest level of education (both 73%)
- ◆ Citizens who feel most well-informed about the European Union (72%)
- ◆ "Opinion leaders" (71%)
- ◆ People to the left of the political scale (68%)
- ◆ Students (67%).

Opposition to the Euro is most widespread among:

- ◆ People who left full-time education aged 15 or younger (42%)
- ◆ Unemployed people (40%)
- ◆ People who are opposed to a European Constitution (64%)
- ◆ Respondents who have a negative image of the EU (67%).

Generally speaking, attitudes towards the Euro are strongly related to people's general attitude towards the European Union.

## V. THE FUTURE ROLE OF THE EUROPEAN UNION

In this section, the focus is on the future role of the European Union. In particular, we analyse the following points:

1. **Europe in the future**: best ways to ensure the future of Europe, progression towards a European political union, the perceived and desired speed of building Europe and the perception of a two-speed Europe.
2. **European constitution**: support and need for *a* European Constitution in general, support for *the* European Constitution in particular, impact and future of the European Constitution.
3. **Further enlargement**: support for future enlargement, which countries should join and the question of Turkey.

## 1. Europe in the future

### 1.1. Best ways to ensure the future of Europe

*- Comparable living standards remain the key factor -*

Even more so than in spring 2006, EU citizens consider that **the best way to ensure the future of Europe is to have comparable living standards**: 55% consider this to be most helpful for the future of Europe (+4 points), followed by 30% who consider a common constitution to be most helpful (+5 points)<sup>77</sup>.

#### Best ways to ensure the future of Europe - % EU 25

With regard to the socio-demographic variables, rather than real cleavages in opinion, what we see is differences in terms of intensity of opinion. The higher a respondent's level of education, the more they regard comparable living standards (48% for those who finished school at 15 or before, 60% for those who left full time education at 20 or older), a common constitution (23%, 40%) and the introduction of the Euro (19%, 26%) as being helpful for the future of Europe.

At the country level, the degree to which citizens view **comparable living standards** as the most helpful factor ranges from 33% in Italy to 81% in Poland. Finland, Ireland and Luxembourg are the only three countries where this item is not chosen as the main priority, although it is, nonetheless, widely expressed in these countries (48%, 40% and 38%, respectively).

It is important to highlight the difference of 25 percentage points between the new Member States and the former EU15 countries in the share of people who consider comparable living standards to be most helpful for the future of Europe (76% vs. 51%,

<sup>77</sup> QA50. Which two of the following would you consider to be most helpful if anything, for the future of Europe? (maximum 2 answers)

respectively). This considerable difference highlights the extent to which citizens in the new Member States place comparable living standards at the heart of their concerns.

In Bulgaria and Romania, comparable living standards are also the factor most widely cited as best ensuring the future of Europe. However, somewhat higher percentages are noted in Bulgaria (72%) than in Romania (56%). An even stronger cleavage is noted between the two candidate countries: in Croatia, 73% consider comparable living standards as the most helpful factor, compared with a figure of only 30% in Turkey.

The **introduction of a common Constitution** is mentioned more frequently by citizens of the former EU15 nations (31%) than by those of the ten new Member States (21%). The extent to which citizens view the introduction of a common Constitution as the most helpful factor ranges from 14% in Portugal to 40% in Germany. It should be noted that France and the Netherlands score 'high' on this item (both 36%), despite the results of the two referenda organised in these countries for the ratification of the European Constitution. It should be noted, furthermore, that in all new Member States except Slovenia and in all former EU15 countries - except Greece, Spain, Ireland, Luxembourg, Portugal where public opinion remained stable in this regard - there are now more people who consider the introduction of a common Constitution to be the most helpful than was the case in spring 2006.

In Bulgaria (27%) and Romania (23%) around a quarter of respondents consider the introduction of a common Constitution to be most helpful.

In Finland, Ireland and Luxembourg, the **introduction of the euro in all EU countries** is considered the most helpful element for the future of Europe (49%, 45% and 43%, respectively). This opinion is least widely expressed in Spain (11%). With regard to the three 'old' Member States that did not introduce the euro, a cleavage is noted between Denmark and Sweden, on the one hand, and the United Kingdom, on the other. In the latter, only 14% consider the introduction of the euro throughout the EU as helpful for the future of Europe, whereas, in Denmark and Sweden, one-third of the public holds this view. In the ten new Member States, of which none had the euro at the time of the survey<sup>78</sup>, the view that the introduction of the euro is most helpful for the future of Europe ranges from 16% in Cyprus to 31% in Hungary and Malta.

<sup>78</sup> Slovenia introduced the Euro on 1 January 2007, several months after the survey was fielded (Autumn 2006).

In Bulgaria (25%) and in Romania (33%), a significant minority believes that the introduction of the euro in all EU countries is important for the future of Europe. In the two candidate countries, this view is less widely held (20% in Croatia and 10% in Turkey).

## 1.2. The evolution towards a European political union

### - Stable support for the development towards a European political union -

As in autumn 2005, more than one out of two respondents is in favour of the development towards a European political union (54%; -1 point)<sup>79</sup>. Three out of ten are against such a development (-1 point) and 15% (+1 point) lack an opinion.

On average, the desire for a European political union is more widespread in the ten New Member States (64%; +4 points) than it is in the former EU15 countries (52%; -2 points). In the ten new Member States (NMS10), support remains most widespread in Slovenia (77%; +6 points) and Slovakia (77%; +5 points). It is least widespread in Estonia (59%; +6 points) and Latvia (59%; +1 point). Hungary is the only NMS10 country where compared to Autumn 2005 fewer people now support the idea of the development towards a European political union (62%; -5 points). In Cyprus and in Malta, support remains quite stable but opposition towards a European political Union has fallen by 6 percentage points in both cases.

There is more variation among the fifteen old Member States (EU15), where support levels range from 31% in the United Kingdom (+1 point) to 73% in Greece (+5 points). Support for the development towards a European political union is now less strong in Italy (-6 points), Luxembourg (-5 points), Spain (-4 points) and France (-3 points). In the latter two countries, this drop in support did not result in an increase in opposition levels.

In Romania (74%; +2 points) and Bulgaria (72%; +3 points), over 7 out of 10 citizens are very receptive of the idea of a European political union.

Lastly, in the candidate countries, support for a European political union is now significantly lower than it was in autumn 2005. In Turkey, support has gone down from 64% to 55% and, in Croatia it has fallen from 59% to 50%.

<sup>79</sup> QA11. Are you, yourself, for or against the development towards a European political union?

## Support for the development towards a European political union

Support for a European political union varies depending on the following socio-demographic factors:

- ◆ **Education:** 65% of students support the concept compared with 45% of those who left full-time education before they reached age 15.
- ◆ **Age:** 61% of young people aged between 15 and 24 support the concept compared with 49% of those aged 55 and over.
- ◆ **Occupation:** 63% of managers favour a European political union compared with 47% of house persons.
- ◆ **Opinion leadership:** 64% of those who score highest on the index support the concept, while only 43% of those who score lowest on the scale agree.
- ◆ **Self-perceived knowledge:** 68% of people who feel they know a great deal about the European Union support the concept compared with 44% of people who feel they know very little about it.

It should be noted that differences in opposition levels are relatively small, while there are relatively large differences in the degree to which people lack an opinion. For instance, only 7% of managers lack an opinion, compared to 23% of house persons.

As might be expected, the most important determinant of support for a European political union is people's general acceptance of the European Union. Citizens with a positive image of the European Union express widespread interest in a political union (79%) whereas those with a negative image are mostly against a European political union (76%).

### Support for the development towards a European political Union

	For	Against	DK
<b>EU25</b>	<b>54%</b>	<b>30%</b>	<b>15%</b>
<b>Image of the EU</b>			
 Positive	79%	14%	8%
Neutral	45%	31%	24%
Negative	14%	76%	10%

### 1.3. The perceived and desired speed of building Europe

The perception of the speed of building Europe is measured in the Eurobarometer by a visual graph showing a moving figure linked to values. An average is calculated on that basis<sup>80</sup>. This question distinguishes between the perceived current and desired speed of building Europe.

***-The gap between the current speed and the desired speed of building Europe stays the same -***

**Both the perceived current speed and the desired speed of building Europe have remained stable since autumn 2005.** At the European Union level, there is a +0.9 point differential between the current speed and the desired speed.

Citizens in Greece (6.0), Portugal and Poland (both 5.7) continue to have the most pronounced wish to see the building of Europe go faster. There is a differential of 2.5 in Greece, 2.4 points in Portugal and 2 points in Poland between the current speed of building Europe and the desired speed.

In Denmark and the United Kingdom, those interviewed seem to be satisfied with the speed of building Europe since they give more or less the same score to the current perceived speed and the desired speed (0 and -0.1, respectively).

Austria is, as was the case in autumn 2005, the country where respondents are most concerned about the current speed of building Europe and would like to see it slow down (+0.7). Together with respondents in the UK, they give the lowest score to the desired speed for building Europe (both 3.8).

Citizens in Bulgaria and Romania would like to see the building of Europe speeded up.

<sup>80</sup> QA13. a) In your opinion, what is the current speed of building Europe? Please look at these figures. N° 1 is standing still, N° 7 is running as fast as possible. Choose the one which best corresponds with your opinion of the current speed of building Europe.

b) And which corresponds best to the speed you would like?

In the candidate countries, people would also like to see the building of Europe speeded up, particularly so in Turkey (+2.1 points).

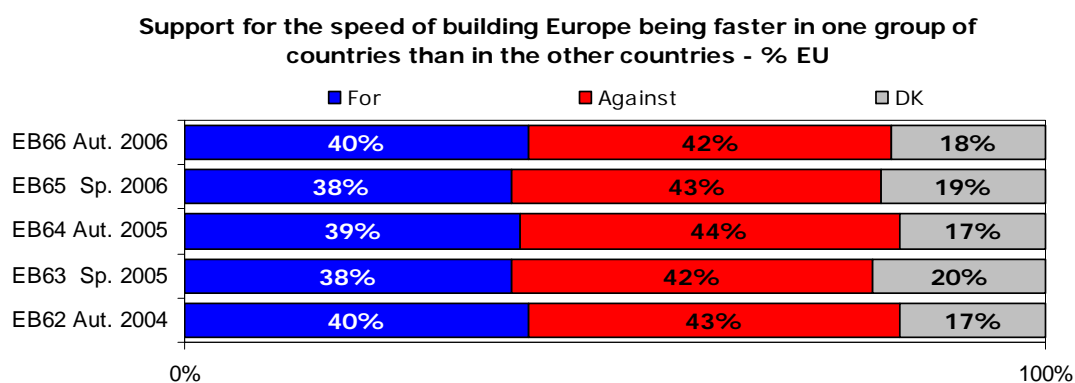

The table below shows the difference that exists, for each Member State, between the perceived speed of building Europe and the desired speed.

	Current speed	Desired speed	Diff. current / desired speed
<b>EU25</b>	<b>3.8</b>	<b>4.7</b>	<b>-0.9</b>

TR	3.3	5.4	-2.1

#### 1.4. Towards a “two-speed” Europe?

##### - European opinion is still divided on the idea of a two-speed Europe -

The idea of a two-speed Europe whereby the speed of building Europe is faster in one group of countries than in other countries is welcomed by four out of ten respondents (+2 points). However, about the same proportion of respondents are against this idea (42%; -1 points). Thus, and in line with previous results, citizens in Europe remain divided about the idea of a two-speed Europe<sup>81</sup>.

The averages conceal a great deal of variation between the Member States, and since spring 2006, public opinion on this issue has changed considerably in a number of countries.

There are now five Member States where an outright majority would favour a two-speed Europe, namely Estonia (58%), the Czech Republic (56%), Greece (53%), Denmark (51%) and Slovenia (51%). Most notable in this list is the Czech Republic where support for a two-speed Europe increased by 16 points. In spring 2006, the only three countries where an outright majority was noted were Estonia, Hungary (both 53%) and Denmark (50%).

Public support for a two-speed Europe also improved strongly in Latvia (45%; +15 points) and, in several other countries, significant increases in support are noted. In fact, Hungary (48%; -5 points) and Belgium (41%; -3 points) are the only two Member States where support is now slightly less strong than in spring 2006. The idea remains least popular in Finland (24%; +1 point) and the United Kingdom (29%; +4 points).

In Romania support for a two-speed Europe increased (38%; +7 points) but, in Bulgaria, it is now less popular (30%; -9 points).

<sup>81</sup> QA25.6 What is your opinion on each of the following statement? Please tell me for each statement, whether you are for it or against it.  
The speed of building Europe being faster in one group of countries than in the other countries

### Support for the speed of building Europe being faster in one group of countries than in the other countries - %EU

In evaluating these results, it should be borne in mind that the idea of a two-speed Europe is an abstract concept for many people. On average, one respondent in five lacks an opinion (18%). In some countries, "don't know" replies were given by around a third of the respondents (34% in Cyprus and Bulgaria, 33% in Malta, 31% in Romania and 30% in Ireland). This also affects the distribution of responses for the socio-demographic groups covered in the survey with "don't know" replies ranging from 12% among people who stayed in school until age 20 or older to 29% among manual workers. The point to make here is that opposition levels are fairly stable among all the groups; support levels fluctuate mostly depending on the proportion of "don't know" responses.

## 2. European Constitution

### 2.1. Support for a Constitution

#### 2.1.1. Support for a European Constitution

##### - Support for a European Constitution remains stable -

Support for the idea of a European Constitution **remains stable**. Over 6 out of 10 European citizens continue to be in favour of a constitution for the European Union (63%; +2 points), against just over 2 out of 10 who oppose this idea (21%; -1 point)<sup>82</sup>.

Question: QA25.5. What is your opinion on each of the following statements? Please tell me for each statement, whether you are for it or against it.

Option: A constitution for the EU

It is important to emphasise that this question measures **the extent to which people agree with the concept of a Constitution for the European Union and that it is not an evaluation of the content of the current Constitution**. Thus, the results should not be seen as an intention of how citizens would vote if referenda were to be organised in certain countries nor be linked directly to the outcome of referenda that have already been held.

<sup>82</sup> QA25.5. What is your opinion on each of the following statement? Please tell me for each statement, whether you are for it or against it.  
A constitution for the European Union

Large differences exist between Member States in the degree to which the idea of a European Constitution is supported by the public. The idea is most favourably received by the citizens in Belgium (81%), followed by people in Slovenia (79%) and Cyprus (75%). The idea is least positively received in the United Kingdom (43%), Sweden (44%) and Denmark (47%). Unlike in spring 2006, there are now no Member States where fewer than 4 out of 10 citizens support the idea of a European Constitution. Hungary is the only country where support fell (74%; -4 points) and opposition increased (11%; +3 points) significantly. In Italy, only a significant increase in opposition levels has been recorded (16%; + 3 points). Finally, Portugal is the only Member State where support and opposition increased (by +6 and +3 points, respectively) and where the level of "don't know" replies dropped accordingly (from 36% to 25%).

Support for the idea increased from 63% to 67% in Romania and from 59% to 63% in Bulgaria. However, in Bulgaria, opposition also increased (from 7% to 11%). The most significant development in this country is the significant drop in respondents lacking an opinion (from 35% to 26%).

Similarly, in the candidate countries, support also increased slightly. It remains least well received in Turkey (48%; +3 points).

## Support for a constitution for the European Union

As the following table shows, in the majority of countries the percentage of people supporting the idea of a European Constitution is more widespread than it was in spring 2006<sup>83</sup>.

*"A constitution for the European Union"*

% For	Sp.2006	Aut.2006	Diff. Sp.2006/ Aut.2006

TR	45%	48%	+3

<sup>83</sup> The table only shows changes in the % 'for' responses. Readers can find the full results of QA25 in the annexes.

Examining opinion by social and demographic characteristics, fairly small variations between groups in the percentage who are **against** the concept of a Constitution may be seen. In contrast, **support** for the idea is higher in particular among the more highly educated, opinion leaders and those with high levels of EU knowledge. With opposition levels largely constant, these variations in support are mirrored by differences in the percentages of those saying they lack an opinion on this issue (less educated, low on opinion leadership index, low levels of EU knowledge)<sup>84</sup>.

### 2.1.2. Need for a European Constitution

**- The majority of EU citizens find that a Constitution is necessary to ensure that its institutions work well -**

As in autumn 2005, **the majority of European citizens (61%; +1 point) consider that a European Constitution is necessary to ensure that the European institutions work well<sup>85</sup>**. However, just under a quarter of EU citizens disagree (24%; -1 point) and 16% lack an opinion (+1 point).

Question: QA38. Which of the two following statements, best describes your view?

**People's overall position on the idea of a European Union Constitution gives rise to an important cleavage in public opinion in this regard.** 79% of citizens who support the idea of a European Constitution find that it is needed to ensure that the institutions work well. Conversely, the majority of people who are against a Constitution find that it is not needed to ensure that the institutions work well (58%).

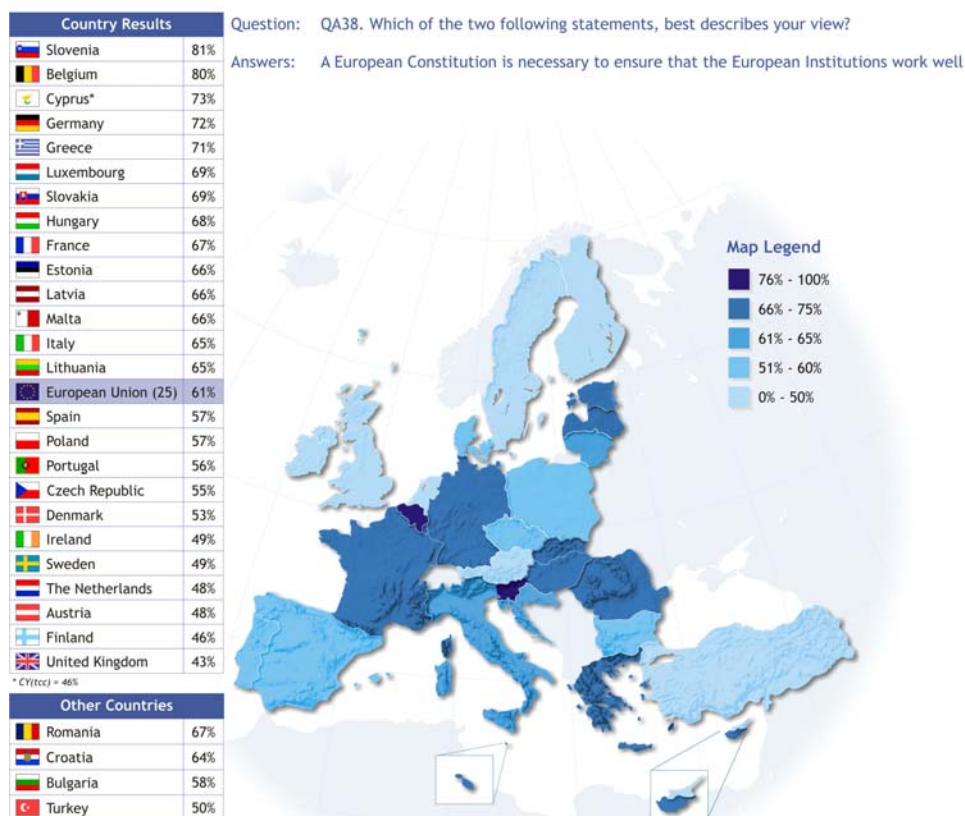

<i>Need for a Constitution</i>	Need for a Constitution	
	Necessary	Not necessary
EU25	61%	24%
<b>For or against a constitution for the European Union</b>		
For	79%	29%
Against	13%	58%
DK	7%	13%

<sup>85</sup> QA38 Which of the following two statements best describes your view...

This strong correlation between people's overall position and views about the need means that the rank order of countries for these two issues is very similar. Hence, the broadest support for the view that a European Constitution is needed is found in Slovenia (81%) and Belgium (80%), the two countries where the idea of a Constitution is most widely supported.

**This analysis reveals an interesting exception with regard to the Netherlands. Whilst Dutch respondents positively receive the idea of a Constitution (59%), many of them feel that the Constitution is not needed to ensure the functioning of the EU institutions (46%).** This result does not appear in France, where similar proportions support the idea of a Constitution and consider it necessary for the functioning of the EU institutions (66% and 67%, respectively).

Examining the development of public opinion since Autumn 2005 shows that Spain (-3 points) and the UK (-3) are the only Member States where public opinion is now significantly (i.e. at least a 3 points difference) less inclined to think that a European Constitution is necessary to ensure that the European institutions work well.

On this issue, as well, the proportion of citizens who disagree is largely constant and variations in the view that the Constitution is necessary are mirrored by differences in those saying they lack an opinion (less educated, low on opinion leadership index, low levels of EU knowledge)<sup>86</sup>. It is to be noted that people's position on the left-right scale shows a cleavage in public opinion. This is also a distinguishing factor in terms of how people think about the idea of a Constitution.

	Necessary	Not Necessary	DK

<sup>86</sup> A table detailing the full results of the socio-demographic analysis of QA38 can be found in the annexes.

## 2.2. Support in the countries where the European Constitution has not (yet) been ratified

*- Public opinion is less volatile and more positive than in Spring 2006 -*

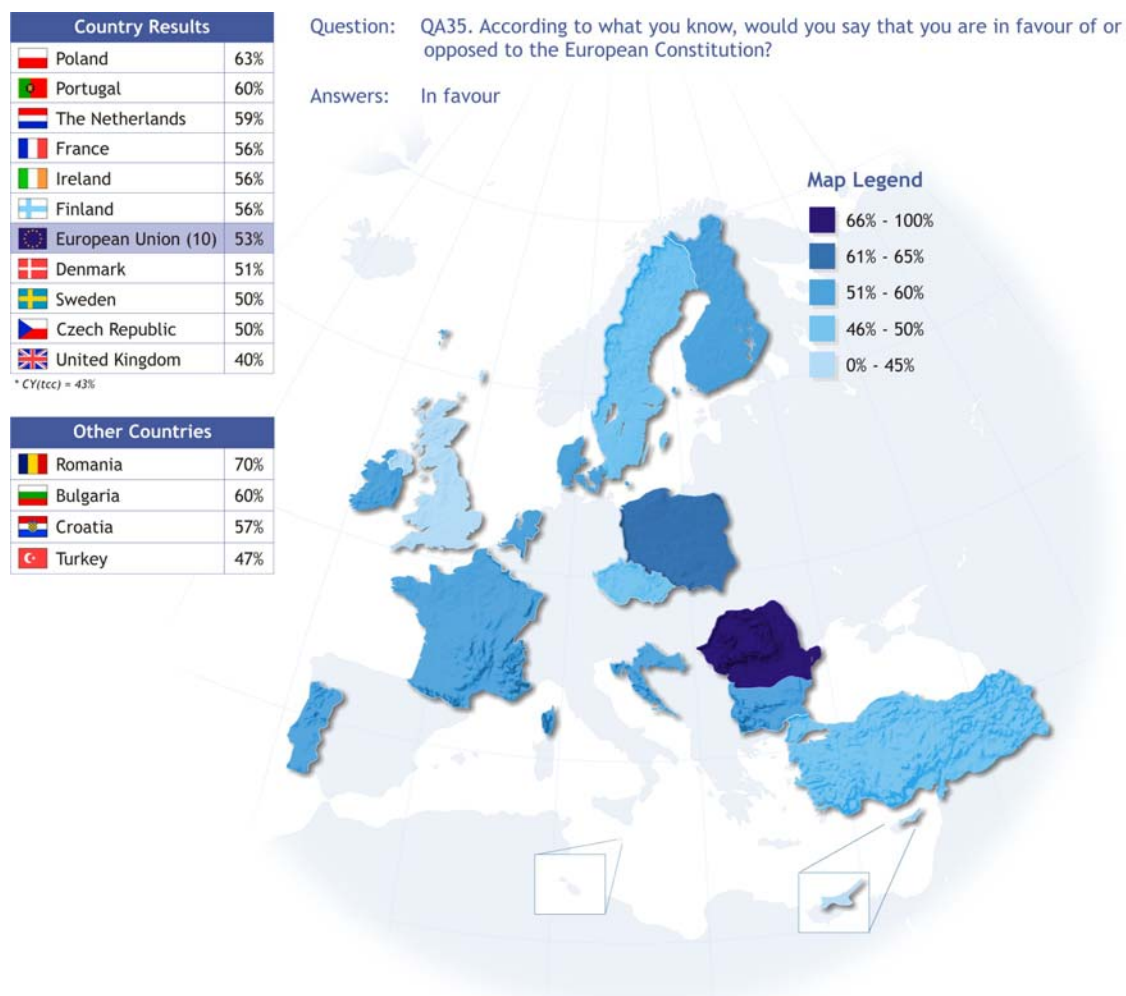

Over half of the people living in the countries which at the time of the survey had not yet ratified the treaty establishing the European Constitution support the constitution (53%)<sup>87</sup> which represents an improvement (+ 6 points) compared with Spring 2006. Public opinion is now also less volatile as the proportion of “don’t know” replies has fallen from 24% to 19%.

Question: QA35. According to what you know, would you say that you are in favour of or opposed to the European Constitution?

**In all the Member States in question a majority of citizens are in favour of the European Constitution**, with the highest level of support being in Poland (63%).

<sup>87</sup> The following question has only been asked in countries where the European Constitution has not been yet adopted or in those that have already rejected it (i.e. France and the Netherlands).  
“QA35 According to what you know, would you say that you are in favour of or opposed to the European Constitution?”

However, in the United Kingdom, the gap between those in favour and those against the Constitution is small (40% vs. 35%). Furthermore, it should be noted that a significant minority of the population in Denmark (35%), Finland (32%), France, the Netherlands (both 31%) and the Czech Republic (30%) is against it. In France and the Netherlands – the two countries that rejected the Constitution by referendum - public support has increased since Spring 2006: 59% of Dutch respondents are now in favour (+6 points) and for France this figure is 56% (+5 points). Public opinion in Ireland remains quite volatile with 35% of the respondents unable to express an opinion.

**In the two countries that will be joining the European Union on 1 January 2007 there is broad support for the European Constitution:** 70% in Romania and 60% in Bulgaria. Although the percentage of “don’t know” replies remains high in Bulgaria (33%) the level of opposition levels is negligible (7%).

In fact, as the following table shows, a positive development is noted in all countries in question with the exception of Denmark<sup>88</sup>.

*"In favour of the European Constitution"*

% In favour	Sp.2006	Aut.2006	Diff. Sp.2006/ Aut.2006
<b>EU10*</b>	<b>47%</b>	<b>53%</b>	<b>+6</b>
PT	43%	60%	+17
SE	40%	50%	+10
CZ	42%	50%	+8
IE	48%	56%	+8
FI	48%	56%	+8
PL	56%	63%	+7
UK	38%	40%	+2
DK	53%	51%	-2
NL	53%	59%	+6
FR	51%	56%	+5
CY(tcc)	50%	43%	-7
BG	44%	60%	+16
RO	54%	70%	+16
HR	41%	57%	+16
TR	34%	47%	+13

\* In Spring 2006, this question was asked in 11 Member States. Since then, the European Constitution has been adopted in Estonia and the question was therefore no longer posed in the country.

<sup>88</sup> The table only shows changes in the % 'in favour' responses. Readers can find the full results of QA35 in the annexes.

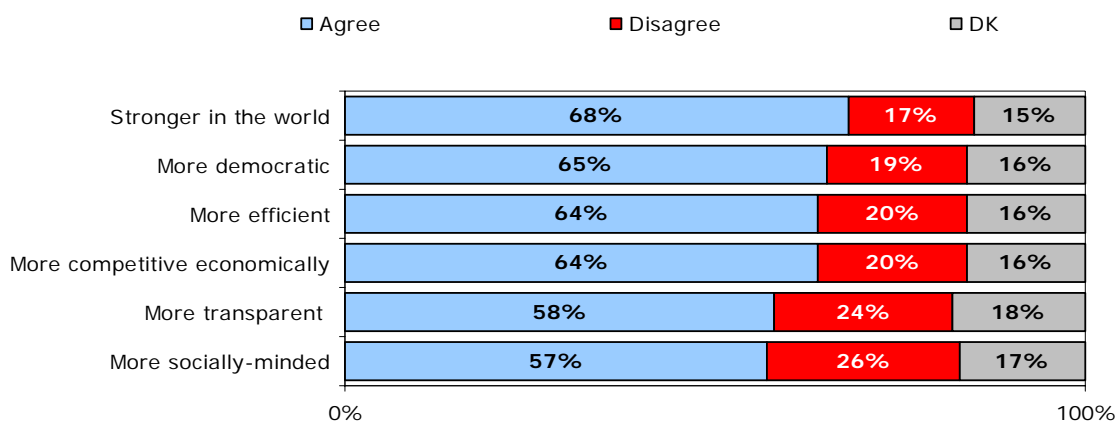

### 2.3. The effects of the European Constitution

#### *- Public even more positive about the effects of the European Constitution -*

In comparison with spring 2006, **public opinion about the effects of the European Constitution has become more positive**<sup>89</sup>.

Overall, close to 7 out of 10 European Union citizens consider that **adoption of the Treaty establishing a Constitution for Europe will make the European Union stronger in the world** (68%; no change). Furthermore, close to two-thirds of respondents feel that it will make the EU **more democratic** (65%; +3 points), more efficient (64%; +2 points) and **more competitive economically** (64%; +2 points). Close to 6 out of 10 citizens find that the European Constitution will make the EU **more transparent** (58%; +2 points) and **more socially-minded** (57%; +3 points).

#### If all Member States adopt the Treaty establishing a Constitution for Europe, it will make the running of the European Union...

A comparison between the Former EU15 countries and the NMS10 countries shows that, overall, respondents in the latter group of countries indicate significantly more often that the adoption of the Treaty would make the EU more transparent (57% vs. 65%), more efficient (64% vs. 68%) and stronger in the world (68% vs. 71%).

Large differences in opinion are noted at the country level. Citizens in Belgium, Italy, Cyprus and Spain most frequently agree with the above sentiments whereas this is least so in the United Kingdom and Denmark.

On average, agreement tends to be somewhat more widespread in Romania than it is in Bulgaria. Furthermore, opinions are relatively consistent for all six areas with scores ranging from 64% (Bulgaria: more transparent) to 74% (Romania: more democratic). In the candidate countries a similar pattern is noted with agreement being somewhat more widespread in Croatia than it is in Turkey.

<sup>89</sup> QA36. For each of the following, please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree. If all Member States adopt the Treaty establishing a Constitution for Europe, it will make...?

**If all Member States adopt the Treaty establishing a Constitution for Europe, it will make the European Union ... (by country)**

	More democratic	More efficient	More transparent	Stronger in the world	More competitive economically	More socially-minded

## 2.4. The future of the European Constitution

### - Opinion about the Constitution's future does not change -

As in spring 2006, close to a quarter of EU respondents feel that the Member States should continue the ratification process (23%). The majority of **European citizens continue to express the wish for the Constitution to be renegotiated** (48%, +1 point). Only a small minority believes that the European Constitution should be dropped (13%, unchanged)<sup>90</sup>.

Question: QA37. 15 countries have ratified the European Constitution, but France and the Netherlands voted "no". Which of the following best describes your view?

The view that the European Constitution should be renegotiated is now held by at least a relative majority of citizens in all Member States. However, the intensity to which citizens hold this view varies with broadest support noted in Belgium and France (both 66%). Respondents in Ireland (35%) and the United Kingdom (37%) expressed this view the least.

The wish to continue the ratification process continues to be most popular in Italy (33%) though it no longer forms the majority view, as was the case in spring 2006. Support for the continuation of the ratification process is also expressed by a significant minority of citizens in Malta (31%), Germany, Greece (both 29%) and Spain (28%). It is least widely supported in France (9%) and Denmark (11%).

<sup>90</sup> QA37. 13 countries have ratified the European Constitution, but France and the Netherlands voted "no". Which of the following best describes your view...?

Denmark (30%), the United Kingdom (26%) and Austria (23%) are the only three countries where over one-fifth of citizens feel that the Constitution should be dropped. Conversely, in Cyprus (4%) and Hungary (5%), only one respondent in twenty shares this view.

Lastly, it should be noted that in Ireland (32%), Spain (30%), Portugal (28%) and Malta (26%), a significant minority of citizens lacks an opinion about the future of the Constitution.

The analysis of the socio-demographic variables shows that the most popular view is that the Constitution should be renegotiated regardless of people's characteristics.

Whilst the differences between the various socio-demographic groups when it comes to wanting the ratification process to continue are relatively small, the largest degree of variation is found on the basis of how much people feel they know about the European Union. Only 19% of those who feel they know very little want the process to continue compared with 31% of people who feel they know a lot. However, it should be noted that this variation is considerably smaller than was the case in spring 2006 (16% versus 35%).

### 3. Further enlargement

#### 3.1. Support for further enlargement

##### - Public opinion remains divided about further enlargement -

On the eve of the 5<sup>th</sup> round of enlargement, **the gap between supporters and opponents of further enlargement remains small**. On average, 46% of EU citizens support further enlargement (+1 point since spring 2006) while 42% continue to oppose it<sup>91</sup>.

Question: QA25\_4. What is your opinion on each of the following statements? Please tell me for each statement, whether you are for it or against it.

Option: Further enlargement of the EU to include other countries in future years

However, the European average conceals very large differences and shifts in opinion. Support for further enlargement tends to be considerably higher in the ten new Member States than in the former EU15 countries (72% versus 41%). Furthermore, public opinion has shifted considerably within some of the Member States and support is now the strongest in Poland (76%; +4 points), followed by Slovenia (74%; +1 point). Next come Greece (71%; +15 points) and Slovakia (69%; +11 points), which have recorded the largest increases in support. There are only two Member States where support has fallen significantly: the United Kingdom (36%; -8 points) and Spain (51%; -4 points). However, support continues to be the lowest in Germany (30%; +2 points); Austria (31%; +4 points), Luxembourg (32%; +5 points) and France (34%; +3 points), despite the increases noted in those countries.

<sup>91</sup> QA25.4. What is your opinion on each of the following statements? Please tell me for each statement, whether you are for it or against it.

Further enlargement of the European Union to include other countries in future years.

BG	62%	67%	+5
RO	69%	68%	-1

HR	64%	64%	0
TR	45%	50%	+5

Almost 7 in 10 respondents in the two countries that are about to join the European Union, namely Romania and Bulgaria, are in favour of further enlargement. In Romania, this represents a slight fall since spring 2006 (68%; -1 point), whereas support has increased in Bulgaria (67%; +5 points). In Croatia support is stable at 64%, while it has increased by 5 points to 50% in Turkey.

The position of respondents on further enlargement is also strongly influenced by their age and education: 59% of respondents who are still studying claim to be in favour of further enlargement compared with 35% of those who left school at 15 or earlier. Support for further enlargement of the EU tends to be stronger among younger respondents (58% of respondents aged 15-24 compared with 38% of those aged 55 and over).

### Support for Enlargement

	For	Against	DK/NA
<b>EU average</b>	46%	42%	12%
 <b>Age</b>			
15-24	58%	32%	10%
25-39	51%	38%	11%
40-54	45%	45%	10%
55 +	38%	47%	15%
 <b>Education (End of)</b>			
15-	35%	46%	19%
16-19	46%	44%	10%
20+	53%	39%	8%
Still Studying	59%	31%	10%
 <b>EU knowledge</b>			
1-3	39%	44%	17%
4-7	52%	40%	8%
8-10	51%	43%	7%

Unlike most other Eurobarometer indicators, there is no real discernible pattern in terms of **EU knowledge**: people who feel that they know a little about the EU are the most inclined to support enlargement (52%), compared with those who feel that they know a great deal (51%) and those who feel that they know very little (39%) about it.

### 3.2. The choice of future Member States

#### *- Switzerland and Norway top the list -*

EU citizens continue to voice **widespread support for the accession of three member countries of the European Free Trade Association (EFTA)**: Iceland (69%; +1 point since autumn 2005) and in particular Norway (78%; +1 point) and Switzerland (78%; +1 point)<sup>92</sup>.

EU citizens are somewhat more divided than in autumn 2005 regarding the support for the two countries that joined the EU on 1 January 2007. 46% are in favour of Bulgaria becoming part of the EU (-2 points) while 40% oppose it (+3 points); 41% support Romania's entry (-2 points) while 46% are against it (+4 points).

In terms of the two candidate countries, a majority of EU citizens continues to support the membership of Croatia (50%; -1 point), whereas support for Turkey is even less widespread than was the case in autumn 2005 (28%; -3 points).

Support for the other countries included in the list ranges from 32% for Albania (-1 point) to 41% for the Ukraine (-1 point).

---

<sup>92</sup> QA33. For each of the following countries, would you be in favour or against it becoming part of the European Union in the future?

A comparison of public opinion in the NMS10 and the former EU15 countries shows that citizens in the new Member States tend to be more in favour of the accession of the country listed. Furthermore, the gap between the two sets of Member States has increased in this respect since autumn 2005.

<i>% in favour</i>	EU15		NMS10	
	EB66 – shift EB64		EB66 – shift EB64	
<b>Switzerland</b>	77%	+1	87%	+4
<b>Norway</b>	76%	0	86%	+4
<b>Iceland</b>	67%	0	78%	+6
<b>Croatia</b>	46%	-1	74%	+4
<b>Bulgaria</b>	42%	-3	68%	+4
<b>Romania</b>	38%	-3	55%	+2
<b>Ukraine</b>	37%	-1	62%	+5
<b>Former Yug. Rep. of Macedonia (FYROM)</b>	37%	-2	57%	+6
<b>Montenegro</b>	37%	n/a	56%	n/a
<b>Bosnia and Herzegovina</b>	36%	-3	54%	+4
<b>Serbia</b>	34%	n/a	52%	n/a
<b>Albania</b>	30%	-2	45%	+5
<b>Turkey</b>	26%	-3	37%	-1

### 3.3. The question of Turkey

This final section focuses on the opinions of European Union citizens regarding Turkey, using a series of eight statements with which respondents were asked to indicate whether or not they agreed<sup>93</sup>.

#### **- Turkish accession should be subject to certain conditions -**

According to European Union citizens, Turkish membership of the Europe Union in about ten years must absolutely be subject to two conditions: the systematic respect for human rights (85%, +2 points since autumn 2005) and a significant improvement in its economic level (77%; +1 point).

More than six out of ten persons interviewed fear that Turkish membership would encourage immigration to the most developed countries in the European Union (66%; +3 points). Furthermore, six out of ten interviewees feel that the cultural differences between Turkey and the Member States are too important to allow it to join the EU (61%; +6 points).

Some 56% of respondents consider that Turkey partly belongs to Europe by its geography (+2 points), while 40% of respondents consider that Turkey partly belongs to Europe by its history.

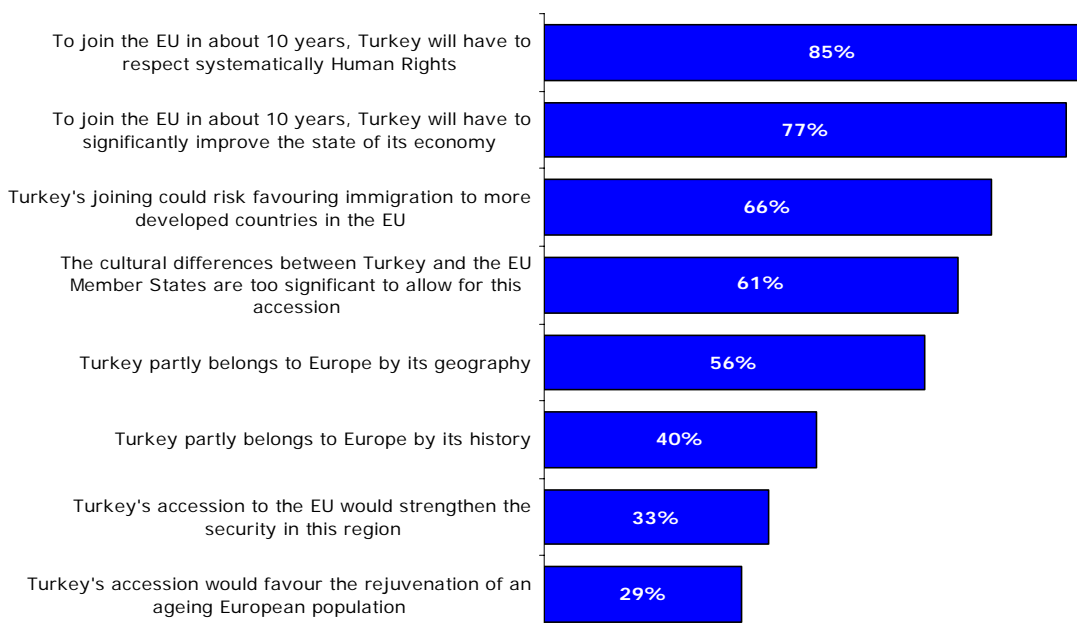

Lastly, only a third of European Union citizens feel that Turkish membership would strengthen security in the region (33%; -2 points) while more than half (51%; +3 points) disagree. One respondent out of two is sceptical about the beneficial effects of Turkish membership in terms of decreasing the average age of the European population (50%).

---

<sup>93</sup> QA34. For each of the following please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

**For each of the following please tell me whether you agree...  
Yes % EU 25**

In Denmark, Sweden, Greece, the Netherlands, Finland, Belgium, and Germany, there is near unanimity concerning the view that Turkey will have to systematically respect Human Rights with more than 9 out of 10 respondents agreeing in these countries. With a figure of 65%, people in Cyprus are least likely to agree.

There is very little opposition throughout the Member States concerning the view that Turkey will have to improve significantly its economic level and differences in levels of agreement are mostly accounted for by differences in the level of "don't know" responses. Nonetheless, the broadest level of agreement is found in Greece (94%), Slovenia (91%) and Finland (90%).

Lastly, it is interesting to note that the views of Turkish respondents with regard to these two conditions are in line with those of the European Union citizens, although the figures are slightly lower.

**Attitudes to (the accession of) Turkey (by country)**

% Agree	Turkey partly belongs to Europe by its geography	Turkey partly belongs to Europe by its history	Turkey's accession to the EU would strengthen the security in this region	The cultural differences between Turkey and the EU Member States are too significant to allow it to join the EU	Turkey accession would favour rejuvenating an ageing European population	Turkey's joining could risk favouring immigration to more developed countries in the EU	To join the EU in about ten years, Turkey will have to respect systematically Human Rights	To join the EU in about ten years, Turkey will have to significantly improve the state of its economy

## CONCLUSION

This Standard Eurobarometer survey was carried out in autumn 2006, just prior to the accession of Bulgaria and Romania to the European Union.

- ◆ Public opinion regarding some of the main indicators of support for the European Union is now slightly less positive. Support for EU membership now stands at 53% (-2) and the score for the perceived benefits of membership is 54% (no change). The European Union's image is positive, according to 46% of its citizens (-4), and 33% feel that things are going in the right direction in the European Union. Trust in the European Union stands at 45% (-3) but confidence levels in the European Institutions are stable: 48% of EU citizens trust the European Commission (+1) and, as in spring 2006, 52% trust the European Parliament.
- ◆ The social and economic climate of the European Union is slightly more positive than in Spring 2006. Although citizens remain seriously concerned by the employment situation in their country, people are now less pessimistic than in spring 2006, not only in this regard, but also when it comes to other important issues, such as the situation of their national economy, the environment and the European economy.
- ◆ To improve the European Union's economic performance, the vast majority of citizens are counting on a knowledge-based economy, giving priority to the improvement of education and training and to investment in research and innovation. Furthermore, more than 6 out of 10 respondents agree that free competition is the best guarantee of economic prosperity (64%) and an equal proportion feel that the State intervenes too much in their lives (62%).
- ◆ European citizens cite democracy, human rights and peace as the values which best represent the European Union and close to 6 out of 10 EU citizens are proud to be European. However, at the same time, citizens are quite critical about the democratic functioning of the European Union: the majority feels that their voice does not count (57%, +3 points) and only 19% feel involved in European affairs.
- ◆ At the same time, the survey points to increased pessimism among EU citizens regarding the future of their country: 48% find that things are going in the wrong direction in their country (+5). Although Europeans are less pessimistic about the direction in which things are going in the European Union, in this regard as well negative opinions have increased with 33% now saying that things are going in the wrong direction (+6).
- ◆ All in all, European citizens acknowledge the benefits of living in Europe: in comparison to the United States, the European Union is seen to be ahead in terms of protection of the environment, the fight against social disparities and discrimination, the healthcare system, education and the fight against unemployment. It is nonetheless perceived to be behind the United States in terms of scientific research, business creation, medical research and innovation technology.

- ◆ The values of the European Union closely match the personal values of its citizens, for whom peace is the most important value (52%), and the majority view (48%) among EU citizens is that the Member States are close to each other in terms of shared values.
- ◆ The survey points to a slight decrease since spring 2006 in both subjective and effective knowledge of the European Union, its institutions and its policies. However, the misconception that administrative overheads represent the European Union's main budget heading is now less widely held (27%, -4 points).
- ◆ Support for the European Security and Defence Policy, the European Common Foreign Policy and the single currency remains widespread.
- ◆ On the eve of the accession of Bulgaria and Romania, the gap between supporters (46%, +1) and opponents (42%, no change) of further enlargement of the EU remains small.
- ◆ The best way to ensure the future of Europe is to have comparable living standards. A considerable minority of EU citizens, furthermore, find that a common constitution would be most helpful for the future of Europe (30%, +5 points).
- ◆ Overall, the public continues to express faith in the future of the European Constitution. The majority of European Union citizens consider that adopting the European Constitution is necessary to ensure that the European institutions work well. In comparison with spring 2006, EU citizens are now even more positive about the effects of a European Constitution. In the countries that have not (yet) ratified the treaty establishing the European Constitution, 53% are in favour of it, which represents a 6-point improvement since spring 2006.
- ◆ Results to new questions asked in this Eurobarometer show that EU citizens call for more severity towards criminals; the majority does not approve of authorising homosexual marriages nor the adoption of children by homosexual couples and more than two-thirds are also opposed to the legalisation of the personal consumption of cannabis.

## EUROBAROMETER "Standard"

Between the 6<sup>th</sup> of September and the 10<sup>th</sup> of October 2006, TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out wave 66 of the "STANDARD" EUROBAROMETER, at the request of the EUROPEAN COMMISSION, Directorate General Communication, "Public Opinion and Media Monitoring".

This STANDARD EUROBAROMETER 66 covers the population of the respective nationalities of the European Union Member States, resident in each of the Member States and aged 15 years and over. The STANDARD EUROBAROMETER 66 has also been conducted in the two acceding countries (Bulgaria and Romania) and in the two candidate countries (Croatia and Turkey) and in the Turkish Cypriot Community. In these countries, the survey covers the national population of citizens of the respective nationalities and the population of citizens of all the European Union Member States that are residents in those countries and have a sufficient command of one of the respective national language(s) to answer the questionnaire. The basic sample design applied in all states is a multi-stage, random (probability) one. In each country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

In order to do so, the sampling points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the countries surveyed according to the EUROSTAT NUTS II (or equivalent) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses (every Nth address) were selected by standard "random route" procedures, from the initial address. In each household, the respondent was drawn, at random (following the "closest birthday rule"). All interviews were conducted face-to-face in people's homes and in the appropriate national language. As far as the data capture is concerned, CAPI (*Computer Assisted Personal Interview*) was used in those countries where this technique was available.

TOTAL			29.152	6/09/2006	10/10/2006	444.406.021

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from Eurostat population data or from national statistics offices. For all countries surveyed, a national weighting procedure, using marginal and intercellular weighting, was carried out based on this Universe description. In all countries, gender, age, region and size of locality were introduced in the iteration procedure. For international weighting (i.e. EU averages), TNS Opinion & Social applies the official population figures as provided by EUROSTAT or national statistic offices. The total population figures for input in this post-weighting procedure are listed above.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits:

<b>Observed percentages</b>	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
<b>Confidence limits</b>	± 1.9 points	± 2.5 points	± 2.7 points	± 3.0 points	± 3.1 points

## Eurobarometer 66

QA9a.1 Tout le monde n'est pas d'accord sur les avantages et les inconvénients qu'il y a pour (NOTRE PAYS) à faire partie de l'Union européenne. Je vais vous citer quelques domaines, et pour chacun j'aimerais que vous me disiez si le fait que (NOTRE PAYS) fait partie de l'Union européenne a un effet très bon, plutôt bon, plutôt mauvais ou très mauvais.

La sécurité de notre pays

QA9a.1 People disagree about the advantages and disadvantages of (OUR COUNTRY) belonging to the European Union. I am going to read out some points and, for each one, I would like you to tell me if (OUR COUNTRY) being in the European Union has a very good, fairly good, fairly bad or very bad effect.

Our country's security

## Eurobarometer 66

QA9a.5 Tout le monde n'est pas d'accord sur les avantages et les inconvénients qu'il y a pour (NOTRE PAYS) à faire partie de l'Union européenne. Je vais vous citer quelques domaines, et pour chacun j'aimerais que vous me disiez si le fait que (NOTRE PAYS) fait partie de l'Union européenne a un effet très bon, plutôt bon, plutôt mauvais ou très mauvais.

Notre influence dans le monde

QA9a.5 People disagree about the advantages and disadvantages of (OUR COUNTRY) belonging to the European Union. I am going to read out some points and, for each one, I would like you to tell me if (OUR COUNTRY) being in the European Union has a very good, fairly good, fairly bad or very bad effect.

## Eurobarometer 66

QA27 Selon vous, les décisions concernant la politique européenne de défense devraient-elles être prises par les Gouvernements nationaux, l'OTAN ou l'Union européenne ?  
 QA27 In your opinion, should decisions concerning European defence policy be taken by national governments, by NATO or by the European Union?

## Eurobarometer 66

QA32 Et diriez-vous que vous êtes très fier(e), assez fier(e), assez peu fier(e), pas du tout fier(e) d'être Européen(ne) ?  
QA32 And would you say you are very proud, fairly proud, not very proud, not at all proud to be European?

## Eurobarometer 66

QA34.4 Pour chacune des propositions suivantes, dites-moi si vous êtes tout à fait d'accord, plutôt d'accord, plutôt pas d'accord ou pas du tout d'accord.

Les différences culturelles entre la Turquie et les Etats membres de l'UE sont trop importantes pour lui permettre d'adhérer à l'UE

QA34.4 For each of the following please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

The cultural differences between Turkey and the EU Member States are too significant to allow it to join the EU

## Eurobarometer 66

QA34.5 Pour chacune des propositions suivantes, dites-moi si vous êtes tout à fait d'accord, plutôt d'accord, plutôt pas d'accord ou pas du tout d'accord.

L'adhésion de la Turquie favoriserait le rajeunissement d'une population européenne vieillissante

QA34.5 For each of the following please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

Turkey's accession would favour rejuvenate an ageing European population

## Eurobarometer 66

QA34.6 Pour chacune des propositions suivantes, dites-moi si vous êtes tout à fait d'accord, plutôt d'accord, plutôt pas d'accord ou pas du tout d'accord.

L'adhésion de la Turquie risquerait d'encourager l'immigration vers les pays les plus développés de l'UE

QA34.6 For each of the following please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

Turkey's joining could risk favouring immigration to more developed countries in the EU

## Eurobarometer 66

QA34.7 Pour chacune des propositions suivantes, dites-moi si vous êtes tout à fait d'accord, plutôt d'accord, plutôt pas d'accord ou pas du tout d'accord.

Pour pouvoir adhérer à l'UE dans une dizaine d'années, la Turquie devra respecter systématiquement les droits de l'homme

QA34.7 For each of the following please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

To join the EU in about ten years, Turkey will have to respect systematically Human Rights

## Eurobarometer 66

QA34.8 Pour chacune des propositions suivantes, dites-moi si vous êtes tout à fait d'accord, plutôt d'accord, plutôt pas d'accord ou pas du tout d'accord.

Pour pouvoir adhérer à l'UE dans une dizaine d'années, la Turquie devra avoir amélioré significativement son niveau économique

QA34.8 For each of the following please tell me whether you totally agree, tend to agree, tend to disagree or totally disagree.

To join the EU in about ten years, Turkey will have to significantly improve the state of its economy
